
INDEX

- adjoint problems 103, 107
- adjoint with respect to $A(\xi)$ 109
- algebraic set
 - for the complex space 71
 - for the real space 67
- Bézout form 124
- C^∞ -solution 4
- Cauchy–Kowaleski theorem (existence theorem) 2
- compatibility condition 12
- cone 51
- construction of a solution for a typical problem 89
- continuous in the sense of \mathcal{E} 58
- convex hull 94
- convolution 55
- data 2
- differential operator 98
- Dirichlet's problem 22, 23
- distribution
 - Dirac 95
 - Schwartz 42
 - as a solution 62
- divergent form 178
- domain of dependence 192
- domain stretching in the direction of a cone 51
- \mathcal{E} -continuous 4
- \mathcal{E} -well-posed 4, 57, 58, 129
- \mathcal{E} -well-posed problem (P) 121
- elliptic eigenvalue problem 21
- elliptic partial differential operator 6
- energy inequality (H) for Neumann's problem 34
- energy inequality of Dirichlet type (E.I.D.)
 - (H) 129, 191
 - (\mathcal{H}) 154
 - (\mathcal{H}) for higher order 154
 - in $(-\infty, 0)$ 171
 - in $(-\infty, T)$ 184
 - in $(S, +\infty)$ 188
- everywhere continuous in terms of the degree of homogeneity 72
- existence of a solution of (P') 171
- existence theorems 158
- finite string with fixed ends 8, 12
- first necessary condition for \mathcal{E} -well-posedness 73
- fixed membrane 22
- formal adjoint 107
- formal adjoint operator 104
- Fourier–Laplace transforms 41, 47
- Fourier transform
 - over φ 44
 - over φ' 46
- Fourier's inversion formula 44
- Frechet space 58
- Friedrichs' mollifier 198
- free membrane 22
- fundamental inequality for Dirichlet's problem 29
- Garding's theorem 59
- Garding hyperbolicity condition 59
- Green's formula 162
 - in D 196
 - the original form 26
- Green's operator 1000
- general domain 193
- generalised Green's formula
 - for $\{A_0, A_0'\}$ in $I \times \Omega$ 181
 - for $\{A_0, Q\}$ in $I \times \Omega$ 186
 - for symbols P, Q 126
- Hadamard's example 2
- Hermite's theorem 148
- Holmgren's theorem (the existence theorem) 2
- hyperbolic in the direction of the t -axis 59
- hyperbolic in the direction of the $-F'$ (adjoint cone) 74

- hyperbolic partial differential operator 6
 hyper-hyperbolic partial differential operator 6
 hyperbolicity 4
 hypothesis (A) 59
 H-well-posed 130
 \mathcal{H} -well-posed 132
- inequality (H) for the Dirichlet's problem 32
 initial value problem 1
 for the half-space 129
 infinitely long string with no fixed ends 9
- local finite partition of unity 102
 local symbol 123, 128
 localising operator 123
 Lopatinski determinant 64
- necessary condition for \mathcal{E} -well-posedness 57, 74
 Neumann's problem 22, 23
 non-characteristic boundary 59
 notational convention of differential operator 42
- partial differential operator 5
 Poisson function 94
 Poisson operator 95
 problem
 (P) 57, 107, 129, 192
 (P') 61
 (P'') 62, 90, 132, 165, 169
 (P) 63
 (P*) 107
 (P) 194, 200
 principal part 59
 Puiseux series 68
- quasi-algebraic set
 for the complex space 71
 for the real space 67
- relation between energy inequalities (\mathcal{H}) and (H) 172
 Rouché's theorem 148
- second necessary condition for \mathcal{E} -well-posedness 86
 Seidenberg's lemma
 first form 68
 second form 69
 semi-infinite string with one end fixed 11
 singular integral operator 119, 122
 small vibration of a light homogeneous membrane 19
 Sobolov space 119
 stable solution 17
 standard extension of the symbol 124
 string with its ends fixed 13
 strongly elliptic partial differential operator 6
 strongly hyperbolic partial differential operator 6
 strongly hyper-hyperbolic differential operator 6
 support of a distribution 43
 symbol of degree m 122
- tempered distribution 43
 transpose map 45
 types of partial differential operator 5
 types of problem 57
- uniform Lopatinski condition 128, 135
 uniqueness of a solution form (P) 117
- vibrating strings 8
- weighted Sobolov space 120
 well-posed 3
 well-posed in the Sobolov space in the weak sense 121
- zero on the open set 42
