INDEX

425

- Dimensional rank dr , 378
 Dimensional weight dw , 404
 Directed family of coverings, 215
 Directed set, 1
 Discrete family, 11
 Discrete topology, 3
 Distributive lattice, 2
 Dominated space, by a covering,
 14
- Embedding, 7
 Envelopment, 391
 Equivalent bicomcompactifications, 43
 Equivalent pseudo-metrics, 77
 Euclidean n -space \mathbf{R}^n , 10
 Examples
 completely normal T_3 -space which
 is not totally normal, 33
 totally normal space which is not
 perfectly normal, 73
 strongly metrizable space which is
 not strongly paracompact, 84
 metrizable space which is not
 strongly metrizable, 86
 dimension of the unit interval, 113
 zero-dimensional normal space
 which is not weakly paracom-
 pact, 130
 zero-dimensional completely nor-
 mal space with an open subspace
 of positive dimension, 139
 dimension of a subspace of \mathbf{R} , 152
 dimension of the rational points
 in Hilbert space; a totally dis-
 connected space of positive di-
 mension, 153
 bicomcompact space for which the sub-
 set theorem does not hold for
 \dim or Ind , 161
 bicomcompact space S such that \dim
 $S = 1$ and $\text{ind } S = \text{Ind } S = 2$,
 165
 T_4 -space M such that $\dim M =$
 $\text{Ind } M > 0$ and $\text{ind } M = 0$, 203
 T_4 -space for which the subset
 theorem fails for local dimension,
 203
 T_4 -space Z such that $\text{ind } Z = 0$,
 $\dim Z = 1$ and $\text{Ind } Z = 2$, 208
 Tihonov space Y such that
 $\dim Y \neq \dim \beta Y$, 234
 T_4 -space X such that $\text{ind } X \neq$
 $\text{ind } \beta X$, 234
 metrizable space P such that
 $\text{ind } P = 0$ and $\dim P = 1$, 288
 bicomcompact space X such that
 $\text{ind } X = 2$ and $\text{Ind } X = 3$, 329
 zero-dimensional open mapping
 which lowers dimension, 348
 zero-dimensional spaces with pro-
 duct of positive dimension, 354
 Tihonov space Y such that
 $\dim Y \neq \dim Y$, 368
- Extension, 19
- Face of a simplex, 105
 Family of functions
 separating points, 40
 separating points from closed sets,
 40
 Filippov's example, 308ff
 Fine family of coverings, 216
 Finite intersection property, 35
 First-countable space, 82
 F -product, 357
 F_σ -set, 19
 G_δ -set, 19
 Generalized F_σ -set, 28
 Geometric realization, 106
 Greatest lower bound, 1
- Hausdorff space, 8
 Hedgehog $J(\tau)$, 86
 Hereditarily paracompact space, 73
 Hilbert cube, 88
 Hilbert space, 88
 Homeomorphism, 6
 local, 190
