The National Association for Soviet and East European Studies exists for the purpose of promoting study and research on the social sciences as they relate to the Soviet Union and the countries of Eastern Europe. The Monograph Series is intended to promote the publication of works presenting substantial and original research in the economics, politics, sociology and modern history of the USSR and Eastern Europe.

FIRST BOOKS IN THE SERIES

A. Boltho, *Foreign Trade Criteria in Socialist Economies*

Sheila Fitzpatrick, *The Commissariat of Enlightenment*

Donald Male, *Russian Peasant Organisation before Collectivisation*

P. Wiles, ed., *The Prediction of Communist Economic Performance*

Cambridge University Press

## PREFACE

This project owes its birth to the imaginative encouragement of Bertrand de Jouvenel, who published the pieces dated '1967' in the table of contents in French in *Analyse et Prévission*, November 1967. There was also a too-little-bought special English edition. I am grateful to *Analyse et Prévission* for permission to reprint these early pieces, and to the contributors for their patience throughout the many delays which have dogged the publication of the completed volume. The nature of this volume is described in section 1 of the Introduction.

PETER WILES

... when the number of exogenous variables in a forecast exceeds a certain limit, then the results are more dependent on the character and heroism of the forecaster than an objective presentation of determinants of future development.
