

INDEX

- adjoint linear operator, 77
 analytic functions, 271
- barriers, 180
 boundary value problems, 45, 175, 193
- Cauchy, problem of, 24, 44, 58
 Cauchy and Kowalewsky, theorem of, 26, 244
- characteristics, 2, 28, 47
 characteristic base curve, 25
 characteristic strips, 6, 30
 classification of second order equations, 34, 39
 complex variable, use of, 165
- descent, Hadamard's method of, 95
 Dirichlet
 boundary value problem of, 45, 175, 193
 principle of, 144
 divergent waves, 200
 dominant functions, 271
- elementary solution of Hadamard, 189, 198
 elliptic type, equations of, 16, 19, 34, 186, 207
 Euler, Poisson and Darboux, equation of, 98
 existence theorem
 for the equation of heat, 249
 for Laplace's equation, 175
- first order equations, 1
 systems of, 11, 14
 Fourier series
 summability of, 275
 use of, 71, 155, 165
 Fourier transforms, use of, 240
- Gauss, mean value theorem of, 141, 214, 222
 Green's equivalent layer, 133, 214
 Green's function, 146, 150, 169, 216
 Green's theorem, 273, 274
- Hadamard's method of descent, 95
- harmonic functions
 in the plane, 139
 in space, 212
 harmonics, spherical, 210
 Harnack, theorems of, 158, 159, 161
 heat, equation of, 50, 238
 Helmholtz, formula of, 227
 hyperbolic type, equations of, 16, 19, 34, 54
- Lagrange, linear first order equation of, 1
 Lagrange and Charpit, method of, 7
 Laplace, equation of, 131, 207
 Laplace transform, use of, 242
- maximum principle for harmonic functions, 143
 mean value theorem, 141, 214, 222
- Neumann, problem of, 156, 167, 193
 normal form of a second order equation, 33–42
- parabolic type, equations of, 16, 34, 50, 238
 Perron and Remak's solution of Dirichlet's problem, 175
 Picard's method, 59
 Poisson's integral, 153
 potential theory, 131, 207
- radiation condition of Sommerfeld, 201, 229
 reduced wave equation, 222, 225
 regular arc, 272
 regular closed curve, 272
 regular closed surface, 273
 Riemann, method of, 77
 Riemann–Green function, 79, 81
 Riesz, method of Marcel, 107
- second order equations, 24
 classification of, 34, 39
 normal form of, 33–42
 self-adjoint linear operator, 78
 spherical harmonics, 210
 subharmonic functions, 175
