

Contents

Preface vii

- 1 General concepts 1
 - 1.1 Categories 1
 - 1.2 Functors 4
 - 1.3 Morphisms of functors 6
 - 1.4 Representable functors 9
 - 1.5 Products and sums 14
 - 1.6 Limits 21
 - 1.7 Adjoint functors 24
 - 1.8 Suprema and infima 42
 - 1.9 Continuous functors 53
- 2 Internal structure of categories 64
 - 2.1 Epimorphisms and monomorphisms 64
 - 2.2 Punctured categories 68
 - 2.3 Additive categories 73
 - 2.4 Kernels and cokernels 80
 - 2.5 Exact and abelian categories 83
 - 2.6 Exact sequences 96
 - 2.7 Functors preserving extra structure 109
 - 2.8 Special objects: projectives, injectives, generators and cogenerators 114
 - 2.9 Grothendieck categories 123
- 3 Homological algebra 135
 - 3.1 Extensions 135
 - 3.2 Connected sequences and satellites 158
 - 3.3 Derived functors 169
 - 3.4 Satellites and derived functors 178
- 4 Sheaves and their cohomology 193
 - 4.1 Introduction 193
 - 4.2 Concrete sheaves 194
 - 4.3 Presheaves 198
 - 4.4 The sheafification of presheaves 201
 - 4.5 Sheaves 205

Cambridge University Press

978-0-521-09525-9 - Introduction to Categories, Homological Algebra and Sheaf Cohomology

Jan R. Strooker

Table of Contents

[More information](#)*Contents*

- 4.6 Change of base space 208
- 4.7 A pseudo-categorical survey 215
- 4.8 Presheaves and sheaves of modules 215
- 4.9 Subspaces and sheaves of modules 221
- 4.10 Cohomology of sheaves 224
- 4.11 Flabby sheaves and cohomology 228
- 4.12 Soft and fine sheaves 231
