

## CONTENTS

<b>Lecture 1</b> – Introduction. Plan of the lectures. Poisson structures	5
<b>Lecture 2</b> – Poisson Structures on Finite-dimensional Manifolds. Hamiltonian Systems. Completely Integrable Systems	11
<b>Lecture 3</b> – Classical Analogue of the Dirac Monopole. Complete Integrability and Algebraic Geometry	17
<b>Lecture 4</b> – Poisson Structures on Loop Spaces. Systems of Hydrodynamic Type and Differential Geometry	29
<b>Lecture 5</b> – Non-linear WKB (Hydrodynamics of Weakly Deformed Soliton Lattices)	45
<b>References</b>	57
