

INDEX

- Abrided notation, 41, 143, 151–7, 255–6
- Abscissa, 10
- Altitudes of a triangle, 4, 35
- Angle, between two lines, 46
 between lines of a line pair, 221
 bisectors, 49–50
- Apollonius, 21
- Archimedean trammel, 124, 216
- Area of a triangle, 51–2
- Astroid, 123–4
- Asymptotes, definition, 102–3
 of a hyperbola, 194
 of a rectangular hyperbola, 103
- Auxiliary circle, of an ellipse, 176, 185
 of a hyperbola, 192
- Axes, of coordinates, 9
 oblique, 10
 rotation of, 53–4
 translation of, 22
- Axes, of ellipse, 174
 of hyperbola, 191
 equation of conic referred to, 239–40
 equations of, for general conic, 240–5
 lengths of, 240–5
 major and minor, 174
 transverse and conjugate, 191
- Axis, of parabola, 65
 radical, 151–3
- Bisectors, of angle between two lines, 49–50
 of angle between lines of a line pair, 222
- Calculus, 8, 66, 123 *et seq.*
- Cardioid, 125, 267
- Cartesian coordinates, 10
- Central conic, 198–207, 239–46
- Centre, of circle, 134
 equation of circle referred to, 133
 of conic, 238–9
- Centroid, 3, 17
- Ceva, 5, 18
- Change, of axes, 22, 53
 of origin, 22
- Chord, common to two circles, 143–4
 of ellipse, 177–8
 of hyperbola, 193
 of parabola, 67, 68
 of rectangular hyperbola, 101
- Chord of contact, of circle, 128
 of ellipse, 200
 of hyperbola, 200
 of parabola, 70
 of rectangular hyperbola, 104
- Chords, locus of mid-points of parallel, 106, 205, 249
- Circle, *ch. v*
 centre, 134
 chord of contact, 138
 coaxial, 153–8
 equation of, 134
 length of tangent to, 142
 line touching, 141
 nine-point, 4, 43
 of Apollonius, 21
 on given diameter, 141
 point-circle, 134
 power of a point, 142
 radius, 134
 tangent to, 137
- Circumcentre, 3, 43
- Circumcircle, 3, 76
- Cissoid, 118–19
- Coaxial circles, 153–8
- Collinear points, 44
- Concurrent lines, 45
- Concyclic points, on ellipse, 183
 on parabola, 149
 on rectangular hyperbola, 150
- Confocal conics, 258–60
- Conic, central, 198–207, 238–46
 centre of, 238
 condition for a line to touch, 198
 confocal, 258–60
 definitions of, *ch. x*, 269–72
 eccentricity, 240
 equation in standard form, 239–40
 section, 269
- Conjugate, axis of hyperbola, 191
 diameters, of ellipse, 204–6; of hyperbola, 204–7; of rectangular hyperbola, 106
- Conjugate hyperbola, 194
- Conormal points, on ellipse, 180
 on parabola, 88
 on rectangular hyperbola, 105

- Coordinates, Cartesian, 9
 polar, ch. ix, 265–8
- Cubic, curves, ch. ivb, equation, 3
- Curve, cubic, ivb
 tangent to, 109, 112, 114
 with cusp, 110–13
 with double point, 108–10
 with inflexion, 113–14
- Cusp, 111
- Cycloid, 124–5
- Deltoid, 126
- Descartes, 10, 120, 125
- Determinants, evaluation, 1
 properties of, 2
 used, 32, 40, 44, 45, 52, chs. vii, viii
- Diameter, circle on given, 141
 conjugate, of ellipse, 204–6; of
 hyperbola, 204–7
- Diocles, 118
- Director circle, 187, 199–200, 254
- Directrix, of ellipse, 173
 of hyperbola, 191
 of parabola, 63
- Distance, between two points, 12–13
 focal, 175, 192
 from origin, 14
 perpendicular of point from line,
 47–9, 51
- Double point, 108, 110
- Eccentric angle, 176, 193
- Eccentricity, 173, 190, 240
- Ellipse, ch. vi
 auxiliary circle, 176, 185
 centre, 174
 chord, 177–8
 chord of contact, 200
 concyclic points, 183
 condition for line to touch, 198
 conjugate diameters, 204–6
 conormal points, 180
 director circle, 187, 199–200
 directrix, 173
 eccentric angle, 176
 eccentricity, 173
 foci, 173
 geometrical properties, 183–9
 intersection of tangents, 201
 latus rectum, 174
 methods of drawing, 215–18
 normal, 178
 parametric form, 176
 principal axes, 174
 (p, r) equation, 186
 tangent, 178
- Equal roots, 2
- Equal and opposite roots, 2
- Equation, of a locus, 18
 freedom, 32
 parametric, 32
 theory of, 2
- Escribed circles of a triangle, 4
- Euler line of a triangle, 43
- Evolute, 122–3
- Excentres of a triangle, 4, 50
- External division, 16
- Focal chord, 77, 79
 distance, 175, 192
 properties, of ellipses, 184–9; of
 parabola, 77, 79
- Focus, of ellipse, 173
 of hyperbola, 191
 of parabola, 63
- Folium of Descartes, 120
- Foot of perpendicular, 76, 185
- Form of equation, of line, 27
 of circle, 134
- Freedom equations of line, 32
- Gradient of line, 25
- Graph, 11
- Hyperbola, ch. vi
 asymptotes, 194
 auxiliary circle, 192
 branches, 191
 centre, 191
 chord, 193
 chord of contact, 200
 condition for line to touch, 198
 conjugate diameters, 204–7
 director circle, 199–200
 directrix, 191
 eccentric angle, 193
 eccentricity, 190
 foci, 191
 geometrical properties, 194
 latus rectum, 191
 methods of drawing, 218–19
 normal, 193
 parametric form, 192–3
 principal axes, 191
 rectangular, *see* Rectangular hyper-
 bola

- Hyperbola (*cont.*)
tangent, 193
Hypocycloid, 124
- Incentre, 4, 50
Incircle, 4
Inflexion, 114
Initial line, 265
Inspection, method of, 41, 143, 225
Intercept, form of line, 30
theorem, 16
Internal division, 16
Intersecting chord property, 15
Intersection, of lines, 39–41
lines through intersection of a line
and a conic, 225
Invariants, $a + b$ and $ab - h^2$, 236–7
Inverse points, 159
Inversion, 159–63
- Joachimsthal, ratio equation, 250
Join of two points, 30
- Latus rectum, of ellipse, 174
of hyperbola, 191
of parabola, 66
Lemniscate, 122, 268
Length of perpendicular, 47–9, 51
Limiting points, 155
Line, ch. II
angle between two lines, 46
concurrent lines, 45
determinantal form, 32, 44
distance of a point from, 47–9,
51
gradient, 25
gradient form, 29
gradient-intercept form, 30
intersection of two lines, 39–41
intercept form, 30
joining two points, 30
normal form, 31
parallel lines, 26
parallel to axes, 27
parametric form, 31
perpendicular distance to a line,
47–9, 51
perpendicular lines, 26
standard form, 27
Linear equation, 27
Line pair, ch. VII
angle between, 221
angle bisectors, 222
condition for general quadratic to
represent, 226–30
joining origin to intersections of a
line and a conic, 225
through the origin, 220
Locus, equation of, 18
how to find, 80
- Major axis of ellipse, 174
Maxima and minima, 242
Medians, 3
Menelaus' theorem, 5, 18
Methods of drawing, ellipse, 215–18
hyperbola, 218–19
parabola, 97–8
Mid-point, 17, 86, 106, 205, 249
Minor axis of ellipse, 174
- Nine-point circle, 4, 43
Normal, form of equation of line, 31
to ellipse, 178
to hyperbola, 193
to parabola, 67
to rectangular hyperbola, 101
- Oblique axes, 10
Order of an algebraic curve, 108
Ordinate, 10
Origin, 9, 22
Orthocentre, 4, 42
Orthogonal circles, 143
- (p, r) equation, of ellipse, 186
of parabola, 77
Parabola, ch. III
axis, 65
chord, 67, 68
chord of contact, 70
concyelic points, 149
condition for line to touch, 71
conormal points, 88
directrix, 63
focal properties, 76–8
focus, 63
geometrical properties, 74–8
intersection of tangents, 70
latus rectum, 66
locus problems, 80–4
methods of drawing, 97–8
mid-points of parallel chords, 86–7
normal, 67–8
 (p, r) equation, 77
parametric form, 66

- Parabola (*cont.*)
 polar line, 70
 tangent, 67
 vertex, 65
- Parallel chords, of ellipse, 205
 of parabola, 86
 of rectangular hyperbola, 106
- Parallel lines, 26
- Parameter, curves defined by, ch. iv
 definition, 31
 on a circle, 135–6
 on an ellipse, 176–7
 on a hyperbola, 192–3
 on a line, 31
 on a parabola, 66
 on a rectangular hyperbola, 99
- Pencil of conics, 255–8
- Perpendicular, bisector, 3
 distance of a point from a line,
 47–9, 51
 lines, 26
- Point, ch. i
 condition for three to be collinear, 44
 coordinates of, 9
 distance between two, 12
 dividing a line in a given ratio, 15
 locus of, 18
 perpendicular to a line, 47–9, 51
- Point-circle, 134
- Polar coordinates, ch. ix, 265–8
- Polar line, 70, 104, 252
- Pole, 252, 265
- Power of a point with respect to a
 circle, 142
- Principal axes, of central conic, 240–5
 of ellipse, 174
 of hyperbola, 191
- Projectile, 68
- Pythagoras, 14
- Quadrants, 11
- Quadratic equation, 2, 11
 condition to represent a line pair,
 226–30
 form, 134
- Quartic equation, 3
- Radical axis, 151–3
 centre, 158
- Radius of circle, 134
 of inversion, 160
- Ratio formula, 16
- Rectangular coordinates, 10
- Rectangular hyperbola, ch. iv A, 195–6
 asymptotes, 103
 centre, 99
 chord, 101
 chord of contact, 104
 concyclic points, 150
 condition for a line to touch, 104
 conjugate diameters, 106
 conormal points, 105
 diameter, 99
 normal, 101
 orthocentre property, 105
 polar line, 104
 tangent, 101
- Rhombus, 76
- Rotation of axes, 53–4
- Semicubic parabola, 123
- Sign, of coordinates, 9
 of distance, 9, 12, 15
 of $ax + by + c$, 36
- Simson line, 4, 76, 126
- Slope (gradient), 25
- Straight line, *see* Line
- Strophoid, 119
- Subnormal, 77
- Symmetric functions of roots, 2
- Tangent, length, 142
 mnemonic for equation of, 138
 to circle, 137
 to ellipse, 178
 to general conic, 252
 to hyperbola, 193
 to parabola, 67
 to rectangular hyperbola, 101
- Tangential properties, of central
 conic, 198–201
 of parabola, 69–71
- Trammel, Archimedean, 124, 216
- Translation of axes, 22
- Transverse axis, of hyperbola, 191
- Triangle, area of, 51–2
 properties of, 3
- Trigonometry, 7, 8
- Vertex of parabola, 65
- Virtual circle, 134
- Wallace's theorem, 163
- Witch of Agnesi, 121
- x and y axes, 11
