## CONTENTS

Preface ix

|    |   |        |
|----|---|--------|
| 1  | Introduction  | page 1 |
| 2  | The ‘Accessio ad Arithmetica Inffinitorum’                    | 12     |
| 3  | The first visit to London                                     | 23     |
| 4  | Oldenburg’s communication of 6 (16) April 1673                | 36     |
| 5  | The great discoveries of the year 1673                        | 46     |
| 6  | Readings in contemporary mathematical literature              | 63     |
| 7  | First communication about the new results                     | 79     |
| 8  | The quarrel over rectification                                | 101    |
| 9  | Disputes about clocks   | 118    |
| 10 | Leibniz receives first details of Gregory’s and Newton’s work | 126    |
| 11 | Studies in algebra  | 143    |
| 12 | The meeting with Tschirnhaus                                  | 164    |
| 13 | The invention of the calculus                                 | 187    |
| 14 | Dispute about Descartes’ method                               | 202    |
| 15 | The report on Gregory’s results and Pell’s methods            | 211    |
| 16 | Newton’s first letter for Leibniz                             | 225    |
| 17 | Leibniz’ reply  | 232    |
| 18 | Tschirnhaus’ reaction   | 250    |
| 19 | Newton’s second letter for Leibniz                            | 259    |
| 20 | The second visit to London                                    | 277    |
| 21 | Conclusion  | 294    |
