	<i>page</i>
<i>Preface</i>	vii
<b>Part I: System concepts</b>	1
1    Introduction	3
2    Application domains	7
3    Transition systems	16
4    Objects	26
5    Actors	40
6    Specification language	57
6.1    Values, types and functions	57
6.2    Value and function construction	63
6.3    Predicates	66
6.4    Schemas and scripts	67
7    References and exercises for part I	71
<b>Part II: Frameworks</b>	77
8    Introduction	79
9    Transition systems framework	81
10    Object framework	89
11    Actor framework	98
12    References and exercises for part II	120
<b>Part III: Modeling methods</b>	125
13    Introduction	127
14    Actor modeling	131
14.1    Making an actor model after reality	131
14.2    Characteristic modeling problems	143
14.3    Structured networks	161
14.4    Net transformations	167
15    Object modeling	173
15.1    Making an object model after reality	176
15.2    Characteristic modeling problems	189

vi

*Contents*

15.3 Transformations to other object frameworks	203
<b>16 Object oriented modeling</b>	<b>218</b>
<b>17 References and exercises for part III</b>	<b>228</b>
 <b>Part IV: Analysis methods</b> <span style="float: right;">233</span>	
<b>18 Introduction</b>	<b>235</b>
<b>19 Invariants</b>	<b>237</b>
19.1 Place invariants	241
19.2 Computational aspects	256
19.3 Transition invariants	264
<b>20 Occurrence graph</b>	<b>268</b>
<b>21 Time analysis</b>	<b>276</b>
<b>22 Simulation</b>	<b>289</b>
<b>23 References and exercises for part IV</b>	<b>299</b>
 <b>Part V: Specification language</b> <span style="float: right;">303</span>	
<b>24 Introduction</b>	<b>305</b>
<b>25 Semantic concepts</b>	<b>308</b>
25.1 Values and types	308
25.2 Functions	317
<b>26 Constructive part of the language</b>	<b>321</b>
<b>27 Declarative part of the language</b>	<b>335</b>
27.1 Predicates and function declarations	336
27.2 Schemas and scripts	339
<b>28 Methods for function construction</b>	<b>345</b>
28.1 Correctness of recursive constructions	345
28.2 Derivation of recursive constructions	351
<b>29 Specification methods</b>	<b>358</b>
29.1 Value types for complex classes	358
29.2 Specification of processors	364
<b>30 References and exercises for part V</b>	<b>371</b>
<i>Glossary</i>	374
<i>Appendix A Mathematical notions</i>	391
<i>Appendix B Syntax summary</i>	396
<i>Appendix C Toolkit</i>	400
<i>Bibliography</i>	410
<i>Index</i>	417
