

INDEX

- admissibility 78, 151–8
 strong 81
 admissible pair 285
 approximate identity 142
- boundary value problem 15, 192–8
 for abstract Volterra equations 198–203
- characteristic function 53
 coagulation process 273
 equation of 273
 comparison technique 110
 contraction mapping 37
- Dolph's theorem 59, 61
- eigenfunction 52
 eigenvalue 52
 multiplicity 54
- equation
 Abel's 1
 abstract Volterra 115–20, 125, 228
 adjoint 45
 coagulation process 273
 differential 13
 functional-differential 125
 Hammerstein 56, 151–70, 192
 infinite delay 127, 190
 integral Volterra 14, 21, 30, 95
 integrodifferential 192, 306
 of resolvent kernel 35
 parabolic 245
 perturbed 111–15
 Volterra Hammerstein 26
- fixed point theorem
 contraction mapping 37
 Leray–Schauder 92, 171
 Schauder–Tychonoff 89
- Fredholm alternative 45
 equation 3, 41, 43
 theory 41–52
- function space
 $AP(R, \mathcal{C}^n)$ 70
 $BC([t_0, T], R^n)$ 69
 $C([t_0, T], R^n)$ 64
 $C([t_0, T], R^n)$ 65
 $C_0([t_0, T], R^n)$ 70
 $C_\theta([t_0, T], R^n)$ 38, 66, 67
 $C_t([t_0, T], R^n)$ 69
 $C^{(1)}([t_0, T], R^n)$ 71
 L^p 71, 72, 74
 L^p_θ 72
 L^p_{loc} 75
 M, M^p 75
 M_0 76
 s 76
 $W^{1,1}$ 240
 Banach 73
 Fréchet 64
- generalized inverse 66
- Hilbert's theory 55
- integral inclusion 24, 212–19
 integral inequality 99
 inverse problem 21
- kernel
 adjoint 45
 associate 34
 resolvent 34, 35, 161–4
- $\mathcal{L}(R^n, R^n)$ 66
- mapping
 closed 213
 lower semicontinuous 213
 upper semicontinuous 213
 measure space 74, 170
 measure of noncompactness 228
 multivalued mapping
 weakly closed 214

- nuclear reactor
 - dynamics of 306
 - integrodifferential equations of 306, 325
 - asymptotic stability 327
- operator
 - abstract Volterra 78, 83, 84
 - angle-bounded 177
 - Carleman 230
 - causal 4, 84
 - coercive 91
 - hemicontinuous 91
 - integral 77, 81, 82
 - locally bounded 91
 - locally defined 86
 - monotone 91, 177
 - Niemytzki 78, 86, 171
 - nonanticipative 4, 84
 - weakly continuous 91
- optimal control
 - process 284
 - maximum principle 292–5
 - optimization problem 297
- population dynamics 28, 30
- semigroup
 - method of 26
 - nonlinear 245, 250
 - of operators 21, 236
 - resolvent of 237
 - singular perturbation 140–8
- solution
 - almost periodic 209–12
 - ϵ -approximate 226
 - continuable 99, 103, 104
 - continuous dependence 111
 - global 33, 261
 - local 33, 106
 - maximal 99–101
 - maximally defined 103
 - periodic 203–10
 - saturated 104
 - ultimate behavior 180–9
- variation of parameters formula 139, 140, 302
- viscoelasticity 27
- Volterra
 - abstract equation 115, 125, 225
 - equation 14, 21, 30, 95
 - operator 78, 84, 85, 325
