Preface *page vii*

Chapter 1. GENERAL PROPERTIES OF CONVEX SETS

1	Preliminaries and notation	1
2	The definition of convexity and its relation to affine transformations	3
3	Intersections, closures and interiors of convex sets	7
4	Sections and projections of convex sets	12
5	The dimension of a convex set. Barycentric coordinates	13
6	Intersections of convex sets with hyperplanes	17
7	Separation of convex sets and support hyperplanes	19
8	The convex cover	21
9	Duality in Euclidean space	25
10	Convex polytopes	29
11	Continuous mappings of convex sets. Regular convex sets	31

Chapter 2. HELLY'S THEOREM AND ITS APPLICATIONS

1	Radon's proof of Helly's theorem	33
2	Carathéodory's theorem	34
3	The relation of Helly's theorem to Carathéodory's theorem	39
4	Kirchberger's theorem	42
5	Horn's extensions of Helly's theorem	43

*Chapter 3. GENERAL PROPERTIES OF
CONVEX FUNCTIONS*

1	The definition of a convex function; boundedness and continuity	45
2	The directional derivatives of a convex function	49
3	Differential conditions for convexity	51

vi	CONTENTS	
4	Planar convexity in terms of polar coordinates	page 53
5	The distance and support functions of a convex set	54
	<i>Chapter 4. APPROXIMATIONS TO CONVEX SETS. THE BLASCHKE SELECTION THEOREM</i>	
1	Classes of convex sets as metric spaces	59
2	The Blaschke selection theorem	64
3	Approximations by convex polytopes and regular convex sets	67
4	The volume of a convex set. Continuity	71
5	Sets and numbers associated with a convex set	76
	<i>Chapter 5. TRANSFORMATIONS AND COMBINATIONS OF CONVEX SETS</i>	
1	Linear and concave arrays of convex sets	79
2	Mixed volumes	82
3	Surface area	88
4	Steiner symmetrization	90
5	The Brunn-Minkowski theorem: the Minkowski and Fenchel-Alexandroff inequalities	96
6	Central symmetrization	101
	<i>Chapter 6. SOME SPECIAL PROBLEMS</i>	
1	The isoperimetric inequality	103
2	The isoperimetric inequality in \mathbb{R}^2	107
3	Relations between the inradius, circumradius, minimal width and diameter of a convex set	111
4	Plane convex sets	115
	<i>Chapter 7. SETS OF CONSTANT WIDTH</i>	
1	General properties	123
2	Plane sets of constant width	127
3	Minimal universal covers	131
	<i>Notes</i>	136
	<i>References</i>	139
	<i>Index</i>	141
