ACKNOWLEDGEMENTS

The following work results from so much assistance by individuals and institutions that fully to tell how much would require another 225 pages. The most I can hope for here is accuracy and completeness in my recognition of this debt. The author's gratitude, which laces together all the following entries, must be understood by the reader.

To Professors Anderson, Blackett and Dirac—the principals in the story—I extend my warm thanks. My only hope is that inaccuracies in this book will not outweigh their own splendid efforts to convey to me the excitement of the birth of the Positron concept.

Further assistance was liberally provided by Professors J. R. Oppenheimer, N. Mott, H. Bethe, D. Skobelczyn and D. Wilkinson. Invaluable suggestions were provided by Professors Bohr and Heisenberg, as well as Lamb, Rosenfeld, Joliot-Curie, Jeffreys, Konopinski, Hill and Yennie—with 'assists' by Drs Newton, Langer, Woodruff and Taylor. Amongst my philosophical friends, Professors Ryle, Feigl, Maxwell, Sellars, Toulmin, Grünbaum, Feyerabend, Körner, Hempel and Putnam did their very best to help the style and arguments of this book to approximate to readable and reasonable prose.

Dr John Ziman read the manuscript on its way to the Press and worked with Mr Becher in a manner which improved the structure of the book.

Even at the promissory stage of this research—back in 1953 and 1954—several Foundations helped in their inimitable way. The Nuffield, Ford, and Rockefeller Foundations lubricated the research machinery at some rather sticky moments. The Minnesota Centre for Philosophy of Science provided discussion and facilities which were most helpful. The Indiana University Foundation, and the Research Council, provided for typing and secretarial assistance which accelerated the project. My thanks also to St John's College, Cambridge, and to the Master, for their many forms of assistance during the past ten years. I am indebted also to the United States Air Force and to the American Philosophical

ACKNOWLEDGEMENTS

Society for travel grants made available at critical moments. Amongst my many friends and colleagues I should like especially to mention Professors A. R. Hall and M. B. Hall, R. Buck, M. Scriven and E. Grant for the moral sustenance they so often provided. Paul McEvoy helped with the notes and index. And to my dear wife and children, Fay, Leslie and Trevor, I extend my loving gratitude for their infinite patience.
