

CONTENTS

Preface	<i>page xi</i>
1 The body surface	1
Area	1
Topology	1
Dermatoglyphics	14
Blaschko lines and other surface markings	18
Blaschko lines	18
Striae	20
Mongolian spots and Voigt lines	20
Colour	21
Temperature	23
Softness	25
2 The appendages of skin	31
Nails	31
Hair	34
Sebaceous glands	41
Sweat glands	42
3 The skin in depth	48
Thickness of skin	50
Epidermal growth	52
The epidermal proliferating unit, EPU	54
Chalones	56
Langerhans cells	58
The dermo-epidermal junction	60
The dermis	62
Collagen	62
Elastic fibres	66
Ground substance	67
Dermal vasculature	69
Innervation of the skin	72
Intra-epidermal neurites	72
Dermal mechanoreceptors	72

viii Contents

Vater–Pacini corpuscles	page 75
Mucocutaneous end organs	77
Meissner corpuscles	78
Ruffini endings	78
<i>Haarschieben</i>	78
Petrichial endings	79
Sensation of pain	79
Chemical mediators in skin	80
Morphological differences in skin areas of the body	80
4 Mechanical properties of skin	83
Tensile tests <i>in vitro</i>	83
Tensile tests <i>in vivo</i>	87
Diaphragm tests	88
Volume compressibility	89
Direction and site variations	90
Variations with age	91
Radiation effects	92
Skin stretch during normal movement	93
Effects of drugs	94
Visco-elastic properties of skin	95
Torsion tests	96
Indentation and recovery	98
Effect of pathological conditions	99
Ehlers–Danlos syndrome	99
Cutis laxa	100
Pseudo-xanthoma elasticum	100
Modelling	101
Physical models	101
Mathematical modelling	102
Network analysis	104
Strain energy functions	106
Notation	111
Summary of formulae	112
5 Mechanical, thermal and electrical properties	113
Mechanical properties of skin components	113
Collagen	113
Elastin	117
Stratum corneum	119
Notation	125
Thermal properties of skin	125
Notation	127

	<i>Contents</i>	<i>ix</i>
Electrical properties of skin	<i>page</i>	127
Changes due to pathological conditions		137
Effects of drugs and cosmetics		138
Effects of psychological stimulation		140
Basic definitions		141
Notation		142
6 Environmental effects		143
Cellular damage by environmental agents		143
Ageing reactions		145
Chemical agents		145
Surfactants		145
Metal ions		147
Gases		148
Hormones		149
Thermal responses		152
Solar radiation		158
Penetration and absorption by skin		159
Solar damage		162
Sunscreening		164
Ageing of skin by light		165
Lasers		166
Tattoo treatment		167
Port wine lesions		167
Seborrheic keratosis		168
X-ray and particle radiation		169
7 Wound closure and alternatives to skin		172
Sutures		173
Tape closures		176
Tissue adhesives		177
Treatment of burns		178
Natural membranes		180
Homografts		180
Heterografts		183
Artificial films, and foams and laminates		185
Films		185
Foams		187
Laminates		188
Design of an artificial skin		189
References		193
List of pathological conditions referred to in the text		218
Index		219
