

Index

- A_1 , 46, 125
 a.c.c., 2
 $a.c.c.^+$, 27
 $a.c.c. \oplus$, 22
 adjoint (left), 123
 algebra of quantum mechanics, 125
 Amitsur–Littlewood domains, 6, 43, 50
 annihilator, 24
 annulet, 24
 Artinian module, xiv
 Artinian ring, xiv
 ascending chain condition, 2
 Auslander global dimension theorem, 121

 Baer's criterion, 83
 balanced module, xiv
 basis of a module, xiv
 Bass' global dimension two theorem, 78
 biendomorphism ring, xiv
 Boyle's conjecture, 116
 Boyle's theorem, 112

 Cartan–Brauer–Hua theorem, 118
 category, 122
 cogenerator, 85
 complement right ideal, 38
 completely injective module, 102
 constants of a derivation, 44
 contravariant functor, 123
 correspondence theorem for projective modules, 17
 covariant functor, 123
 cut-down proposition, 10

 d.c.c., 32
 degree of a differential polynomial, 43
 δ -invariant ideal, 44
 derivation, 42
 descending chain condition, 32
 differential module, 49
 differential polynomial ring, 43, 50

 direct sum, xiv
 direct summand, xiv
 division algebra, 118
 domain, xvii
 dual basis lemma, 9
 dual (categories), 37
 duality, 37

 endomorphism ring, xiii
 endomorphism ring and projective module theorem, 28
 endomorphism ring theorem, 1, 28
 epi, xiv
 epimorphism, xiii
 equivalence (functor), 123
 equivalence (map), 123
 equivalent categories, 123
 equivalent orders, 26
 essential extension, 20
 exact sequence, xv
 $\text{Ext}^1(-, -)$, 121

 Faith–Utumi theorem, 5, 67
 field, xvii
 filter, 114
 finite dimensional module, 22
 fir, 111
 flat module, 122
 free basis of a module, xiv
 Frobenius map, 95
 full (right) linear ring, 88
 functor, 123

 G -invariant subset, 51
 generator, 8
 global dimension, 121
 global dimension two theorem, 4, 41
 Goldie dimension, 22
 Goldie ring, 27
 Goldie–Lesieur–Croisot theorem, 65

 Hart's theorem, 28
 hereditary ring, 33
 hereditary ring theorem, 3, 33
 Hilbert basis theorem, xvi

- homological dimension of a module, 121
Hopkins–Levitzki theorem, 125
idealizer, 24
idempotent right ideal theorem, 2, 30
inner derivation, 42
injective hull, 84
injection, xiv
injective mapping, xiv
injective module, 83
- Jacobson domains, 6, 61
Johnson–Utumi maximal quotient ring, 21
Jordan–Weyl–Littlewood algebra, 125
- Krull dimensional ≤ 1 , 116
- lateral right ideal, 23
l.d.o., 43
least ideal theorem, 2, 25
left equivalent (\mathcal{L}) orders, 26
- map, 122
matrix units, 67
maximal equivalent (\mathcal{Q}) order, 27
maximal left equivalent (\mathcal{L}) order, 27
maximal order theorem, 3, 76
maximal rational extension, 21
maximal right equivalent (\mathcal{R}) order, 27
maximal submodule, xvi
maximum condition, xv
minimum condition, xvi
mono, xiv
monomorphism, xiv
Morita equivalent, 15
Morita invariant (property), 15
morphisms, 122
- natural isomorphism, xv
naturally equivalent functors, 123
neat ring, 99
nil right ideal, 64
Noetherian module, xv
Noetherian ring, xvi
- order, 72
Ore condition, 65
Ore domain, 27
Osofsky’s theorem, 99
- partial differential ring, 50
PCI-ring, 98
- pli-(pri-) domain, 6
Popesco–Gabriel theorem, 124
prime ring, xvii
primitive ring, 62
principal right ideal theorem, 5, 70
progenerator, 14
projective dimension of a module, 121
projective module, 9
projective module theorem, 2, 28
projective resolution of a module, 121
proper cyclic, 98
- q -field, 97
QI-ring, 116
quasi-injective module, 85
quoring, 26
quotient ring, 26
- rad (radical), xiv
rational extension, 20
reflexive ideal theorem, 4, 79
reflexive module, 50
regular ring, 83, 122
relative complement, 38
restricted (right) minimum condition, 116
 ρ -derivation, 52
right equivalent (\mathcal{R}) orders, 26
right order, 26
ring of linear differential operators, 43, 50
ring-1, xiii
Ritt algebra, 43
RRM, 116
- same centers theorem, 3, 26
Schauel’s lemma, 11
semihereditary ring, 101
semiprime ring, xvii
semisimple module, xvi
sequence, xv
short exact sequence, xv
 σ -cyclic module, 106
 Σ -cyclic module, 109
similar rings, 15
simple endomorphism rings theorem, 4, 29
simple localization, 6, 52
simple module, xvi
simple ring, xvii
single ideal theorem, 2, 26
singular ideal, 65
singular submodule, 20
skew polynomial ring, 52
