TABLE OF CONTENTS

Preface xi

COMPUTATION

J. Cannon
A Computational Toolkit for Finite Permutation Groups 1

W.M. Kantor
Note on Polynomial-time Group Theory 19

C.C. Sims
Coset Table Methods 23

USING THE CLASSIFICATION

M. Aschbacher
Subgroup Structure of Finite Groups 35

M. Hall, Jr.
Problems Reducible to those on Finite Simple Groups 45

M.E. Harris
Finite Groups with Exactly One p-block 49

M.W. Liebeck and J. Saxl
Some Recent Results on Finite Permutation Groups 53

M.E. O'Nan
Sharply 2-transitive Sets of Permutations 63

PROPERTIES OF K-GROUPS

R.L. Griess, Jr.
Schur Multipliers of the Known Finite Simple Groups, III 69

R. Lyons
Wielandt's Formula Implies Good Generation of Groups of Lie Type 81

G.M. Seitz
Overgroups of Irreducible Linear Groups 95

© Cambridge University Press www.cambridge.org

CAMBRIDGE

Cambridge University Press
978-0-521-09091-9 - Proceedings of the Rutgers Group Theory Year, 1983-1984
Edited by Michael Aschbacher, Daniel Gorenstein, Richard Lyons, Michael O'Nan, Charles Sims and Walter Feit
Table of Contents
More information

GROUPS AND ALGEBRAS

D. Frohardt
Toward the Construction of an Algebra for O'Nan's Group 107

K. Harada
Commutative Algebras Associated with Permutation Groups 111

LOCAL ANALYSIS

H. Bender
Nilpotent π-subgroups Behaving Like p-subgroups 119

D. Gorenstein
The Classification of N-groups: Test Case for a Revisionist Strategy 127

R. Solomon
Finite Groups of Small Non-even Type 147

AMALGAMS AND FINITE GEOMETRIES

A.L. Chermak
Automorphisms of Groves 153

P.S. Fan
Amalgams of Finite Groups and the Goldschmidt-Sims Conjecture 161

J.I. Hall
The Geometry of p-transvection Subgroups 167

W.M. Kantor
Finite Simple Groups via p-adic Groups 175

M.A. Ronan
Embeddings of Group Geometries and Modular Representations 183

P. Rowley
Amalgams and Pushing Up 189

B. Stellmacher
Rank 2 Groups 197

G. Stroth
Parabolics in Finite Groups 211

G. Stroth and S.K. Wong
Minimal Parabolic Systems Involving S_5 and S_3 225

F.G. Timmesfeld
Tits Geometries and Revisionism of the Classification of Finite Simple Groups of Char. 2-Type 229

R. Weiss
Fischer's Classification of Groups Generated by 3-Transpositions 243

© Cambridge University Press www.cambridge.org

REPRESENTATION THEORY

D. Benson
Some Recent Trends in Modular Representation Theory 249

P. Fong
Blocks of Representations of Classical Groups 261

P. Landrock
Modular Hecke Algebras 269

S.D. Smith
Modular Representations of Chevalley Groups 277

RIGIDITY AND GALOIS GROUPS

W. Feit
Rigidity and Galois Groups 283

M. Fried
On Reduction of the Inverse Galois Group Problem to Simple Groups 289

W. Feit, P. Fong, and B. Srinivasan
Rigidity of $SL_n(q)$ and Certain Subgroups for $(n,q-1) = 1$ and $n > 2$ 303

J.G. Thompson
PSL_3 and Galois Groups over Q 309

J.G. Thompson
Rational Rigidity of $G_2(5)$ 321

W. Feit and P. Fong
Rational Rigidity of $G_2(p)$ for any prime $p > 5$ 323

J.G. Thompson
Primitive Roots and Rigidity 327

W. Feit
Rigidity of $Aut(PSL_2(p^2))$, $p \equiv \pm 2 \pmod 5$, $p \neq 2$ 351

J.H. Walter
Classical Groups as Galois Groups 357

OTHER CONNECTIONS WITH NUMBER THEORY

R. Foote
Some Remarks on the Principal Ideal Theorem 385

G. Mason
Modular Forms and the Theory of Thompson Series 391
