- AB2 (axiom), 84, 88–9
 AB5 (axiom), 126–8
 abelian category, 90–5, 105–9, 112–13, 135–69
 acyclic object, 189
 acyclic sheaf, 225, 229
 additive category, 72–80, 83, 109–11, 149–50, 157, 161, 163–90
 additive functor, 109–14, 150, 159–69, 177–92, 217
 adjoint, conditions for functors to be, 27
 adjoint functor(s), 24–42, 56, 110–13, 120, 128–32, 164–7, 193, 204–5, 210–13, 215, 218–20; conditions for existence, 30–2, 49; left/right, 24, 26, 29; theorem, 62–3
 adjoint on the left/right, 30, 38–40
 adjoint situation, 28
 adjunction, 28
 augmentation ideal, 169

 Baer addition, 150
 balanced category, 84, 95
 Banach algebra, 38–42
 Banach space, 18
 base-point, 2
 base space, 194; change of, 208–15
 bicartesian square, 20, 95, 125–6
 bifunctor, 6, 138–9, 144, 150
 bimorphism, 66
 biproduct, 72, 75–9, 92–3, 109, 147–50
 boundary morphism, 170

 canonical, 7
 cartesian square, 18–21, 44–5, 48, 65, 80–1, 84–6, 93–5, 127, 130, 137, 139, 143, 151, 215;
 preservation of, 111
 category(ies), 1; equivalence of, 34–5, 163, 177, 205
 chain homotopy, 171
 class, distinction from set, 1–2, 135–6, 146, 156–7, 161
 cocartesian square, 18–21, 44, 47–8, 64, 81–2, 85, 93–5, 136–7, 139, 141–2, 153;
 preservation of, 111
 coequalizer, 46–9, 53, 64, 81, 86–7
 cogenerating family, 116
 cogenerator, 116–17, 119–21, 133, 219
 cohomology functor, 5
 cohomology group, 168

 cohomology module functor, 194, 225
 cohomology presheaf functor, 194, 225–8
 cohomology of sheaves, 224–8
 cokernel, 81–3
 comma category, 14, 61–2
 commutator subgroup, 4, 36
 compatible, 205–6
 complete category: inf/sup, 46; left/right, 46–53, 55–6, 60, 62–3, 126–8, 133, 188
 completion, 36–7
 complex, 98, 169–70; contractible, 171–2; left/right, 170–1
 concrete category, 4, 5, 66–7
 concrete sheaf of modules, 216–17
 concrete sheaves, 194–7, 200–6, 213–15; category of, 197
 connected sequence of functors, 158–69, 187–90; left, 160; right, 159
 connecting morphism, 102–4, 175–6
 constant presheaf, 204
 constant sheaf, 195, 213
 continuous functor, 53–63
 continuous, left/right, 53
 contracting homotopy, 171
 coproduct, 16; *see also* sum(s)
 coreflection, 34
 coreflective subcategory, 34, 38, 51–3, 212, 224

 décalage, 189, 192
 derived functor, 177–92, 225
 diagram, I-, 42–9
 difference kernel, 111
 differential morphism, 170
 dimension axiom, 227
 direct image of (pre)sheaf, 209–15, 219–21
 direct limit, 22–4, 126–8
 direct product, 15
 direct sum, 16, 72
 directed (preordered) set, 21
 directly equivalent, 139
 divisible group, 118–19
 domain of morphism, 3
 double dual functor, 7
 dual category, 3
 duality, 35
 dualizing functor, 5

 effaceable functor, 178–9
 effacement, 178
 eight-lemma, 99–102
