CONTENTS

<i>Contributors</i>	ix
<i>Editorial preface</i>	xiii
1 Biology of the earliest mammals <i>A. W. Crompton</i>	1
2 Biological strategies of living conservative mammals <i>John F. Eisenberg</i>	13
3 Milk and mammalian evolution <i>Olav T. Oftedal</i>	31
4 The reptilian digestive system: general characteristics <i>Charles L. Guard</i>	43
5 The gastrointestinal tract of mammals: major variations <i>C. E. Stevens</i>	52
6 Digestive tract and digestive function in monotremes and nonmacropod marsupials <i>C. J. F. Harrop and I. D. Hume</i>	63
7 Form and function of the macropod marsupial digestive tract <i>I. D. Hume and D. W. Dellow</i>	78
8 The digestive tract: insectivore, prosimian, and advanced primate <i>Edgar T. Clemens</i>	90
9 Evolution of mammalian homeothermy: a two-step process? <i>C. Richard Taylor</i>	100
10 Have some mammals remained primitive thermoregulators? Or is all thermoregulation based on equally primitive brain functions? <i>John Bligh</i>	112
11 What is a primitive thermoregulatory system? <i>H. Craig Heller</i>	120

Contents	vi
12 The evolution of energy metabolism in mammals <i>A. J. Hulbert</i>	129
13 Metabolic capabilities of monotremes and the evolution of homeothermy <i>Terence J. Dawson and T. R. Grant</i>	140
14 Energy metabolism in hedgehogs: “primitive” strategies? <i>Amiram Shkolnik</i>	148
15 Relations of metabolic rate and body temperature <i>Piotr Poczopko</i>	155
16 The smallest insectivores: coping with scarcities of energy and water <i>Stan Lee Lindstedt</i>	163
17 Metabolic levels and biological strategies in shrews <i>Peter Vogel</i>	170
18 The respiratory system of the smallest mammal <i>Ewald R. Weibel, Helgard Claassen, Peter Gehr, Senada Sehovic, and Peter H. Burri</i>	181
19 Energetics of locomotion: primitive and advanced mammals <i>C. Richard Taylor</i>	192
20 Physiological responses to locomotion in marsupials <i>R. V. Baudinette</i>	200
21 Mechanics of locomotion in primitive and advanced mammals <i>Norman C. Heglund</i>	213
22 Elasticity in the locomotion of mammals <i>R. McN. Alexander</i>	220
23 Elastic storage: role of tendons and muscles <i>Giovanni A. Cavagna, G. Citterio, and P. Jacini</i>	231
24 Properties and distributions of the fiber types in the locomotory muscles of mammals <i>Robert B. Armstrong</i>	243
25 Endocrines: problems of phylogeny and evolution <i>P. J. Bentley</i>	255
26 Pituitary–ovarian interactions in marsupials <i>C. H. Tyndale-Biscoe and Susan M. Evans</i>	259
27 Placental function and embryonic development in marsupials <i>Marilyn B. Renfree</i>	269
28 Adrenocorticosteroids in prototherian, metatherian, and eutherian mammals <i>Magda Weiss</i>	285
29 The renin–angiotensin system in marsupials <i>J. R. Blair-West and Angela Gibson</i>	297
