

Index

- A*-number, 251
S-number, 251
T-number, 251
U-number, 251
Z-number, 50
 β -badly approximable, 209
 β -expansion, 206
 β -normal, 208
 β -shift, 207
b-ary expansion, 49
b-badly approximable, 148
- absolutely decaying measure, 157
 absolutely non-normal, 102
 absolutely normal, 102
 algebraic integer, 16
 alphabet, 223
 automatic number, 192
- badly approximable number, 245
 BBP-number, 115
 Borel–Cantelli lemma, 234
- Chaitin’s Ω number, 112
 Champernowne number, 86
 completely uniformly distributed, 13, 116
 complexity function, 91, 205, 220, 224
 computable number, 111
 continuant, 243
 continued fraction, 241
 convergent, 242
- Davenport–Erdős–LeVeque lemma, 6
 de Mathan–Teulié conjecture, 40
- dense modulo one, 1
 deterministic sequence, 220
 Diophantine exponent, 141, 224
 discrepancy, 9
 distribution function, 11
- entropy, 92, 205
- Folding Lemma, 242
 frequency, 78
- Gauss map, 195
 Gauss measure, 195
- Hausdorff dimension, 236
 height, 247
 Hypothesis A, 115
- irrationality exponent, 246
- jointly normal, 138
- Koksma’s classification, 250
 Korobov number, 103
 Kronecker approximation theorem, 12
- lacunary sequence, 29
 length, 53, 223
 Liouville number, 248
 Liouville’s theorem, 247
- Mahler’s classification, 250
 middle third Cantor set, 238
 minimal polynomial, 247

300

mirror formula, 242
morphic number, 220
multiplicatively dependent, 37
multiplicatively independent, 37

normal continued fraction, 196
normal number, 79
normal set, 101

order, 231
overlap, 223

palindrome, 223
partial quotient, 242
Pisot number, 20

Quantitative Subspace Theorem, 249
quasi-Sturmian, 227

random number, 112
rational integer, 18
recurrence sequence, 253
reduced length, 53
richness, 91
Ridout's theorem, 248

Index

Riesz product measure, 123
Roth's theorem, 248

Salem number, 20
Schmidt (α, β) -game, 148
Schmidt Subspace Theorem, 249
self-normal, 208
simply normal, 78
Stoneham number, 103
Sturmian word, 226
subblock, 224

Thue–Morse word, 227
trace, 19

ultimately periodic, 224
uniformly distributed modulo one, 1

van der Corput sequence, 10
van der Corput's lemma, 3

Waring's problem, 72
Weyl's criterion, 1
winning set, 148
word, 223
