

INDEX

- acetaminophen toxicity, 78
 acid ingestion, 56
 acute bacterial endocarditis, 57–60
 adrenal gland, fetal demise and, 156–57
 alcohol abuse. *See* ethanol abuse
 alcoholic steatohepatitis, 71, 74
 alveolar damage, 137–38
 amniotic fluid
 aspiration in the newborn, 47
 embolism, 36, 44–47
 amyloid angiopathy, 120–21
 amyloid precursor protein (APP),
 166–69
 anaphylaxis, 136–37
 aneurysm, ruptured, 122
 angiogenesis, 106
 aortic valve endocarditis, 57–60
 arrhythmogenic right ventricular dysplasia
 (ARVD), 126
 aspiration, 48
 aspiration pneumonia, 51–52
 food, 49–52
 asthma, 140–41
 astrocytes, 16
 reactive, 18, 22
 atheroma, 114
 pulmonary artery, 94–95
 autolysis, 28
 kidney. *See also* decomposition, 31
 AV node, 123
 axonal injury, 166–69
- berry aneurysm, ruptured, 122
 bile duct proliferation, 65
 bladder infection, 147–48
 bone marrow embolism, 36, 44
 brain
 abscess, 62–63
 calcium oxalate crystals, 55
 cerebral contusion dating, 14–17
 hypoxic/ischemic injury, 18–21
 incidental findings, 21–26
 sickle cell disease, 143
 subarachnoid hemorrhage dating, 5
 subdural hemorrhage dating, 6–13
 brain death, 24
 bronchopneumonia, 144–46
- calcium oxalate crystals, 54–55
 capillary telangiectasia, 134
 cardiovascular disease
 cerebral vascular disease, 123
 conduction system abnormalities, 123–24
 coronary artery atherosclerosis, 120
 heart failure, 118
 hypertension, 93–98
 hypertrophic cardiomyopathy, 126
 infiltrative diseases, 126
 inflammatory disease, 127–30
 kidney ischemia from circulatory
 collapse, 33
 myocardial infarction, 98–110
 carotid artery dissection, 96–97
 cavum septum pellucidum, 23
 central pontine myelinolysis, 73
 cerebellar atrophy, 70–71
 cerebellum
 thermal injury, 87
 with external granular layer, 21
 cerebral contusion dating, 14–17
 acute cortical contusion, 14, 15, 16
 remote cortical contusion, 16
 cerebral cortex, thermal injury, 86
 cerebral infarct, remote, 118
 cerebral vascular disease, 123
 children. *See* pediatrics
 choroid plexus, 26
 aging, 25
 chronic injection sequelae, 57–69, 70
 acute myocarditis, 64
 brain abscess, 62–63
 cutaneous injection site, 68–69
 endocarditis, 57–60
 liver, 64–65
 microscopic evidence, 65–66
 splenic infarct, 61
 cirrhosis of the liver, 31, 75–76
 clots. *See* thrombotic lesions
 cocaine abuse, 76
 colloid cyst, 135
 conduction system abnormalities,
 123–24
 contusion dating, 3
 cerebral, 14–17
 skin, 2–3
- coronary artery atherosclerosis, 120
 plaque rupture, 116–17
 corpora amylase, 118
Cryptococcus infection of the heart, 151
 cytomegalovirus (CMV)
 infection, 148
- dating of injuries, 1
 brain
 cerebral contusion, 14–17
 subarachnoid hemorrhage, 5
 subdural hemorrhage, 6–13
 contusion dating, 3
 cerebral, 14–17
 skin, 2–3
- decomposition, 28
 esophagus, 34
 heart, 29
 kidney, 31–33
 liver, 30–31
 lung, 30
 pancreas, 33
 skin, 34
- deep vein thrombosis, 35
 dentate gyrus, in epilepsy, 131
 diabetes, 136
 diatoms, drowning and, 48
 disseminated intravascular coagulopathy
 (DIC), 36, 40
 drowning, 48, 49
 drug abuse. *See* chronic injection sequelae
- dura
 adult, 7
 baby, 6, 7
 thermal injury, 86
 DuraGel, 10
 Duret hemorrhage, 20
- edema
 cerebral contusion, 14
 myocardial infarction, 99
 viral infant lung, 163
- electrocution, 89–91
 embolic lesions, 42–47,
 See also thromboembolism, 36
 amniotic fluid embolism, 44–47
 bone marrow embolism, 44

INDEX

- embolic lesions (*continued*)
 fat embolism, 42–43
 pulmonary embolism, 38
 emphysema aquosum, 48
 endocarditis, 57–60
 eosinophilia, 15, 18
 myocardial infarction, 100, 103
 thermal injury, 84, 85
 eosinophilic myocarditis, 129–30
 ependymal rests, 23
 epilepsy, 131–35
 erythrocyte “laking”, 2
 esophagus, decompositional changes, 34
 ethanol abuse, 70–76
 central pontine myelinolysis, 73
 cerebellar atrophy, 70–71
 chronic pancreatitis, 72–73
 necrotic and cirrhotic liver, 75–76
 steatohepatitis, 71, 74
 Wernicke’s encephalopathy, 74
 ethylene glycol poisoning, 54–57
- fat embolism, 36, 42–43
 fatty metamorphosis, 107
 fetal demise, 154–59
 estimating time of death, 164
 fibrin thrombi, 39
 fibroblasts, 11
 fibrosis, 92
 arrhythmogenic right ventricular dysplasia (ARVD), 125
 cocaine abuse and, 76
 decomposition and, 29, 32
 ethanol abuse and, 71, 72, 73, 75
 hypertrophic cardiomyopathy, 126
 myocardial infarction, 107, 108, 109
 myocarditis, 128
 pericarditis, 128
 pulmonary, 137
 bronchopneumonia, 145
 fire-related injuries, 83–87
 food aspiration, 49–52
 foreign body giant cells, 66, 68, 69
- giant capillaries, 13
 Glial Fibrillary Acidic Protein (GFAP), 132
 glial-neuronal heterotopia of the leptomeninges, 164
 gliosis, 18, 22, 118
 gliotic cyst, 16
 glomerulosclerosis, 32
 granulation tissue, 105, 106
 gunshot wounds, 81–82
- heart. *See also* cardiovascular disease
 after prolonged cardiopulmonary resuscitation efforts, 110
Cryptococcus infection, 151
 decompositional changes, 29
 fetal demise, 157
 thermal injury, 85
- heart failure, 118
 chronic, 111
- hemorrhage
 acute bacterial endocarditis, 60
 amyloid angiopathy, 121
 axonal injury, 167
 bladder infection, 147
 brain abscess, 63
 carotid artery dissection, 96
 cerebral contusion, 14, 15, 16
 chronic injection sequelae, 68, 69
 eosinophilic myocarditis, 129
 heart failure, 112
 hypothermia and, 88
 myocardial infarction, 99, 103, 104
 necrotic liver, 75, 76
 pontine avulsion, 17
 pulmonary, 140
 retinal, 172–74
 retroperitoneal, 165–66
 skin contusion, 2
 skull fracture, 170
 subarachnoid, 5
 subdural, 6–13
 acute, 8, 9, 12
 uncal herniation, 19
- hemosiderin
 cerebral contusion, 16
 cerebral vascular disease, 118, 119
 heart failure, 111
 myocardial infarction, 106, 109
 pulmonary infarction, 40
 subdural hematoma, 9, 10, 12
- hippocampus, in epilepsy, 131, 132
 hypertension, 93–98, 107
 carotid artery dissection, 96–97
 cerebral vascular changes, 118
 kidney changes, 33
 pulmonary, 139
 right ventricular hypertrophy, 95
 hypertrophic cardiomyopathy, 126
 hypothermia, 88
 hypoxic injury, 18–21
- ibuprofen toxicity, 77
 infectious diseases. *See also specific diseases*, 144–51
 injection sequelae. *See* chronic injection sequelae
- injuries, 80
 cold-induced, 88
 electrical, 89–91
 gunshot wounds, 81–82
 pediatric, 164–75
 axonal injury, 166–69
 radiology, 164
 retinal hemorrhages, 172–74
 retroperitoneal hemorrhage, 165–66
 skull, 170–71
 thermal injuries, 83–87
 intracranial pressure (ICP), increased
 Duret hemorrhages, 20
 uncal herniation, 19
 intravenous drug abuse. *See* chronic injection sequelae
 ischemic injury, 18–21
- Kaposi sarcoma, 150–51
- kidney
 autolysis, 31
 calcium oxalate crystals, 54–55
 decompositional changes, 31–33
 fetal demise, 155–56
 hypertensive changes, 97
 infant, 161–62
 ischemia from circulatory collapse, 33
 thermal injury, 84
 Kimmelstiel-Wilson lesions, 33, 136
- lacunar infarct, remote, 119
 laminar necrosis, 20, 21
 leptomeninges
 glial-neuronal heterotopia of, 164
 thermal injury, 86
- lines of Zahn, 37, 38
- liver
 acetaminophen toxicity, 78
 alcoholic steatohepatitis, 71, 74
 chronic injection sequelae, 64–65
 cirrhosis, 31, 75–76
 decompositional changes, 30–31
 fetal demise, 158
 heart failure and, 112–13
 thermal injury, 84
 triaditis, 64
- lung, 41
 alveolar damage, 137–38
 decompositional changes, 30
 fetal demise, 158–59
 infant, 162
 atelectatic, 163
 viral, 163
 pulmonary infarct, 40
 sickle cell disease, 142
 smoker’s, 139
- lymphocytic myocarditis, 127–28
 lymphocytic pericarditis, 128–29
- meningeal artery, 8, 9
 meningitis, bacterial, 146
 mineralization, 25, 118, 120
 Mongolian spot, 175

- myelinating glia, 22
myocardial infarction, 98–110
 acute, 104
 cocaine related, 76
 remote, 111
 subacute, 104–06
 temporal alterations, 98
myocardial scar, 107
myocarditis
 acute, 64, 127–28
 eosinophilic, 129–30
 lymphocytic, 127–28
- necrosis
 acetaminophen toxicity, 78
 acute bacterial endocarditis, 59
 brain abscess, 63
 electrocution and, 89
 heart failure, 112, 113
 kidney ischemia, 33
 laminar, 20, 21
 liver, 75–76
 myocardial infarction, 100, 101, 103
 pulmonary, 40, 137
 thermal injury, 83, 84, 85, 86
neovascularization, 8
nutmeg liver, 113
- opiate intoxication, 18
optic nerve hemorrhage, 174
organizing thrombus, 38
- pancreas
 decompositional changes, 33
 hypothermia, 88
pancreatitis, chronic, 72–73
pediatrics, 153, 161–64
 fetal demise, 154–59
 inflicted injuries, 164–75
 axonal injury, 166–69
 radiology, 164
 retinal hemorrhages, 172–74
 retroperitoneal hemorrhage, 165–66
 skull, 170–71
 rib fracture healing, 171
pericarditis, lymphocytic, 128–29
- pineal cyst, 133–34
pinocytoma, 132–33
placenta, 159
Pneumocystis carinii pneumonia (PCP), 149–50
pneumonia. *See* bronchopneumonia; Pneumocystis carinii pneumonia (PCP)
poisoning, 53
 chronic injection sequelae, 57–69
 cocaine, 76
 ethanol, 70–76
 ethylene glycol, 54–57
 salicylates, 77–78
pontine avulsion, 17
popliteal vein thrombosis, 37
post injury intervals. *See* dating of injuries
pulmonary artery atheroma, 94–95
pulmonary disease. *See also specific diseases*, 137–40
pulmonary embolism, 38
pulmonary hypertension, 139
pulmonary infarct, 40
