

Cambridge University Press

978-0-521-09047-6 - From Medical Chemistry to Biochemistry: The Making of a
Biomedical Discipline

Robert E. Kohler

Table of Contents

[More information](#)

Contents

1	Introduction: On discipline history	<i>page</i> 1
2	Physiological chemistry in Germany, 1840–1900	9
	Physiological versus organic chemists, 1840–1870	15
	Strasbourg	21
	Chemical physiology	25
	Variant modes: pathology and pharmacology	32
	Bioorganic chemists	35
3	Physiology and British biochemists, 1890–1920	40
	Internal specialization: the University College model	44
	Separate and unequal: Cambridge	47
	A deviant mode: Liverpool	55
	New roles for chemists	58
	The pains of parturition	65
	Conclusion	71
4	General biochemistry: the Cambridge school	73
	The MRC and the Dunn bequest	76
	Hopkins's school	81
	Offshoots: the Oxford school	89
	Conclusion	91
5	European ideals and American realities, 1870–1900	93
	Chemical physiology: R. H. Chittenden at Yale	97
	Chemistry and hygiene: V. C. Vaughan	101
	Biochemistry and pharmacology: J. J. Abel	104
	Physiology in America	108
	The beginnings of medical reform	114
	Conclusion	119
6	The reform of medical education in America	121
	The reform coalition	127
	Eastern leaders: Columbia and Penn	133
	The Midwest: St. Louis and Chicago	140

Table of Contents

[More information](#)

viii	<i>Contents</i>	
	The Far West: University of California	149
	Conclusion	154
7	From medical chemistry to biochemistry: the emergence of a discipline	158
	Medical chemists and biochemists	160
	Biochemical options	168
	Columbia P&S	172
	Harvard Medical School	176
	Variations on a theme	182
	A deviant mode: physiology	186
	Conclusion	192
8	Unity in diversity: the American Society of Biological Chemists	194
	Consolidating a discipline	196
	Founding a society	199
	Institutions and careers	202
	Conclusion	213
9	The clinical connection: biochemistry as applied science	215
	Biochemists and clinicians at odds	217
	Accommodation	220
	Biochemical diagnosis	227
	Contexts for research: options	231
	The diagnostic laboratory	233
	Clinical research laboratories	237
	The American school of clinical biochemistry	243
	Conclusion	251
10	Chemical ideals and biochemical practice	253
	Biochemistry and professional politics: the ACS	255
	Department politics: Illinois	260
	Schools of bioorganic chemistry	267
	Chemists and the medical market	272
	Johns Hopkins and Columbia	276
	Conclusion	281
11	Biological programs	286
	The Yale school	289
	Columbia P&S	295
	Jacques Loeb's disciples	300
	General physiology: Princeton and Stanford	307
	Harvard: styles of general biochemistry	313
