978-0-521-10243-8 - Measurement Theory: With Applications to Decisionmaking, Utility, and the Social Sciences

Fred S. Roberts

Index

[More information](#)

Subject Index

- Absolute difference model, 236
- Absolute scale, 64
 - narrow sense, 79
- Act, 307, 382
 - finite, 382
- Addition operation, role of, in measurement, 5, 131, 213–214
- Additive conjoint measurement, 384 (*see also* Conjoint measurement)
- Additive conjoint structure, 218–219, 312
 - equally spaced, 223
- Additive difference model, 235, 238
- Additive representation, when it does not apply, 232 (*see also* Utility function, additive; Conjoint measurement)
- Additivity, 5, 131, 210–214, 222
 - non-additivity, 232–238
- Admissible transformation (of scale), 58, 64
 - alternative definition, 69
 - if there is no representation, 180
 - narrow sense, 78
 - wide sense, 78, 165
- Air pollution, measurement of, 87–91, 94–95
- Air quality, measurement of, 50, 64, 65
- Algebra of subsets, 370
- Algebraic difference measurement, 135, 189 (*see also* Difference measurement)
- Algebraic difference structure, 134–139, 277
 - defined, 138
 - equally spaced, 145
- Algebraic theories, 7
- Allais Paradox, 327–329, 358, 361, 362
- Alternative budgets for government support of the arts (*see* Arts)
- Anomalous pair, 133
- Apparent length, measurement of, 157, 173
- Archaeology, 255, 258, 270
- Archimedean axiom (condition, property), 123, 127, 138, 216–217, 221, 228, 399
- Archimedean ordered group, 123
- Arithmetic mean, 81–84, 91, 377
- Arts, alternative budgets for government support of, 248, 249, 250, 251, 276, 285
- Associativity, 122
 - weak, 127
- Attitude scaling, 184–185
- Auditory perception, 198, 212
- Axiom A, 400
- Axiom of Choice, 116
- Axioms
 - descriptive, 3, 4, 102, 309
 - normative, 3, 4, 102, 309
 - prescriptive, 3, 4, 102, 309, 325
- Balance of trade, 214–215
- Basic reference lottery ticket (brlt), 322–325, 327, 328, 329
- Bay Area Pollution Control District, 90, 98
- Beaufort wind scale, 76
- Betweenness, 242 (*see also* ϵ -betweenness)
- Binary choices, beyond, 290
- Birkhoff-Milgram Theorem, 111–116, 206, 208, 233, 234
 - stated, 112
- Birthday problem, 374
- Bisection, 131, 134, 145
- Bisemiorder, 272
- Bisymmetry, 134
- Blood sugar level, 207
- Blood bank, utility function for, 342
- Borda count, 297–298
- Bounded component, 342 (*see also* Standard sequence, strictly bounded)
- Bradley-Terry-Luce system, 282
- Bradstreet and Dutot index, 84
- Brier score, 379
- Brightness, measurement of, 64, 65, 69, 131, 157, 179, 182, 183
- Bril, 64, 157
- British Association for the Advancement of Science, 5, 11, 180, 194
- Brlt (*see* Basic reference lottery ticket)
- Carli, 92
- Cartesian product, 13
- Cauchy equations, 159–164, 231

- Certainty, 6
 degree of, 372
- Certain event, 369
- Characteristic function, 393
 extended, 395
- Choice, 307, 382
 of best element, 8
 beyond binary, 290
 binary, 290
 finite, 382
 simple, 8
- Chronological order, 255
- Classification, 2 (*see also* Nominal scale)
- Closure, 122
- Color vision, 353
- Commodity bundle, 197, 206–210, 221 (*see also* Market basket)
- Commutative operation, 124
- Comparability graph, 271
- Comparative probability relation, 373, 386
- Compatibility between a weak order and a binary relation (a semiorder), 255–258
 defined, 258
- Compatible weak order, 288, 289
- Complement, 270
 symmetric, 271
- Composition rule, 232
 distributive, 233
 dual distributive, 237
 multiplicative, 237
 polynomial, 234
 product, 232
 simple polynomial, 237
- Compound interest, 176
- Condorcet's paradox, 119
- Conjoint measurement, 210–232
 additive, 211, 235
 conditions necessary and sufficient for, 213, 224–226
 conditions sufficient for, 213, 215–222
 defined, 211
 equally spaced, 222–224
 nonsimple distributive, 238
 polynomial, 232–235, 383
 semiordered version of, 265, 268
 uniqueness result for, 219, 230
- Consequence, 307
 utility of, 307
- Consistent relational system, 239
- Consumer confidence, 92–94
 index of, 84, 177–178
- Consumer price index, 84–86, 91, 177–178
 (*see also* Laspeyres price index, Paasche price index)
- Consumer spending, 86, 87
- Continuity, 208, 209, 321, 343
- Contrapositive, 21
- Converse of a relation, 17
- Coombs scale, 240
- Cosets, method of, 44
- Countable set, 109
- Counting, 64
- Cross-modality matching, 182–184
 matching relation of, 188
 measurement axiomatization of, 186–193
- Cross-modality ordering, 188–189
- Curricular codes, 64, 66
- Dallas library system, relative importance of objectives for, 24, 117–118, 266
- Decibel, 150
- Decisionmaking, xix, xx, 5–6
 group, 6, 118–119, 273, 297–298, 377–379
 individual, 6
 under risk or uncertainty, 305–368
 using the EU Rule and Hypothesis, 312–335
- Decomposability, 232–235
 non-decomposability, 235–236
- Decomposable relation, 232
- Decreasing marginal utility, 185 (*see also* Utility, marginal)
- de Finetti axioms, 386–389, 390, 391, 394, 399
 defined, 388
- Degree
 of certainty, 372
 of conviction, 372
 of hazard, 90
 of precision, 138
- Dense set, 112
- Density, measurement of, 3, 76, 77, 78, 79, 232
- Denumerable set, 109
- Department of Public Health, State of California, 152, 194
- Derived measurement, 2, 3, 49, 76 ff., 174, 274
- Derived scale, 77
- Descriptive axioms (rules), 3, 4, 102, 309
- Deterministic theories, 7
- Developmental psychology, 270
- Diagonal vector, 208
- Difference measurement, 134–146, 189
 algebraic, 135, 189
 necessary and sufficient conditions for, 139

Subject Index

413

- sufficient conditions for, 139
- uniqueness theorem for, 141
- Difference scale, 66
- Difference structure, equally spaced, 145
- Dimension
 - of interval order, 268
 - of semiorde, 268
 - of (strict) partial order, 39–40, 202–203, 271
- Dimensional parameter, 76–77, 79, 165, 174
