

INDEX

- Affine transformations, 5ff., 82, 116, 119
 Alexandroff-Fenchel inequalities, 101
 Approximation to convex sets, 67ff.
 Area, definition of surface, 88
 formula for, 89
 effect of symmetrization on, 90, 92, 94–6
 Asymmetry of convex sets, 115ff.
- Barycentric coordinates, 13–4
 Blaschke-Lebesgue theorem, 128–9
 Blaschke selection theorem, 64ff., 105–7, 114
 Bonnesen's isoperimetric inequality, 108ff.
- Carathéodory's theorem, 35ff.
 Cartesian, products 4, 7, 38
 Cauchy's formula for surface area, 89
 Central symmetrization, 101, 107
 Centre of a convex set, 78
 Centroid, 78, 82
 Circumsphere, 76, 111, 125
 Closure, 1, 7ff.
 Concave array, 81ff.
 Constant width sets, 122ff.
 Continuity, of convex functions, 46
 of mixed volumes, 87
 in space of convex sets, 72
 Convergence of sets, 60
 Convex cover, 21ff.; *see also* Carathéodory's theorem
 Convex functions, 45ff.
 Convex sets, definition, 3, 4
- Derivative, directional, 49
 Diameter, 23, 111, 123ff.
 Difference set, 101
 Dimension, 13
 Distance, of a point from a set, 2
 of sets, 60
 functions, 54ff.
 Duality, 25ff., 30, 33, 42, 54
- Exposed point, 24
 Extreme point, 21, 24, 29, 83
 support hyperplane, 27, 30
- Frontier, 1, 18, 20, 24, 27
 coordinates of, 56ff.
 regular points of, 31
- Gauge functions, 47
 Helly's theorem, 33ff.
 Horn's theorem, 43
 Hyperplanes, 2, 17ff.; *see also* Support hyperplanes
 Insphere, 76, 112, 125
 Interior, 1, 7ff.
 Intersections, 8, 17, 21, 23
 Isoperimetric inequality, 103ff.
- Kirchberger's theorem, 42
- Linear array, 79ff.
 of polytopes, 84
 symmetrization, 93
 Linear manifold $\mathcal{L}(\mathbb{X})$, 15, 17, 68
 Linearity vectors, 47, 58
- Mapping of convex sets, 5, 7, 31, 38
 Minimal width, 77, 90, 92, 112
 Minkowski's inequalities, 100, 104
 Mixed volumes, 82ff., 108
- Normal, 26
- Polar duality, 25
 Polytope, 29, 67ff.
 mixed volumes, 84ff.
 volume of, 74
 Projections, 12, 16, 22
- Radon, 33
 Regular, frontier points, 31, 32
 sets, 31, 67ff.
 support hyperplanes, 31, 32
 Relative frontier and interior, 15ff.
- Schwarz rotation process, 100
 Sections, 12ff.
 Separation, 3, 19–21
 Spheres, 2, 12, 17, 31
 Steiner symmetrization, 90ff., 98
 Support functions, 54ff.
 hyperplanes, 20, 24, 31
- Vector addition of sets, 2, 7, 79ff.
 domain, 101
 Volume, 2, 72ff., 90, 104
 mixed, 82ff.
- Width, 77
