Subject index

- acceptable set
 - defined, 39
 - functions, propositions concerning, 138–44
 - functions, theorems for, 129–32, 137–8
- acyclicity, 34
- admissibility rules, Levi's E- and S-, 37–8
 - in a dynamic choice context, 155–6, 188–90
 - involving violations of Alpha and Beta, 37–8
 - problem with a myopic approach to, 184–6
 - problem with a sophisticated approach to, 191–2
 - resolute approach to, 157, 192
- Allais counterexamples to
 - independence, 67
 - Broome's analysis of, 75–7
 - critique of Raiffa's analysis of, 168–72
 - Raiffa's analysis of, 91–4
- Alpha, 23
- bargaining theory, 261
- Bernoulli's St. Petersburg paradox, 255
- Beta, 23
- character planning, 225, 233, 235–6
- choice function
 - coherence conditions on, 23
 - defined, 22–3
 - necessary conditions for existence of, 34–5
 - preference-based, defined, 24
 - and weak orderings, 24–5, 29–33
- choice set
 - abstract, defined, 22
 - equivalence to acceptable set, 40–1
 - preference-based, defined, 21
- coherence principle (Seidenfeld's), 175
 - and dynamic substitution (D-SUB), 176
- commitment, 160, 216–18, 285
 - contrasted to precommitment, 158
- conditional preference (CP), principle of, 51
 - and separability, 280–1
- connectedness
 - defined, 20
 - difficulty of giving a pragmatic justification for, 64–5
 - Sen's defense of, 65
- consequentialism, (Hammond's) principle of, 6, 83–4, 242–3
- context-free choice (CF)
 - defined, 23
 - derivation of, in a dynamic framework, 129–31
 - and money pumps, 163–7
- context-free orderings (CFO)
 - defined, 29
 - as necessary condition for existence of a weak ordering, 29–30
- decision trees, 5, 6–11, 99–100
 - truncated, 101
- dominance
 - Arrow dominance (AD), 52
 - distinction between DSO and generalized versions, GDE and GDP, 53, 77–80, 246–51
 - dynamic choice violations of, 91–5
 - general characterization, 4
 - general dominance for a fixed partition of events (GDE), 49
 - general dominance for fixed probabilities (GDP), 49, 53, 77–80, 246–51
 - generalized first-order stochastic dominance (GFSD), 56, 57
 - Seidenfeld's mixture dominance (MD), 173
 - for sure outcomes (DSO), 50
- drug addiction, 152–3
- Dutch-book arguments, 5, 95–6
- dynamic (or sequential) choice
 - and pragmatic arguments, 5, 6–10
 - and rational feasibility (R-feasibility), 203–4
- dynamic consistency (DC)
 - defined, 120
 - exclusion (DC-EXC), 119
 - in Hammond's construction, 127

- dynamic consistency (DC) (*cont.*)
 inclusion (DC-INC), 118–19
 intersect condition, 118
- dynamic inconsistency, 6
 Strotz's analysis of, 148–54
- dynamic substitution (D-SUB), 176–9
 as implicit in Seidenfeld's coherence principle, 176
- Ellsberg counterexamples to independence, 70–3, 94–5
 dynamic choice versions of, 167–8, 181–2
- endogenous preference changes, 213–15
- equilibrium
 interpersonal, 15, 16
 intrapersonal, 12
 Nash version, 221, 258
 parallel to separable choice, 16
 suboptimality of interpersonal, 16
 suboptimality of intrapersonal, 16, 211
- expected utility hypothesis, 2, 240, 250
- feasibility
 full (FF), 134
 objective (O-feasibility), 200–2
 psychological (P-feasibility), 202
 rational (R-feasibility), 201–2, 215–16
 and rationality, 14
 and resolute choice, 14
 restricted (RF), 134
 Seidenfeld's dynamic (DF), 174, 179–80
 separable (SF), 134–5
 and separability, 14
 theorems and results for, 137–41
 very separable (VSF), 136
- global maximization, 231, 234, 236–7
- imperfect rationality, 232, 237–8, 260
- independence
 alternative formulations of, 44–6
 basic concept of, 1
 Broome's defense of, 73–7
 choice set version of (CIND), 57–8
 for constant outcomes (ICO), 45
 defined, 44
 derivation of, in a dynamic framework, 131–2
 and dominance, 50–3, 167–8
 equivalent choice (CIND-E), 137
 and noncomplementarity, 47
 Savage's version (SI), 45
 strict choice (CIND-S), 139
 and sure-thing principle, 48
 for sure outcomes (ISO), 44
- interpersonal choice, 15
 analogy to intrapersonal choice, 15, 256
- intrapersonal choice, 14
 analogy to interpersonal choice, 15, 256
 problem of, 210–12
- just cooperative schemes, 216
- justification
 coherentist approach to, 3, 60–1
 foundationalist approach to, 3, 60
 Hume's approach to, 84–6
 pragmatic, 4–5, 82–98
 problem of, 60–2
- Kahneman and Tversky counterexamples to independence, 68–70, 78–9
 dynamic choice versions of, 7–11, 151–2, 167
 and resolute choice, 157–8
- maximal set, 35
 functions, 36
- minimal intelligible choice (MIC), 39–40
 and choice functions, 40
- minimax risk rule
 characterized, 25–6
 and dynamic choice, 150–1, 157
 in violation of context-free condition, 27
- money-pump arguments, 5, 89
- morality, 261–4
- myopic choice
 basic concept of, 12
 exploitation of, 195–6
 models of, 150–2
 problem with, 184–90
- noncomplementarity
 conjunctive, 47
 disjunctive, 47–8
 and independence, 67–73
 problem of justifying, 67–73
- normal-form/extensive-form coincidence (NEC)
 defined, 115
 Hammond's commitment to, 127
- optimality
 intrapersonal, 212
 resolute choice and intrapersonal, 212
 and R-feasibility, 212
 Pareto, 222, 259
- P-acyclicity, 36, 64–5
- parametric choice, 257–8

- plans
 characterized, 100
 continuations of, 104–6
 evaluation of, 101–4
 truncated, 101
 truncated as *de novo* trees, 106
 practice conception of rules, 263
 pragmatic arguments, 4–5, 82–98
 in a dynamic framework, 6–11, 162–82, 195–8
 formalized version of, 183–99
 success of, 11–12
 precommitment, 154, 156, 218, 243
 contrasted to commitment, 158
 Elster's treatment of, 232, 234
 prospects, 107–11
- randomized choice, 107–10
 complications posed by, 109
 and feasibility, 135–7, 139–41
 implications for pragmatic arguments, 189–90, 194, 293
- Reduction
 dynamic version of (SR), 113
 in a nondynamic context (RD), 47, 62–4
 plan reduction (PR), 114
 restricted plan reduction (RPR), 135
 very restricted plan reduction (VRPR), 136
- resolute choice
 basic concept of, 12–13
 characterization of, 156–8
 and consequentialism, 209–13
 and coordination, 16
 feasibility of, 200–18
 pragmatic impeccability of, 198
 and separability, 158–9, 204–6
- revealed preference, 21
 pair set, 22
- ring of Gyges, 262
- self
 concept of, 15–16
 Hume's problem of, 16, 217
 presuppositions of the sophisticated model of, 15–16, 216–18
 prudent, 216
- self-control (in Schelling), 225
 self-definition (in Elster), 233–5
 self-management (in Elster), 232, 237
- separability (SEP)
 basic concept of, 12
 characterized, 120–22
 Hammond's commitment to, 127–8
 implications for feasibility, 134–41
 problems with, 206–9, 213
 relaxing the condition of, 141–2
 and resolute choice, 204–6
 Seidenfeld's version of separable feasibility (DF), 174, 179–80
- sophisticated choice
 analogy to interpersonal choice, 257
 basic concept of, 12
 implications for ontological relation of present to future self, 15
 models of, 153–4
 and plan reduction conditions, 154–6
 problems with, 190–5
 profiting from the limitations of, 257
- stochastic dominance, first-order (FSD), 54
 generalized version, 56–7
 monotonicity version (MO), 53
 relation to DSO, 54–7
- subjective probability, theory of, 2, 82, 240, 249
- suboptimality,
 interpersonal, 16
 intrapersonal, 16, 211–13
- substitution (SUB), 45
 and noncomplementarity, 48
- sure-thing principle
 characterized, 4
 defined, 48–9
 and independence, 48–50, 77
 problem of the justification of, 77–80, 246–51
 and terminal (or sure) outcomes, 78–80, 248–51
- terminal outcomes, 100
 significance of, for plausibility of dominance conditions, 78–80, 248–51
- time-consistent planning, 224
- toxin problem, 227–31
- transitivity
 Arrow's defense of, 65–7
 Broome's defense of, 64
 defined, 20
- truncated plans, 101
 evaluation of, 101–6
- truncated plan reduction (TR), 121
 Hammond's commitment to, 127
- ultimatum games, 256, 258
 analogy to intrapersonal choice, 256
- Ulysses and the Sirens, 149, 152, 202, 232, 284, 285
- weak ordering (WO)
 concept of, 1
 defined, 30
 problem of the justification of, 64–7
 weakness of will, 14, 152, 202
