Subject index

Where two entries are shown in the index, this indicates that a second definition at a different level has been given. In particular, we indicate that the definition is framed in terms of metric spaces by use of the symbol (M), of topological spaces by (T), of real-valued functions of a real variable by (R), of complex-valued functions by (C), of functions of one real variable by (O), and of functions of several real variables by (S).

The reader's attention is drawn to the note printed in bold type on p. 22.

 trichotomy law 21
 trigonometric Fourier series 194
 trigonometric functions 164
 triple product: scalar 171; vector 172
 true 2, 3
 truth tables 1
 two-sided ideal 32
 two-sided inverse 15
- undecidable statement 3
 uniform bound 121
 uniformly bounded sequence 121
 uniformly continuous function: (M) 103; (R) 118; (C) 153
 uniformly convergent integral 148
 uniformly convergent sequence of functions 143
 union 9
 unique factorisation domain 33
 Unique Factorisation Theorem 213
 unit: left 17; right 17; ring with 30
 unit element 17, 75
 unit matrix 43
 unit morphism 95
 unitary group 92
 unitary matrix 92
 unitary space 92
 unitary transformation 92
 unity, roots of 166
 universal quantifier 4
 unknown 4
 upper bound 66; of poset 75
 upper central series 60
- value of function 13
 variable 3; bound 4; free 4
 variation, bounded; (O) 118; (S) 151
 vector 38; column 44; eigen 83;
 Euclidean 168; row 44
 vector field 173
 vector product 169
 vector space 38
 vector subspace 38,
 vector triple product 172
 vector-valued function 126
 void set 9
 volume 160
- Wallis's formulae 213
 weaker topology 106
 Wedderburn's Theorem 213
 Weierstrass' M -test 213
 well-ordered set 80
 well-ordering 80
 Well-ordering Theorem 214
 Wilson's Theorem 213
 winding number 158
 word 62
 word problem 63
- Zassenhaus' Lemma 206
 Zermelo–Fraenkel Axioms 213
 Zermelo's Well-ordering Theorem 214
 zero: complex 155; multiplicity of 57; of polynomial 56; simple 57
 zero divisors 31
 zero matrix 41
 zero morphism 96
 zero object 96
 Zorn's lemma 214
