THE SERIES

- 1 V. B. WIGGLESWORTH. The Physiology of Insect Metamorphosis
- 2 G. H. BEALE. The Genetics of *Paramecium aurelia*
- 3 G. V. T. MATTHEWS. Bird Navigation. 2nd edition
- 4 A. D. LEES. The Physiology of Diapause in Arthropods
- 5 E. B. EDNEY. The Water Relations of Terrestrial Arthropods
- 6 LILIAN E. HAWKER. The Physiology of Reproduction in Fungi
- 7 R. A. BEATTY. Parthogenesis and Polyploidy in Mammalian Development
- 8 G. HOYLE. Comparative Physiology of the Nervous Control of Muscular Contraction
- 9 J. W. S. PRINGLE. Insect Flight
- 10 D. B. CARLISLE and SIR FRANCIS KNOWLES. Endocrine Control in Crustaceans
- 11 DAVID D. DAVIES. Intermediary Metabolism in Plants
- 12 W. H. THORPE. Bird-song
- 13 JANET E. HARKER. The Physiology of Diurnal Rhythms
- 14 J. E. TREHERNE. The Neurochemistry of Arthropods
- 15 R. N. ROBERTSON. Protons, Electrons, Phosphorylation and Active Transport
- 16 GEORGE SALT. The Cellular Defence Reactions of Insects
- 17 D. W. T. CROMPTON. An Ecological Approach to Acanthocephalan Physiology

CONTENTS

<i>Acknowledgements</i>	<i>page vii</i>
1 GENERAL INTRODUCTION	I
Anatomy of adult worms. The life cycle.	
2 THE ENVIRONMENT OF ADULT ACANTHOCEPHALANS IN THEIR FINAL HOSTS	12
Analysis of the environment. The environments of <i>Moniliformis dubius</i> and <i>Polymorphus minutus</i> as examples of the environments provided by homeothermic hosts. The environment of acanthocephalans in fish. Movements of acanthocephalans within their environments.	
3 FEEDING OF ADULT WORMS	28
Nature of the absorptive surface. Nature of the absorptive process. Carbohydrates and amino acids. Lipids. Summary.	
4 THE INFLUENCE OF THE ENVIRONMENT ON THE GROWTH AND METABOLISM OF ADULT WORMS	38
Carbohydrate metabolism. Some relationships between the environment and carbohydrate metabolism. The availability of carbohydrate and the effect of starvation. Glucose. Oxygen and glucose. Carbon dioxide and glucose. Trehalose. Amino acids. Bile salts. Some effects of acanthocephalan carbohydrate metabolism on the environment. Summary.	
5 REPRODUCTION	51
Some features of male and female worms. Sex ratio and longevity. Sexual dimorphism and morphology. Mating. Pairing. Copulation. Maturation and production of eggs. Summary.	
6 THE EGG AND THE INFECTION OF THE INTERMEDIATE HOST	61
The morphology and structure of the eggs. The egg as a resting and resistant stage. Infection of the intermediate host. Observations on hatching <i>in vivo</i> . Observations on hatching <i>in vitro</i> . Summary.	

7	THE ARTHROPOD HAEMOCOELE AND THE DEVELOPMENT OF ACANTHOCEPHALA	page 75
	The environment of <i>Polymorphus minutus</i> and <i>Moniliformis dubius</i> in the haemocoels of their intermediate hosts. Physical factors. Biotic factors. Development of Acanthocephala. Development of the body wall. Aspects of growth and metabolism during development.	
8	HOST-PARASITE REACTIONS DURING THE DEVELOPMENT OF ACANTHOCEPHALA	86
	The significance of the capsule during development. Some effects of developing acanthocephalans on their intermediate hosts. Parasitic castration. Other effects.	
9	THE CYSTACANTH STAGE AND THE INFECTION OF THE FINAL HOST	94
	Morphology and physiology of cystacanths. Morphology. Physiology. Infection of the final host. The activation of cystacanths. Cystacanths and transport hosts. The infection of transport hosts. The environment of acanthocephalans in transport hosts. The significance of transport hosts in acanthocephalan life cycles.

ACKNOWLEDGEMENTS

IN writing this monograph, I have relied on many people, especially Dr George Salt, for guidance and assistance. Drs Penelope Butterworth and P. J. Whitfield have generously allowed me to refer to their unpublished work. Miss Susan Arnold, Mr D. Barnard and Drs A. P. M. Lockwood, B. A. Newton, Susan Rotheram, P. Tate and P. F. V. Ward have helped me in many ways. Mr Paul Knights of Cambridge Scientific Instruments Ltd has provided the electron micrograph for plate 2B. Miss Stephanie Hamer has skilfully prepared the typescript. To all these helpers, I wish to express my gratitude.

I also thank the following publishers and copyright owners: Academic Press for permission to use plate 2A and fig. 17 from *Experimental Parasitology*, and fig. 14b from *Advances in Parasitology*; Akademische Verlagsgesellschaft Geest and Portig, K-G, Leipzig, for fig. 14a from *Bronn's Klassen und Ordnungen des Tierreichs*, 4, *Acanthocephala* by A. Meyer; the American Institute of Nutrition for figs. 5c and d from the *Journal of Nutrition*; the American Society of Parasitologists for figs. 4d and e, 9, 10, 14c, d and f, 22a, c, d, e, h and 24a from the *Journal of Parasitology*; Cambridge University Press for figs. 3b, 6, 11, 12, 13, 18e and 21 from *Parasitology*; the Company of Biologists Ltd for figs. 5a, b, e, f, g, h and 8 from the *Journal of Experimental Biology*; John Wiley and Sons Inc. for fig. 1 from *Systema Helminthum. V. Acanthocephala* by S. Yamaguti; Gustav Fischer Verlag for fig. 14e from 'Urhautzell, Hautbahn und plasmodiale Entwicklung der Larve von *Neoechinorhynchus rutili* (Acanthocephala)' by A. Meyer in *Zoologische Jahrbücher, Anatomie und Ontogenie der Tiere*, 53, 103-26; Springer Verlag for fig. 24b from 'The occurrence of *Pallisentis basiri* Farooqi (Acanthocephala) in the liver of *Trichogaster chuna*' by R. Hasan and S. Z. Qasim in *Zeitschrift für Parasitenkunde*, 20, 152-56. My acknowledgement to the authors concerned has been made in the text.

Cambridge,
December, 1969
