

Index

- Acetylene reduction technique
(see also Nitrogenase activity) 243
- Actinomycetes 38
control of N_2 fixation by actinorhizal nodules 119, 120
Frankia association 173–186
inhibitory effects on *Rhizobium* 38–42
stimulatory effects on nodulation 43–46
- Actinorhizal root nodulation 173
ammonia assimilation 179–184
culturing *Frankia in vitro* 174
effectivity in symbiosis 184, 186
 N_2 fixation and life cycle of plants 187–189
plants bearing nodules 174
- Aeschynomene* 14, 21, 22
in Florida, U.S.A. 104
in India 105
in Japan 106
in Sahel region of West Africa 106, 107
in Venezuela 104
potentialities 107, 108
stem nodulation 22, 101–110
- Alnus* (Alder) 174
Frankia isolates 176
GS-GOGAT Pathway 180
- Aluminium 4
availability for legume fixation 4
- Ammonia assimilation 180
GDH Pathway in actinorhizal nodules 180
GS-GOGAT Pathway in alder 180
in actinorhizal root nodules 179–184
in lichens 202
- Asparagine 183
biosynthesis in *Frankia* 183
- Associative symbiosis (see also Plant-bacteria associations) 277
attachment of *Azospirillum* to roots 89
environmental effects 293
host plant specificity groups 283
infection of root interior 288
in genotypes of wheat 281
in *Paspalum notatum* 279
in rice by *Azospirillum* 262, 263
isotope dilution technique to quantify N_2 fixed 278
nitrogenase activity of wheat cultivars 292
plant genotype effects 291
tissue culture studies 282, 283
- Azolla* 250
availability of fixed N to rice 262
growth studies 250–252
inoculation benefits 259–262
- Azospirillum* 88, 315
attachment to roots 88, 89
bacteriophages 321
cloning systems 322, 323
DNA homology with *K. pneumoniae* 327, 328
effects of nitrates on N_2 fixation 325, 326
endogenous plasmids 321, 322
genetics 315–346
growth properties 316
infection of root interior 288
inoculation effect on maize 286
inoculation effect on rice 262, 263
inoculation effects in different countries 298
molecular biology 315–346
mutagenesis 316–318
Nif mutants 329
nitrate mediated inhibition of attachment 90
nitrogen accumulation in inoculated wheat 287, 299
regulation of nif gene expression 330
role of oxygen in N_2 fixation 324, 325
streptomycin resistance 285
transformation 319
- Azotobacter* 53, 54, 315
antifungal property 53, 54
ameliorative effects on plant diseases 53, 54
azotophages 319, 320
bacteriophages 319, 320
binding to clover root hair 72
cloning systems 322, 323
