

INDEX

- activity models, 59–60
 activity, diversity of, 135–40
 Alta Toquima Village *see also*
 Monitor Valley Project, 87
 Altamira, 27, 28, 124, 128
 sample size, 127
 stylistic analysis, 126–8
 Anasazi, 100–8
 archaeology
 data sets and diversity, 132–5
 problems of diversity, 124
 and stylistic analysis, 118–20
 theory and diversity indices,
 145
 uses of diversity, 3, 8–12
 artifact classes, Le Flageolet, 62
 artifact distribution, 69, 70
 Catlow Upland, 71–6
 and content diversity, 60–1
 artifact variation, 69–70
 assemblage diversity, 86–7, 93–5
 attenuation, 134

 Barton Ramie, 113–14
 Black Mesa, 100–8
 environmental setting, 101
 evenness, 104–6
 lithic procurement, 103, 107–8
 prehistoric cultural setting,
 101–3
 richness, 103–4

 Brillouin function, 17
 Broken K Pueblo, 37–58
 design elements, 43–7, 51–3
 diversity of ceramic types,
 47–51
 factor analysis of
 type-frequency data from
 floors, 55–6
 missed pot hypothesis, 42–51,
 57
 occupation span, 57
 orphan sherds, 53–5, 56
 richness, 47
 sherd counts, 38–9, 56
 trash dumps, 38–43

 categories, importance of, 132
 Catlow Upland, 70–8
 artifacts, 71–6
 evenness, 74–5
 functional diversity, 73–8
 functional variation, 76–8
 richness, 73–4
 sample size, 75
 site distribution, 71, 72
 site/offsite comparisons, 71–8
 ceramics *and see* pottery
 Barton Ramie, 113–14
 diversity, 109–17
 Georgia, 114–15
 production, 109–10, 111–12

 Shipibo–Conibo, 115, 126, 128
 South Appalachian, 121
 variability, 110–11
 Chiriqui, Gulf of, 81–3
 Cholla Project, 31–6
 ground-stone analysis, 32–4
 stone-tool analysis, 34–5
 comparison of data, 10
 confidence interval, 132–3
 content diversity and artifact
 distribution, 60–1
 Cueto de la Mina, 27
 cultural ecology, 20–1

 Darwinian theory, 21–3
 data and diversity, 14, 132–8
 density, 5
 diachronic anthropology, 120
 Dianas Punch Bowl *see also*
 Monitor Valley Project, 91
 diversity
 of activity, 135–40
 in archaeological data sets,
 132–5
 archaeological problems, 124
 archaeological use of, 3, 8–12
 and artifact distribution, 60–1
 of assemblages, 86–7, 93–5
 Broken K Pueblo, 47–51
 Catlow Upland, 73–8
 ceramic production and use,
 109–17
 concept of, 25–6
 creating data for study, 14,
 132–8
 Darwinian theory, 21–3
 definitions, 2, 4, 13, 61, 111, 142
 in diet, 92–3, 135
 ecological concept, 5–7
 functionalist approach, 20–1,
 73–8
 hierarchical, 17–18
 historic-period fauna
 applications, 92–3
 historicist approach, 19–20
 and hunter–gatherer cultural
 geography, 85–91
 limitations of, 13–14
 measurement of, 15–18
 measurement and style, 123–5
 Metepec pottery, 115–16
 middle-range theory, 21–3
 models, 1, 27–9
 Monitor Valley Project, 87–91
 properties of, 26
 regression in measurement of,
 62–4
 Shipibo–Conibo ceramics, 115,
 126, 128
 and stylistic analysis, 118–29,
 135

Index

- terminology, 142–3, 146
 transformational studies, 125–6
 uses to archaeologists, 3, 8–12
- diversity indices
 and archaeology, 145
 components of, 143–5
 and sample size, 146
 use and evaluation, 112–13
- dubious indices, 7
- ecological concept of diversity, 5–7
 equitability, 2
 evenness, 2, 5, 6–7, 8, 15, 133, 136, 143
 Black Mesa, 104–6
 Catlow Upland, 74–5
 Cholla Project, 35–6
 definitions, 5, 74–5
 and generalizing strategies, 101
J index of, 64, 65
 measurement of, 29–31
 Metepec pottery, 115
 New York City faunal deposits, 95–6, 98
 St Augustine, Florida faunal deposits, 96–8
 and specializing strategies, 101
- faunal diversity, 92–9
 forager–collector continua, 85
 frequency seriation, 81–2
 functionalist approach to diversity, 20–1, 73–8
- Gatecliff Shelter *see also* Monitor Valley Project, 87
 generalizing strategies, 101
 Georgia, coastal site ceramics, 114–15
 ground-stone analysis, Cholla Project, 32–4
- heterogeneity, 2, 7, 8, 143
 definition, 5
 Le Flageolet I Couche V, 65–7
 over site surface, 65–7
 hierarchical diversity, 17–18
 historical particularism, 19–20
 historicist approach to diversity, 19–20
- hunter–gatherers
 diversity in cultural geography, 85–91
 residential locations, 86–7
- information statistic, 123–4
 intrasite spatial analysis, 59–68
- J* index of evenness, 64, 65
 Jeans Spring Shelter *see also* Monitor Valley Project, 89–90
- Le Flageolet I Couche V, 61–8, 140
 artifact classes, 62
 heterogeneity, 65–7
 lithics, Black Mesa, 103, 107–8
 Little Empire Shelter *see also* Monitor Valley Project, 89
 Lower Magdalenian sites, 126–7
- Metepec, 115–16
 middle-range theory, 21–3
 missed pot hypothesis, 42–51, 57
 models, 27–9
 ancient activities and the archaeological record, 137–40
 diversity, 1
 Monitor Valley Project, 87–91
 Monte Carlo techniques, 64–5, 132–3
- mutationism, 19
- natural selection, 22
 neutralism, 19
 New York City, 93–8
 evenness, 95–6, 98
 measurement of faunal diversity, 93–5
 population, 93
- occurrence seriation, 81–2
 Old Crow Basin, 79–81
 orphan sherds, 53–5, 56
- populations, 93, 145–8
 pottery *and see* ceramics
 Broken K Pueblo, 38–55
 Chiriqui, Gulf of, 81–3
 Metepec, 115–16
 seriation, 81–3
- presence/absence tabulation, 133
 processual analysis, 120
 punctuated equilibrium theory, 19–20
- range, 133, 136
 raw material procurement, 100–1, 103, 107–8
 regression, 133
 and sample size, 89–90
 in measuring diversity, 62–4
 richness, 2, 5–6, 15, 133, 136, 143
 Black Mesa sites, 103–4
 Broken K Pueblo, 47
 Catlow Upland, 73–4
 definitions, 5, 73
 and generalizing strategies, 101
 measurement of, 5–6, 26–9
 Metepec pottery, 115
 New York City faunal deposits, 95–7, 98
 St Augustine, Florida faunal deposits, 96–8
 and specializing strategies, 101
- St Augustine, Florida, 92, 93–8
 evenness, 96–8
 measurement of faunal diversity, 93–5
 meat consumption, 92–3
 population, 93
 sample diversity, Monitor Valley Project, 87–9
 sample size, 5, 79–84, 112, 134, 146–7
 Altimira, 127
 Catlow Upland, 75
 corrections for, 132–3
 and diversity indices, 146
 Monitor Valley Project, 87–91
 Monte Carlo techniques, 64–5, 132–3
 problems of, 26–7
 regression, 89–90
 and relative abundance, 79–84
 sherd counts, 38–9, 56
 samples and sampling, 16–17, 145–8
 seriation, 81–3
 Shannon–Weaver Diversity Index, 16–18, 94, 123–4, 127–8, 134–5
- Shipibo–Conibo ceramics, 115, 126, 128
 Simpson's Diversity Index, 17, 94, 127–8
 slope, 90–1
 social interaction and stylistic analysis, 122–3
 South Appalachian ceramics, 121
 spatial analysis, 58–68
 behavioral approach, 60
 specializing strategies, 101
 species equitability, 5
 spiral fractures, 79–81
 standardization, 133, 136
 status, 115
 Steens Mountain Prehistory Project *and see* Catlow Upland, 70–8
 stone-tool analysis, Cholla Project, 34–5
 structuralism, 19
 style, as an active concept, 123
 stylistic analysis, 120–3
 Altamira, 126–8
 and archaeology, 118–20
 background, 118–20
 and diversity, 118–29, 135
 normative assumptions, 121–2
 Shipibo–Conibo ceramics, 126
 and social interaction, 122–3
 transformational studies, 125–6
- tau* statistic for nonparametric correlation, 66
 technological expediency, 69–70
 tool discard contexts, 69–70
 Toquima Cave *see also* Monitor Valley Project, 89
 tradeware as status symbols, 115
 transformational studies, 125–6
 trash dumps, 38–43
 tribalization, 122
 truncated lognormal distribution, 6
- uniformity of standardization, 133, 136
 urbanization and diet, 93, 98
- White Sage Spring *see also* Monitor Valley Project, 91
