Index

aggregation of goals, 11–12
Alchian, Armen A., 12–13, 14, 19–20, 45, 49, 54–5, 185, 197, 256, 257n4
alienation, 27
Allen, Stephen A., 102, 104–5, 183, 187
allowable limit, see resource diversions
antitrust, 246, 247
applications of specific responsibility, categories of, 80; complements or substitutes for resource uses, 85–6; defined, 56–7; prices attached to resource uses, 83–5; work rules, 85
appropriations committees, 151
Arrow, Kenneth J., 14
attributed inputs, see under budget, employee’s authority: employer’s choices to delegate, 192–4; governmental, 243–7; legislature’s, to tax, 162–3; limits on employer’s authority, 41; often absent when spillovers occur, 101; price of, 193; in relation to resource responsibility, 5, 13, 40–1; structure of, motivated by cost savings vs. other purposes, 193–4; vs. voluntary coordination, effects on resource allocation, 198–202
backward bending legislative demand, 159
Barnes, Louis B., 25
Baumol, William J., 12, 14, 44, 126, 131, 257n2
Belanger, Gerard, 257n2
Berg, Ivar, 30
Bergstrom, Theodore C., 267n10
Berliner, Joseph S., 51, 76, 77, 85, 86–7
Blau, Peter M., 31, 257–8n5
Blauver, Robert, 22, 27, 98
bonuses, see cash exchanged for increased output
Borcherding, Thomas E., 267n10
bound rationality, 11
Bower, Joseph L., 54, 176, 178
Brennan, Geoffrey, 153, 271n6
Breton, Albert, 227
Buchanan, James M., 153, 263n2, 271n6
budget, employee’s: additional inputs not attributed to employee, 58, 76, 118, 185, 265n3; defined, 58; equilibrium determination, 121–2; in-kind vs. cash, 58, 69; nature of inputs delegated to employee, 58; underpriced, or overpriced, inputs, 76; unspent balance, 77
budget, organization’s, see income, private non-profit organization’s, income, public organization’s
Burns, Tom, 183
campaign contributions at expense of votes, 148 candidate, legislative: advantages, or disadvantages, of incumbency, 145, 149; commitments to constituents, 149–50; maximizes utility, not election probability, 145–6; risk averse, 146, 150; trade-off between resource diversions and election probability, 146
cash exchanged for increased output, 74–6, 85, cash salaries, determination under OVR and SR, 59–61
cash vs. in-kind income, see under income, employee’s
Caves, Richard E., 270n7
Chandler, Alfred D., Jr., 183, 202–6
Claussen, Aage, 141
Coase, Ronald H., 20, 271n1
Cohen, Harry, 257–8n5
collaboration, between managing employees and their employees, 191–2
committee, see coordinating employees; coordinating legislators
committee chairmen, declining influence, 153
comparative economic systems, 108, 243–7
compensated opportunity cost: definition, 35; information required to determine, 45–6; role in imposition of CPOR, 42–4
competition, employees’ can affect output replacement cost, 47; over coordination role, 200–2; in dealing with clients, 207 complements, as an application of specific responsibility, 85–6
complete pricing overall responsibility (CPOR): defined, 6, 42–3, 281; employee’s information demands, 44, 103–4, 109; employer’s information requirements, 43–6
conglomerate mergers, 232–3
Conn, David, 260n9
constant marginal cost assumption, 117
constant returns to scale production function estimates, 117
contract, employment, compared with resource responsibility, 5
contract, enforcement costs leading to production in an organization, 19–20, 54–5

284
coordinating employees: economic roles, 194–7, 198; in multidivisional firm, 205
coordinating legislators, defined, 151
cooperation in employees’ interests (see also coordinating employees): via authority, 191–4, 197–8; to force a managing employee to pursue his employees’ ends, 131, 192; in relation to funding limit, 211–12, 221–2; in relation to nearest level at which OVR is imposed, 189; voluntary, 194–7, 198; voluntary vs. via authority, effects on resource allocation, 198–202
cooperation in relation to internal technological spillovers: under CPOR, 103–4; employees’ choices, when under OVR or SR, 105–7; 107–8; employer’s choices, when imposing overall value or specific responsibility, 104–5, 107
costs of comparing production possibilities, 29–9
costs of employee’s output: under CPOR, 35–6, 42–3; CPOR compared to OVR and SR, 113–17; faced by employee and employer, compared, 69–73, 94–5, 113–17, 120–1; fixed and variable components, 113–16, 217–19, 228; increases in the long run, 218; OVR and SR, compared, 94–5
costs of imposing resource responsibility: CPOR, 45–7; effects of costly information on employer’s choice between OVR and SR, 65–6; fixed and variable components, 61–2; managing employee’s personal costs, 118–19; OVR, 49–50, 62, 65; SR, 65, 84–6, 90–1
costs of organization’s output, see output determination, equilibrium
CPOR, see complete pricing overall responsibility
Crawford, Robert G., 14, 19–20, 54–5, 197, 236, 257n4
cycling, 267n7
Cyert, Richard M., 11, 129
Danzig, George B., 14, 44
data bases, limited usefulness, 31
Davis, Otto A., 15, 103, 106–7, 263n3, 263n4, 263–4n5
Davis, Stanley M., 270n8
Davis-Whinston scheme: applied under CPOR, 103–4, 263n4, 264–5n; applied under OVR, 106–7, 263n4
Deacon, Robert T., 267n10
decentralization (see also delegation of authority; suborganization): effects on employees’ influence on and responsiveness to external demands, 207; and employees’ preferred resource responsibility, 207; informational, 108, 246; of pricing decisions, 123–4
decomposition method, 44
deficit, legislative, 147
delegation of authority (see also decentralization; suborganization), 192–4, 201–2
demands: of beneficiaries, private nonprofit organization, 135–7; of clients, private nonprofit organization, 137–9; of clients, public organization, 170–2; for corporation’s output, problematical, 129; of donors, compared to incremental donation schedule, 135–7; for information, see information demands; for inputs, organization’s, 96–7; for mergers, changes in organization’s status, 230–1; for resource use, employee’s, 81–3; legislature’s, see legislative demand; managing employee’s, for employee’s outputs, 117–20, 124–5; top managing employees’, for corporation’s output, 130, 135–4; uncertainty about (see also Schumpetarian competition), 182; unrevealed by employer, 181
Demsetz, Harold, 12–13, 45, 49, 185
diversions, see resource diversions
dominated investments, defined, 177
donors, as funding authority, 135–7, 139, 222–4, 240–1
Downs, Anthony, 38, 142, 150, 164
Drucker, Peter F., 30–1
effective reorganization, defined, 184
efficiency: employee’s response to managing employee’s demand, 122, 125–6; Kaldor-Hicks vs. Pareto, 132, 163, 169, 262n14; of organization’s output rate, 250; private corporation, 132, 134; private nonprofit organization, 130–7, 139; public organization, 167–9, 172; vote trades, 153, 154
efficiency in employee’s production domain: CPOR, 35–6, 42–4; effects of in-kind vs. cash income, 44, 73, 79–80; OVR, 72–3, 79–80, 94–5, 248–9; SR, 94–7, 100, 249
election probability, legislator’s composition of and number of votes, 148; trade-off with expected resource diversions, 146, 266n5
employee, defined, 281
employer, defined in relation to managing employee and funding authority, 6, 41, 281
employment decisions, sensitivity to wage rates, 97
engineering data, 254–6
envelope, long-run costs, 218
experience, see internal design; investments of employees
experience, market value of (see also cash salaries, determination), 32–3
experimental data, 254–6
external design: conditions leading to, 25–6; defined, 25; effects of market competition, 33; in spite of employee’s information cost disadvantage, 57, 95
Fabian, Tibor, 15, 44
Fama, Eugene F., 127, 128, 221
Farney, Dennis, 153
Findlay, M. Chapman, 262n17
Fiorina, Morris P., 141, 266n5
first long run, defined, 8, 210
Fishburn, Peter C., 262n17
fixed costs, see costs of employee’s output;
costs of imposing resource responsibility
Frohlich, Norman, 271n6
funding authority: citizens as, 140; defined, 4,
281; donors as, 135, 139; legislature as,
165–7, 172, 209, 215–16; not actively
involved in management, 21; responses to
employees’ investments, 208–9; stock-
holders as, 127–8, 133, 211–14
funding limit: constrains uses of resources not
attributed to employees, 185; defined, 7,
210, 281; private corporation, 127, 211–
14, 216, 221–2; private nonprofit organ-
ization, 214–15, 216, 222–4; public or-
ganization, 213–16, 217, 224–7, 247–8
Garson, Barbara, 95–6
Giffen paradox, 267–8n12
Goldberg, Victor P., 271n1
Goodman, Robert P., 267n10
Cort, Michael, 271n3
Gouldner, Alvin, 37
governmental planners’ resource diversions,
245
Gross, Bertram M., 86
Groves, Theodore, 260n9
growth, corporate, 211–14
Hall, Robert L., 255n4
Hanoch, G., 262n17
Harris, Milton, 13, 261n14
Hayek, Friedrich A., 246
Hinich, Melvin J., 265n1
Hirschman, Albert O., 270n9
Hirschleifer, Jack, 13, 102, 259n6, 260n8
Hitch, Charles J., 265n4
Hogarty, Thomas, 271n3
Holmstrom, Bengt, 13, 261n14
Hurwicz, Leonid, 8, 46, 108, 246, 260n9,
261n11, 263–4n5, 271n7
hypothesis testing, data requirements, 254–6
ideologies: coordinating legislator’s, 152; plan-
ners’, 245
implicit prices, OVR: described, 78; employer
takes advantage of employee’s incentive to
infer them, 110; employer’s motivation for,
55–6; under IPOR, 53–4; under NPOR, 55
implicit prices, SR, 98
incentives (see also implicit prices; resource
responsibility): defined, 87; employer’s choices
when imposing SR, 87–91; inten-
sity defined, 87; to learn about legislative
expenditures, 144–5; of OVR and SR
contrast, 94–7; to reveal information
about production possibilities, 260n9
income, employee’s: cash vs. in-kind, CPOR,
35; cash vs. in-kind, managing em-
ployee’s, 120; cash vs. in-kind, OVR and
SR, 51–2, 60–1, 74–6, 79–80, 84–5;
contrasted under SR and OVR, 97; under
CPOR, 35, 43–6; under OVR, 78, 97;
under SR, 97, 99
income equivalent output, defined, 169
income, private corporation’s, 130–1, 220
income, private nonprofit organization’s, 136–
9, 224–4, 229
income, public organization’s, 166, 170, 172,
224–8
incomplete employment contract, 5, 40,
261n13, 283
incomplete pricing overall responsibility
(IPOR): defined, 52–3, 291; in multipli-
divisional firm, 203–6; two basic variants,
52–3
incremental donation schedule, 135–9, 222–4
indispensable employee, 86–7
indivisible resources, 10, 238n3
information cost advantages regarding: citizens’
pREFERENCES, 145; output replacement
cost, 49–50; production possibilities, 25,
29–33; quantities or characteristics of
inputs, or outputs, 27; returns to mergers
or acquisitions, 234; values of employee’s
outputs, 110
information demands: candidate’s, 148–9; cate-
corresponding decision, 108–9; economic system’s, used
in imposing resource responsibility, 246; about effects of legislative expenditures,
144–5; employee’s under CPOR, 44, 104,
109; employer’s under OVR, 78, 109–11,
248; employee’s under SR, 98, 109–11,
249; employer takes advantage of em-
ployee’s information demands, 35, 110;
employer’s while imposing OVR, 49–50,
65–6, 111–12; employer’s while imposing
SR, 65–6, 92–3, 111–12; about produc-
tion domains and preferences of
others, 111–12; about responsibility im-
posed, 110–11
information required for cash bonus scheme to
maximize employer’s welfare, 73–6
information requirements, CPOR: in absence of
internal technological spillovers, 43–6; in
presence of internal technological spil-
lovers, 103–4
information structure, 264n6
informational decentralization (see also informa-
tion demands), 108, 240, 271n7
inframarginal spillovers, 102, 105, 260n2
initiated investments, defined, 174
input demands, organization’s, 90–7
interdependence, compared with internal tech-
nological spillovers, 101–2
interest, employer’s, defined, 36
intermediate outputs: determination of those
produced in an organization, 18–21; two
categories, 17–18
internal design: defined, 25; effects on em-
ployer’s imposition of SR, 84; less likely
under SR, 57, 93
internal design, conditions leading to: cannot
determine in absence of responsibility
imposed, 27; employees’ information cost
advantages, 29–33; production of differ-
tiated outputs, 28–9
internal technological spillovers: compared to
degrees of interdependence, 101–2; defined, 100; effects on resource allocation, see coordination in relation to; employer's choices to intervene, 104–5; 107; information required for efficient coordination, 103–4, 106–7; inframarginal vs. marginal, 102, 263n2; Pareto relevant, 102, 103, 263n2; potentially relevant vs. irrelevant, 102, 263n2; separable vs. non-separable, 263n3
internal vs. independent suppliers, 18–21, 55
International Labor Office, 257–8n5
IPOR, see incomplete pricing overall responsibility
investments, dominated, defined, 177
investments, employers': cases not analyzed, 179–80; effects of Schumpeterian competition, 182, 186–7; effects of technological change, 180–1, 186–7; effects on fixed and variable costs, 217–19, 228; effects on personal replacement costs, 188, 190; effects on production costs, 180, 189–90; effects on resource responsibility, 182–3, 184–5, 190; effects on suborganization, 183–7, 190; induced by decreased donations, 223–4; induced by decreased legislative demand, 223–6; influences on external demands, 206–7; influences on regulations, 208; to obtain information about demands, 181–2, 190; restriction of in-kind benefits from resource divisions, effects on choices, 176–7, 179; returns to employers, or to employers, 174–8
investments, initiated, defined, 174
Jackson, John E., 141
Jensen, Michael C., 213, 260n7
Kaldor-Hicks efficiency vs. Pareto efficiency, 132, 163, 169, 262n14
Keefe, William J., 152
Kessel, John, 141
Klein, Benjamin, 14, 19–20, 54–5, 197, 236, 257n1
knowledge worker, 18
Krueger, Anne O., 271n8
labor market competition, effects on resource divisions, 59–61
labor union: contrasted with a professional society, 188; performing role of coordinating employee, 195; possible role in corporate growth, 213
Lange, Oskar, 246, 257n5
Lawrence, Paul R., 25, 26, 50, 51, 55–6, 102, 183, 187, 258n6, 270n8
legislative demand: based on median voter model, 257n10; compared with citizens' demands, 102–4, 165; effects of information costs, types of voters, 160–1; and funding limit, public organization, 215–16, 217; influence of public organization's employees, 206–7
legislative demand as a function of price, derived: for goods and services available in private markets, 158–9; for goods and services not available in private markets, 155–8
legislative spending: candidate's commitments, 149–50; commitments on future legislatures, 161–2, 226–7, 236, 239, 241; constrained by, 162–3
legislature (see also legislative demand): choice of type of organization as supplier, 235–6; coordinating legislator, 131; determination of each legislator's spending influence, 150–4; as a funding authority, 165–7, 172, 209, 215–16; as an organization, 140; votes on taxation 154
Leibenstein, Harvey, 15, 93, 132–3, 259n1, 265n5, 265n6
Lerner, Abba P., 258n3

new product introduction; see Schumpeterian competition
noneconomic issues, effects on electoral outcomes, 150
nonmaximizing behavior, 94
nonpricing overall responsibility (NPOR), defined, 55–6, 282
normative analysis, contributions of positive theory, 252–4
NPOR, see nonpricing overall responsibility

object output, defined, 170
Ogul, Morris S., 152
Olson, Mancur, 196
Oredshook, Peter C., 142, 143, 265n1, 266n2, 286n6
output determination, equilibrium: employee’s, 121–2; private corporation, 129–31, 133–4, 219–22, 228–9, 250; private nonprofit organization, 135–9, 222–4, 229; public organization, 165–7, 170–2, 224–8, 229; voluntary coordination and coordination by authority, compared, 198–202
output, increased, exchanged for cash, 74–6, 85
output of an employee, defined, 23
output replacement cost: contrasted with personal replacement cost, 48, defined, 48–9; employee’s demand for information, 110–11; employee’s influence over, 182; employer’s demand for information, 49–50, 111–12
overall value productivity, defined, 39
overall value productivity measures: costs affect employer’s choices in imposing responsibility, 62; uses for making inferences about resource diversions, 39–40
overall value responsibility (OVR): broadly imposed for risk diversification, 186, 205, 232; defined, 6, 47–56, 282; efficiency in employee’s production domain, 72–3, 79–80, 94–5, 248–9; employee’s, or employer’s, information demands, see under information demands; imposed on a combination of employees under SR, 57, 67, 189, 207; imposed together with SR, 66–7; output replacement limit, see output replacement cost; potential switch to SR, 48, 50, 71; resource allocation contrasted with that under SR, 94–7; resource allocation under, 69–77
OVR, see overall value responsibility

ownership interest, as an alternative to imposing responsibility, 46
Pareto efficiency vs. Kaldor-Hicks efficiency, see efficiency
Pareto relevant spillovers, 108, 263n2

perfect competition model, 31
personal replacement cost: contrasted with output replacement cost, 48, 86–7, 261n10; defined, 48, 86–7; increased by investments, 189, 190; indispensable employee, 86–7
Pieffer, Jeffrey, 197
planner definition, 244; resource diversions, 245
planning-programming-budgeting systems, 271n5
platform, see candidate’s commitments to constituents: legislative spending potentially relevant spillovers, 102, 105–6, 265n2
power, as a nonpecuniary benefit, 37, 73
Prescott, Edward C., 32, 261n13
price and output determination, see output determination, equilibrium
prices (see also implicit prices, incentives, pricing of outputs): effects of external market prices on resource uses, 96–7; under CPOR, 35, 42–5
pricing of outputs: delegation of pricing decisions, 123–4; employee’s, 122–4; private corporation’s, 129–31; private nonprofit organization’s, 137–9; public organization’s, 170–2
primary decision maker, defined, 244
private nonprofit organization: donors, 135–7, 139, 222–4, 240–1; funding limit, 214–15, 216, 222–4; output determination, 133–4, 135–9, 222–4, 229; pricing of outputs, 137–9; public financing, 240–1, 242–3
production domain (see also external design; internal design; production functions); comparability, 26–35; defined, 4, 22, 282
production functions (see also production domain); definition, 16–17; effects of technological change, 24; encompassed by an organization, 17–21; information about production possibilities is often costly, 17
professional society, 188, 190
professional standards, 188
profit center (see also incomplete pricing overall responsibility), 52
profits: critical amount passed on to stockholders, 128, 131, 215; and private corporation’s growth, 211–14; short-run at the expense of long-run profits, 220–1
promotion, opportunities, effects on resource diversions, 180
public organizations: competitive advantage in avoiding risk premiums, 236; competitive advantage in raising information costs, 235–6; equilibrium size, 236–8; funding limit, 215–16, 217, 224–7, 237–8; legislature, as funding authority, 163–7, 172, 215–16; mergers, 238; output determination, 165–7, 170–2, 224–8, 229; pricing of outputs, 170–2

Radner, Roy, 14, 264n6
rationally ignorant voter, 150, 164
Raviv, Artur, 13, 261n14
regulations: affected interest groups influence legislation, 144; employees’ influence over those enacted, 208; as example of governmental imposed responsibility, 216, 247
rent, quasi vs. monopoly, 257n4
reorganization (see also suborganization): effective, defined, 184; as means of replacing employee’s output, 47, 128
representative firm, 33
resource diversions: of coordinating legislators, 152; and corporate growth, 211–14; defined, 4, 36–9, 282; defined into social welfare functions, 243; effects of promotion opportunities, 180; equilibrium determination, see output determination, equilibrium; fixed and variable components, 116; of governmental planners, 245; of governmental secondary decision makers, 246
resource diversions, allowable limit: coordinating legislators’, 152; increased by employees’ investments, 182, 184–5, 187–9, 189–90, 217–19; under OVR, 49; under SR, 94
resource responsibility (see also complete pricing overall responsibility; incomplete pricing overall responsibility; nonpricing overall responsibility; overall value responsibility, specific responsibility): defined, relation to authority and employment contracts, 5, 40–1; 282–3; effects of Schumpeterian competition and technological change, 186, 189, 190–1; employees affect employer’s choices, 182–3, 184–5, 190; employer’s choice biased in favor of SR, 63–7; faced by a legislature, 163; from multiple sources, placed on primary decision makers, 245; influences on employer’s choice, 61–3; OVR and SR imposed together, 66–7; placed on, or by, secondary government decision makers, 244–7; placed on private corporation’s top managing employees, 127–8; types of, 41
responsibility, see resource responsibility
rewards and penalties (see also specific responsibility): employer’s choice between, 84; employer’s measurement costs, 84; in-kind vs. cash, 84–5
