| Abacus | 78 | _____ characterizes S_n | 72–75 |
| Alternating group | 7 | Clifford theory | 65, 154 |
| _____, ambivalent | 12 | Column equivalence | 174, 323 |
| _____, conjugacy classes | 12 | Commutator | 7 |
| Alternating representation | 6, 17 | Compatible | 167 |
| Ambivalent | 11, 144 | Complete monomial group | 138 |
| Amitsur-Levitski theorem | 197 | Composition | 46, 172 |
| Antisymmetric part | 191 | Conjugacy class of A_n | 12 |
| Arm of hook | 55 | _____ of $G \text{ wr } S_n$ | 138–146 |
| Associated partition | 22 | _____ of S_n | 11 |
| Associated representations | 65, 155 | _____ order | 14 |
| Associates, Theorem of | 201, 214, 220 | Conjugator, standard | 13 |
| Axial distance | 123 | Constituent | 266 |
| | | Content | 89, 166 |
| Base group | 133 | Corner of hook | 55 |
| Basis, natural | 130 | Cup operation | 177 |
| _____, orthogonal | 128 | Cycle | 3 |
| _____, seminormal | 109–114, 310 | _____’s, disjoint | 4 |
| _____, semistandard | 325 | _____ index | 170–173 |
| _____, standard | 303 | _____ notation | 5 |
| Basis of Specht module | 303 | _____ order | 4 |
| _____ Weyl module | 325 | _____ partition | 10 |
| Bead configuration | 79 | _____ product | 139 |
| Bell number | 228 | _____ type | 10 |
| β -number | 77 | Cyclic permutation | 3 |
| Bilinear form | 297, 330, 331 | Cyclically permuted points | 3 |
| Branching theorem | 59 | | |
| Brauer’s second Main Theorem | 247 | de Bruijn’s Lemma | 175 |
| Brauer tree | 268 | de Bruijn-type problem | 165 |
| | | Decomposition matrix | 244, 265–292, 300 |
| Cap operation | 177 | _____, generalized | 246 |
| Cartan matrix | 253 | Defect group | 262–265 |
| Cauchy-Frobenius Lemma | 164, 168 | Defect of a block | 262 |
| Centralizer | 135 | _____ a class | 262 |
| _____ order | 14 | Degree of permutation | 1 |
| Character, of $G \text{ wr } S_n$ | 155–160 | _____ of permutation group | 1 |
| _____ permutation | 228 | Depth | 99, 234 |
| _____ ring | 39 | Derivation | 328 |
| _____ values | 60 | Determinant of a Gram matrix | 313, 314 |
| Character table of A_n | 14, 67 | _____ module | 326 |
| _____ S_n | 15, 39, 52, 60 | Determinantal form | 45, 52 |
| _____ $G \text{ wr } S_n$ | 144, 155–160 | Diagonal subgroup | 134 |

508	Index
Diagram	22
———, associated	22
——— lattice	27
———, self-associated	22
——— skew	63
Difference product	5
Dimension of representations	43, 56, 107
———, lowest in A_n	71
———, lowest in S_n	61
Disjoint cycles	4
Dissection	16
Dominance order	23
Double coset	17
Duality Theorem	203
Enumeration	163–184
Even permutation	7
Exponentiation	137
Exponentiation group enumeration theorem,	
constant form	165
weighted form	169
Faithful representation	38
First column hook lengths	76
Foot of a hook	55
Form, natural	131
———, orthogonal	127
———, seminormal	114, 124, 310
Foulkes's conjecture	227
Gale-Ryser Theorem	27, 37, 45
Garnir element	301
Gaussian coefficient	225
——— polynomial	226
Generalized cycle index	171
——— decomposition numbers	246
——— skew tableau	89
——— symmetric group	159
——— wreath product	174
——— Young tableau	89
Generating function	20, 41
Generator of Weyl module	334
Generators of S_n	5
Gram matrix	297
——— determinant	313, 314
——— rank	306, 336
Graphs, nonisomorphic	164
Group reduction function	171
Hand of a hook	55
Homogeneous component	185
Hook	55, 306–317
arm	55
corner	55
foot	55
hand	55
leg	55
leg length	56
length	56
main	67
Horizontal group	29
Hyperalgebra	331–334
Ideal, minimal left	106, 109
Idempotent	30, 106
Identity representation	17
Improper partition	15
Inertia group	152
Inertia factor	152
Inner tensor product	95–99
Inventory, pattern	168
Irreducible representation of A_n	66
——— of $GwrH$	146–155
——— of $GwrS_n$	156
——— of $GL(m, \mathbb{C})$	195
over \mathbb{C}	195
——— of $GL(m, F)$	334–341
over F	37, 298, 299
——— of S_n	37, 298, 299
Irreducible Specht modules	316
——— $GL(m, F)$ -module	336
——— \bar{U}_F -module	336
Kind of representation	210
k -fold transitive	228
Kostant \mathbf{Z} -form	331
Ladder	281
Last letter sequence	107
Lattice, diagram	27
Lattice permutation	90
Left ideal, minimal	106, 109
Leg of hook	55
Leg-length	56
Length of hook	56
Lexicographic order	23
Littlewood-Richardson rule	93
Mackey's intertwining number theorem	17
Main hook	67
Mathieu group	227, 237
M -group	160
Multiplicative weights	167
Multiplicity	266
Multiply transitive groups	227–237

Index			509
Murnaghan-Nakayama formula	60	<i>p</i> -irregular	249
_____ for skew diagrams	64	Place permutation	148
Nakayama's Conjecture	245–250, 309	Plethysm	218–227
Natural basis	130	Points	2
_____ form	131	Pólya-insertion	170
_____ representation	54	Pólya's theorem, constant form	164
_____ unit	130	_____, weighted form	170
Neighbors	24	Pólya-type problem	164
Nodes	22, 55	Polytabloid	295
Normalizer	137	_____, standard	303
Numbered bead configuration	80	Power	137
Odd permutation	7	Power group enumeration theorem,	
Order of centralizer	14	_____ constant form	165
_____ of conjugacy class	14	_____, weighted form	169
_____ of cycle	4	<i>p</i> -regular class	241
_____, dominance	23	_____ component	206, 245
_____ of element in $G \text{ wr } S_n$	144	_____ partition	241
_____, lexicographic	23	<i>p</i> -singular component	255
_____ of permutation	14	<i>p</i> -weight of a block	254
Ordinary representation	34	_____ of a partition	80
Orthogonal basis	128	_____ of a permutation	255
_____ form	127	<i>q</i> -content	86
_____ unit	128	<i>q</i> -core	76, 79
Outer product of representations	45	<i>q</i> -diagram, star	85
Outer tensor product	44	<i>q</i> -hook	75
Part, antisymmetric	191	_____, rim	75
_____ of partition	9	<i>q</i> -quotient	83, 85
_____, symmetric	191	<i>q</i> -residue	84
Partition	9	<i>q</i> -weight	80
_____, associated	22	<i>r</i> -cycle	3
_____, improper	15	Redfield	173, 177, 180
_____, parts of	9	Redfield's Decomposition Theorem	181
_____, proper	9	Redfield's Enumeration Theorem	178
_____, self-associated	22	Representation, alternating	6, 17
_____, split	67	_____, faithful	38
Pattern	168	_____, identity	17
_____ inventory	168	_____, irreducible of A_n	66
<i>p</i> -block	244, 245	_____ S_n	37, 298, 299
<i>p</i> -component	245	_____ $G \text{ wr } H$	146–155
<i>p</i> -core	76, 79, 245	_____ $G \text{ wr } S_n$	156
Permutation	1	_____ of $GL(m, \mathbb{C})$ over \mathbb{C}	195
_____ character	228	_____ of $GL(m, F)$ over F	334–341
_____ degree	1	_____, modular	240
_____, even	7	_____, natural	54
_____ group	1	_____, ordinary	34
_____, odd	7	_____, regular	36
_____, order of	14	_____, simple-phase	212
_____, place	148	_____, skew	64
_____, sign of	6	Representing matrices	115–131
Permutrization	202–218	Restriction to S_{n-1}	59, 118
_____, character of	203	Rim <i>q</i> -hook	75
		<i>r</i> -inducing	271

510	Index		
Roots of elements	208–211	_____ operators	192
Row equivalence	41, 323	Tableau	28
r -restricting	276	_____, generalized	89
Ruch-Schönhofer-Theorem	27, 45	_____, generalized skew	89
Schur function	172, 326	_____, semistandard	89
Self-associated partition	22	_____, skew	89
_____ Young diagram	22	_____, standard	107
Seminormal basis	109–114	Tabloid	41, 295
_____ form	114, 124, 310	Tensor power	146
_____ unit	110	Tensor product, inner	95–99
Semistandard	89	_____, outer	44
_____ basis	325	Transitive, multiply	228
S -function	172, 326	Transposition	4
Sign of permutation	6	Trivial intersection property	20
Similar subgroups	2	Two-sided ideal, simple	109
Simple phase group	212	Type	10, 139, 152
_____ representation	212	Unimodal	226
_____ two sided ideal	109	Unit, natural	130
Skew diagram	63	_____ orthogonal	128
_____ representation	64	_____ seminormal	110
_____ tableau	89	u -number	256–261
Specht module	296–306, 341–346	_____ orthogonality relations	260
_____ basis	303	Vertical group	29
_____, irreducible	316	Weight functions	167
Split partition	67	Weight of a block	254
Splitting field	37, 160	_____ of a partition	80
_____ for $GwrH$	160	_____ of a permutation	225
Standard basis	303	Weyl group	138, 221
_____ conjugator	13	Weyl module	321–346
_____ polynomial identity	197	_____ basis	325
_____ polytabloid	303	_____ generator	334
_____ tabloid	304	Wreath product	133
_____ Young tableau	107	_____, generalized	174
Star q -diagram	85	Young	15, 101, 126, 129
Stirling number	231	_____ diagram	22
Sylow subgroups	137	_____ generalized tableau	89
Symmetric group	2	_____’s rule	51, 88, 89
_____, generalized	159	_____ subgroup	16
Symmetric part	191	_____ tableau	28
Symmetrization	184–201, 336		
_____, character of	187		
_____, dimension of	188		
_____, existence of	197		
Symmetry class	192
