978-0-521-10365-7 - Plant Growth: Interactions with Nutrition and Environment

Edited by J. R. Porter and D. W. Lawlor

[Table of Contents](#)[More information](#)

## CONTENTS

<i>List of contributors</i>	ix
<i>Preface</i>	xi
<b>Concepts of nutrition in relation to cellular processes and environment</b>	
D.W. LAWLOR	1
<b>Nutrient compartmentation in cells and its relevance to the nutrition of the whole plant</b>	
R.A. LEIGH and R. STOREY	33
<b>Nutrients and photosynthesis: iron and phosphorus as case studies</b>	
N. TERRY and I.M. RAO	55
<b>The comparative ecophysiology of plant nitrogen metabolism</b>	
G.R. STEWART	81
<b>Concepts of nutritional and environmental interactions determining plant productivity</b>	
B. MARSHALL and J.R. PORTER	99
<b>Plant-soil relationships: acquisition of mineral nutrients by roots from soils</b>	
H. MARSCHNER	125
<b>Ecophysiological aspects of nutrition</b>	
I.H. RORISON	157
<b>Strategies for optimising growth in response to nutrient supply</b>	
D. ROBINSON	177

viii

CONTENTS

<b>Pollution, nutrition and plant function</b>	
R.F. HUETTL and S. FINK	207
<b>The role of nitrogen in yield formation and achievement of quality standards in cereals</b>	
J.J.R. GROOT and J.H.J. SPIERTZ	227
<b>Nutrition, environment and plant ecology: an overview</b>	
J.P. GRIME	249
<i>Index</i>	268
