

Index

- acquisition, 30, 54n, 103–4, 211, 221, 237, 258, 289
- acrolect, 211, 213, 221
- age-grading, 255–7. *See also* change
- agentless passive, *see* passive
- anaphora, 82, 86
- anglicization, 23–4, 136, 157
- animacy: as factor in relativization, 2, 58, 60–1, 63, 69, 81, 88–9, 95, 142–3, 191–4 *ἀπό κοινοῦ*, 72–6. *See also* contact clause, deletion, ellipsis
- aspiration: and deletion of /s/, 28, 200, 224, 228, 259n
- autonomy: vs. determinism, 271–3, 283; principle, 4n; thesis (in extended standard theory), 216
- basilect, 211, 221
- BEV (Black English Vernacular), 28, 30, 36–7, 76, 177, 184–5, 218–21, 237
- case: agreement, 134–5, 137, 208; coding/marking, 57–8, 63, 68, 93, 95, 132; hierarchy, *see* NP accessibility
- causality, 55n. *See also* explanation
- centralization: of diphthongs on Martha's Vineyard, 235–6, 264, 267
- Cedergren–Sankoff variable rule program: and *a*-prefixing, 226–7; and change, 210–11; and post-vocalic /r/, 230–2; and probability theory, 271, 275, 279; and relatives, 26–7, 188–209, 218; and variable rules, 31, 139, 173–4, 183–8. *See also* variable rule
- channel, 14, 19–20, 26; cues, 119–20, 125. *See also* medium
- change, linguistic: and age-grading, 255–7; as diffusion, 152n, 212–14, 255–6; direction of, 171–3, 180, 208, 211–12, 236, 254–6, 263, 267; from above, 213, 263, 266–8; from below, 173, 263, 266–7; function of, 259–60; gradual vs. discrete, 254–61; and identity, 264; intermediate stages in, 260, 229–31; and linguistic theory, 240, 252–73; natural, 212, 255n; Neogrammarian theory of, 254–60; origin vs. propagation, 244, 256, 258, 262; in relativizers, 199–204; by re-ordering/reweighting of constraints, 27, 174, 199–204, 210–11, 219, 232; and role of individual, 257–8; and role of social factors, 19, 210, 234, 262–9; by rule decomposition, 200; and sex differentiation, 264; and social class, 263, 266; vs. stable variability, 25, 200–4, 236, 256; and style, 264–5; and types of variables, 265–6, 284; and variation, 25, 200, 204, 209, 218, 231, 252, 255
- chi-square, 186, 191n, 193, 207, 279
- coexistent systems, 65, 115, 209, 217, 236
- colloquialisms: and colloquial speech, 77, 101, 120, 137, 213; in Old English, 74; in Middle English, 62, 70, 74, 167; in Middle Scots, 22–4, 125, 154, 167, 169; in seventeenth century, 17, 87. *See also* non-standard speech, vernacular, written language
- competence, 14, 280; communicative, 157n, 251; and *langue* vs. *parole*, 106; vs. performance, 10, 26, 35–7, 240–1, 243, 247–51; polylectal/panlectal, 231n, 249; and variable rules, 185–8. *See also* performance
- complementation, 42, 77, 82
- complementizer: as COMP node, 50, 214–17; *que* deletion, 162n, 241–2; *that* deletion, 23, 116, 208, 215; vs. relativizer status of *that*, 38, 46–8, 58–9, 60n, 76–7, 79, 135. *See also* deletion, relativization, TH
- constraint hierarchy (in variable rule): and competence, 249–50; explanation of, 276; interaction between social and linguistic, 199–204, 216–17, 226–34; mirror image, 192, 227; ordering in, 189, 192, 197; re-ordering as a factor in change, 174, 200,

- 219; reversal, 226–7. *See also* change, interaction
- contact clause, 72, 74–5. *See also* *áπò κοινῶν*, deletion, ellipsis
- continuative clause, 83–4
- copying rule, 135, 215
- copula: in BEV, 28, 30, 36–7, 177, 184–5, 218–21, 223, 227, 236, 275; in Guyanese Creole, 177–82, 221, 243
- coreference (and coreferential NP), 27, 38–42, 44–5, 58, 67n, 68, 85, 92–3, 96, 97–8, 189n, 215. *See also* identity condition, reference
- creoles: and creole communities, 242, 272; creolization (and decreolization), 54–5n, 57n, 211–12; relativization in 58–9, 65–9, 103–4; study of, 220, 234n. *See also* relativization
- cross-product analysis, 31, 186, 242; of relative markers, 140–69
- /d/: deletion of, 249–50; devoicing of, 221
- definiteness, 2, 71n, 81, 89–90, 143
- deictic marker (as relativizer), 66–7
- deixis, 85
- deletion: argument, 237; metrical constraints on, 75–7, 79, 163; relative marker, 146, 160–5, 170–4, 241–2: as social and stylistic variable, 165–70, 173, 206; as strategy of relative clause formation, 65n, 68, 72–80, 104, 132, 147–8, 167, 169, 170, 172–3, 176, 181, 207, 220, 241–2; of unstressed syllables, 225–8; and variable rule analysis, 188–209. *See also* *áπò κοινῶν*, complementizer, contact clause, copula, ellipsis, /h/ deletion, t/d deletion
- demonstrative pronouns (as relativizers), 56–7, 63–4, 67, 73
- description, *see* explanation
- determiners, 89–91
- dialectology, 9, 15n, 16n, 108, 111, 239, 254–5, 287n
- diglossia, 236
- drift, language, 258–60. *See also* change
- dynamic paradigm, *see* paradigm
- (eh) in NYC, 229, 261, 266
- elaborated code, 54
- ellipsis, 23–4, 74, 77n. *See also* *áπò κοινῶν*, contact clause, deletion
- embedding (of relative clauses): 38–42, 116; vs. adjunction/conjunction, 42–4, 55n, 58–9, 64–9, 90, 102–5; and restrictive vs. non-restrictive clauses, 83, 87. *See also* hypotaxis, subordination
- empiricism, 276–7. *See also* theories
- essentialism, 5, 283–4
- explanation, 46, 213; causal, 269–72, 281–3; deductive–nomological (D–N), 270–2; vs. description, 4–5, 270; in implicational scales, 172, 181, 183; vs. prediction 271; in socio-historical linguistics, 52, 121; in sociolinguistics, 12, 281–5; and Transparency Principle, 79–80; of variation and change, 240–73
- falsification, 183–207, 274, 276–9
- focussing: particle, 66; rule, 82n, 216
- free variation, 10, 33, 60. *See also* inherent variability
- foreign influence: on English syntax, 61–2, 63, 71–2, 74, 86, 213; on Scots prose, 22, 164
- genre, 117–18, 125, 127; in Middle Scots, 22, 114, 152n, 157, 159, 170
- generics (as antecedents), 41–2, 90, 94
- grammaticalization, 57n, 86–7
- /h/ deletion, 28, 224, 228. *See also* aspiration
- historical linguistics: and explanation, 269; and homogeneity hypothesis, 244n; and reconstruction, 229; and sociolinguistics, 2–3, 9, 13, 201, 246, 252; as subdiscipline of linguistics, 15, 18, 21. *See also* socio-historical linguistics
- homogeneity: hypothesis, 10–11, 244n, 257; of linguistic behavior, 108–10
- hypercorrection, 87, 136–8, 212, 263n, 265, 267
- hypotaxis: asyndetic, 56, 72–6; vs. parataxis, 22, 54–6, 104. *See also* embedding, syntactic complexity
- identity conditions, 38–42, 45–6, 48, 71n, 83–5, 215. *See also* coreference, reference
- idiolect: homogeneity of, 10–11, 257–9; and implicational relations, 182; and levels of abstraction, 37; and sampling, 106, 113; vs. sociolect, 240–7; and style, 115–16, 118. *See also* isoclect, sociolect
- implicational scales: and copula, 177–82, 221; and Germanic consonant shift, 253–4; and index of scalability, 177–82, 202, 247; psychological reality of, 187, 249; relations in, 8, 242, 248, 262; and relatives, 31, 139, 170–4, 213–14, 241–2; vs. variable rule analysis, 242–3, 251, 261, 284
- index of deletion, *see* deletion

312 *Index*

- index of relativization, *see* relativization
 index of syntactic complexity, *see* syntactic complexity
 indicator, 265–6, 285
 induction, problem of, 4, 276. *See also* theories
 inherent variability, 19, 26, 240, 244, 259, 261
 instrumentalism, 5
 interaction (vs. independence of constraints), 186, 190, 192–3, 197, 201, 210–2, 270n. *See also* change, constraint hierarchy
 interpretive (vs. generative) semantics, 45
 interrogative pronouns (as relativizers), 45–6, 59, 61–3, 64n, 65, 71–2, 86
 isogloss, 117, 127, 253–4
 isolect, 11, 170–1, 177, 180, 221, 240, 242, 261. *See also* idiolect, sociolect
 isomorphism: of constraint hierarchies, 189–221, 226–8; of grammar and competence, 247–51; of groups and individuals, 106n, 240–7; of model and theory, 184, 188, 209, 223n, 275–6, 283
- language death, 15, 54–5n, 65, 83, 100–1n, 122n
 lect, 253–5. *See also* idiolect, isolect, sociolect
 levels of abstraction (in grammars), 10–11, 34–5, 37, 152n, 224, 243–4. *See also* idiolect, sociolect
 lexical diffusion, 254, 261, 268
 literacy, 64–5, 69, 127
 literary language, 16–17, 20–2. *See also* prose, verse
 locative adverbs (as relativizers), 57, 64, 66–7, 96–7
- marker, 265–6, 285
 matrix: N or NP, 42–4, 89; S, 38, 66, 102–5, 215
 maximum likelihood calculation (in Cedergren–Sankoff program), 186, 191. *See also* Cedergren–Sankoff variable rule program
 mean T-unit length, 157n, 174–5
 medium, 14–19, 22–6. *See also* channel, written language
 method/methodology: hypothetical–deductive, 281; non-deductivist, 282, 284; scientific, 275, 277, 282–3; sociolinguistic, 280–2, unity of, 281. *See also* sociolinguistic theory, theories
 methodological individualism, 246; vs. holism, 250
- Neogrammarian theory, *see* change
 NP accessibility (case) hierarchy, 99–102, 148–157, 211–12, 255
 non-restrictive relative clause, 83–8, 96–7, 131, 140–2. *See also* relativization, restrictive relative clause
 non-standard speech: and relatives, 173, 206, 213, 285; vs. standard, 119, 229n, 236, 285. *See also* standard speech
- obligatory rule, 98; vs. optional rule, 49–51, 216. *See also* optional rule, variable rule
 Observer's paradox, 126
 optional rule, 8, 46, 185, 249. *See also* obligatory rule, variable rule
- paradigm: dynamic, 235, 253–6; in history of linguistics, 11n, 15, 185, 286–9; quantitative, 26, 31, 106, 126n, 187, 209, 224, 282, 288; quantitative vs. dynamic, 11, 29, 162n, 200, 239–273, 283
 passive, 22; agentless, 33–5, *get vs. be*, 101–2
 pause (as dialect boundary), 210, 231–3
 perceptual factors/strategies, 25, 64–5, 69, 78–80, 96; and complexity, 99, 103–4, 152n, 173
 performance, 64, 106, 252. *See also* competence
 philology, 3, 13, 15. *See also* historical linguistics
 philosophy of science, 4n, 12, 209, 246, 269, 274, 276, 281, 287n
 pluralism, 283, 288n, 289
 poetry, *see* verse
 polylectal/panlectal grammar, 170, 231n, 249, 254–5
 positivism, 18, 277, 283
 post-creole continuum, 211, 236, 243, 272
 post-vocalic /r/: aspiration, 224, 228; deletion, 228–233, 266, 268; vocalization (and copula deletion), 223–4, 227–8
 pragmatics, 55n, 86–7
 preposition: shifting, 46, 48, 60n, 98–9, 141, 144, 149, 161; stranding, 97n, 65n, 135, 137, 149
 prescriptive grammar, 55, 69, 76–7, 98, 132
 prestige: borrowing, 213; and change, 174, 233, 263–4, 266, 272n; covert vs. overt, 264, 266–7
 probability: coefficient, 174, 183, 185, 188, 191, 193, 198, 226, 242, 246, 250, 261, 276; vs. frequency, 187; input probability, 194, 208; and probabilistic laws, 251, 280; and probabilistic rules, 188,

- 249n; and sampling, 106, 113; statements, 183, 270, 276; theory, 183–4, 186, 207n, 255, 277–80. *See also* Cedergren–Sankoff variable rule program, variable rule
- promotion, 83n, 101, 149, 215–16
- pronominal address, 124
- pronominalization, 38, 40, 50, 58, 60n, 89, 189n, 215; as strategy of relative clause formation, 65, 68, 205, 208
- prose: epistolary, 62, 72, 114, 117, 132, 153, 155, 163, 175, 214; legal (official), 14, 22, 91, 96, 97, 117, 152, 154, 155, 163–4, 165, 175, 194; literary, 22, 25, 70, 75, 114, 132; narrative, 2, 155–8, 163–4, 175, 213; as stylistic category, 114, 163, 166, 175–6, 180, 195, 207; vs. verse, 2, 16, 71, 75, 99, 125, 152
- psychological reality, 187, 245, 247–51
- quantitative paradigm, *see* paradigm
- quantifiers, 41–2, 81, 88–9, 90–1, 143–4
- quh*- forms (of the relative), 22, 24, 27, 70–2, 74, 89, 92–101 *passim*, 132
- real vs. apparent time, *see* age-grading, change
- realism, 275, 284
- reconstruction, in socio-historical linguistics, 105, 121–6, 166
- reference, 33–4, 38, 43n, 44, 81–7, 90–1, 97, 124. *See also* coreference, identity conditions
- referential: feature, 7; meaning, 32–5
- register: and anglicization, 24–5; and complexity, 55, 152, 166; and deletion, 132, 148, 169, 173; and WH forms, 68, 84, 97. *See also* genre, style
- relative: marker vs. pronoun, 13, 23–5, 27, 58, 120–1, 127; particles, 57–8, 63–6, 100. *See also* relativization, TH, WH
- relativization: index of, 146, 160; in Middle Scots, 69–72, 139–70 *passim*, 184–209 *passim*; in modern English, 38–51, 69, 81–99; origin of, 53–80; in pidgins/creoles, 58–9, 65–9, 103–4, 211n; primary vs. secondary strategy of, 100, 152n, 205, 207, 214, 256; and syntactic complexity, 25, 42, 99–104, 151–60; and syntactic position, 92–9, 144–8; universal grammar, 40n, 54, 99–100; WH vs. TH strategy as social/stylistic marker, 51–2, 205–9, 214, 216, 255–6, 285
- restrictive relative clause: vs. non-restrictive, 2, 43–51, 61, 71, 75, 81–90, 147, 161. *See also* non-restrictive relative clause
- resumptive: clause, 83, 131; pronoun, 68
- rhotic: vs. non-rhotic, 231–3
- RP, 231, 233
- rule order, 29, 36–7, 115–16, 222–4, 248; in copula deletion, 28, 218–21, 237; in relative clause derivation, 49, 51, 207, 220
- rule schemata, 29, 189, 194, 218, 224, 275; collapsed vs. disjoint (separate), 219, 223, 226
- rule vs. law, 281–2
- sampling: error, 88, 289; quota, 113–14, 144; random, 88, 105–14, 146; and sample size, 160n, 178
- Saussurean dichotomy: *langue* vs. *parole*, 106, 245–6, 252; paradox, 10; synchronic vs. diachronic, 289
- scientism, 251n, 282, 286–7
- Scots: Middle, 2, 13, 16, 22–6, 31, 37, 51, 58, 60, 69–72, 85, 92–102 *passim*, 105–6, 113–14, 125, 127, 131–2, 139–74 *passim*, 186–98 *passim*, 213, 241–2, 255–6; modern, 51–2, 65, 70, 137, 190, 198, 201–7, 213, 216–17, 228–34, 236–268, 285
- Scotticisms, 22, 120, 157n
- sentential antecedents (and relative clauses), 61, 67n, 84–7, 98, 136–7, 140, 147
- sex differentiation, 168–70, 206, 230–3; as factor in change, 264, 270n. *See also* change
- shadow: deletion, 215; pronoun, 135, 137
- sign language, 14, 19, 66n
- simplification: consonant cluster, 275; vs. complication, 70, 221; as factor in change, 255–68
- social class: and change, 19, 262–9; hierarchies, 124–5, 263, 267; and style, 34, 123, 166, 170, 265; and syntactic complexity, 34, 54; variables, 166, 170
- social dialects: diachronic analysis of, 2, 121; and regional, 231–2, 263; as styles, 117
- social network, 270–1, 281
- socio-historical linguistics, 2, 3, 18, 52, 105, 124; grammars, 211, 214–17
- sociolect, 11, 37, 210, 240, 262. *See also* idiolect
- sociolinguistic theory: and historical linguistics, 2, 13, 105–26, 201, 246, 285; and linguistics, 3–14, 285–9; methodology, 105–26 *passim*; vs. sociology of language, 8–9, 21, 139n, 262; status of, 1–3, 30, 122, 183, 187, 217–18, 228, 233, 237–8, 240–89 *passim*

314 *Index*

- speech community: bilingual, 30; and change, 18, 31, 170, 254, 262–4; evidence for, 15; focussed, 235n; and grammar, 11, 26, 170, 209–11, 214, 217, 224, 227, 234–7, 243, 257–9; homogeneity of, 10, 254–60; and levels of abstraction, 37; stratified, 124; study of, 106–8; as styles, 7, 117; and style shifting, 20; and variable rules, 194
- squish/squishiness: category, 83n, 85–7, 208
- stacking (of relative clauses), 38–40, 95, 102–3
- standard speech: vs. BEV, 76, 221; and change, 263, 267–8; vs. dialect, 234; and relativization, 256; and standardization, 2n; and written language, 17. *See also* non-standard speech, written language
- stereotype, 173, 176, 225, 226, 265, 285
- style: definitions, 7–8, 13, 105, 115–18; and genre, 159; isolation of contextual, 118–21, 165–70, 174n; as locus for change, 173, 212, 264–5; shifting, 209, 234, 249, 265; as variable, 2, 112–14, 131, 194
- stylistic continuum, 3, 118–20, 124–5; and complexity, 100, 121, 174–6; and diffusion, 213–14; expansion, 69, 127; marker, 140, 169–70; meaning, 32–5; in Middle Scots, 17, 22–4, 113, 157n, 159–60; stratification, 214, 256, 285
- stylistic variation: and complexity, 34, 54, 87, 100, 153, 155–65; and social class, 17, 24, 31, 32, 34, 109–10, 123, 166, 206, 209, 252, 262–9, 285; and relativization, 157–67, 195–200, 203–5
- stylistics, 3, 9, 12–13, 17, 20, 115
- subordination: vs. coordination, 24, 48n, 53–4n, 54–5n, 60n, 64–5, 73–4, 82, 83n; and subordinate clause, 50, 78; and subordinating conjunction, 59; and syntactic complexity, 42n. *See also* complementizer, embedding
- superlatives (as antecedents), 81, 88–9, 136, 143, 161–2
- syntactic complexity: and deletion, 163–4; and derivational complexity, 79, 152n, 157n; and diffusion, 212–13, 255; and distance, 102–5; index of, 152, 156–65; and mean T-unit length, 174–5; and perceptual complexity, 99, 101–4; and register, 152, 166; and relativization, 25, 99–104, 144, 146n, 148–60; and social/stylistic variation, 34, 54, 163, 168
- syntactic diffusion, *see* change
- syntactic position: as factor in relativization, 68, 81, 88, 92–104, 128, 131–2, 142, 144–8, 170–4, 191–217 *passim*, 220, 242, 255; and genitive NPs, 72, 95–7, 100–1, 161; and locative NPs, 96–7, 150, 161, 164n; and object NPs, 76–7, 93–4, 100n, 104, 147; and oblique NPs, 50, 97, 100n, 149; and predicate nominative NPs, 94–5, 144; and subject NPs, 25, 76–7, 92–3, 104, 132, 147, 167, 169–70, 172–3, 176, 181, 207, 213; and temporal NPs, 96. *See also* deletion, NP accessibility, relativization, syntactic complexity
- t/d deletion, 111, 210, 221–3, 231–2, 236–7
- taxonomy, 4, 282, 284–5
- TH: creation, 130, 189, 192–209, 220; double *that*, 75–6; forms, 2, 22, 24–5, 27n, 38, 46–51, 56–69 *passim*; insertion, 214–15. *See also* complementizer, relativization
- theories: construction of, 274; empirical, 6n, 30–1, 183, 237–8, 246–7, 252–90 *passim*; inductive, 274; and models, 3, 18, 25, 31, 53, 184, 209, 223n, 283; Trace, 213
- Transparency Principle, 79–80
- truth-value, 33–4
- Uniformitarian Principle, 122, 127
- variable, linguistic: discrete vs. continuous, 32n, 164, 228, 236; indices/scales, 164, 228, 233n; life cycles of, 127, 285; phonological, 26, 111, 221–34, 265; and stratification, 124–7, 265; syntactic, 54, 160; syntactic vs. phonological, 31–5, 113n, 243n, 268n; types of, 265–6, 284
- variable rule: and *a*-prefixing, 225; Cedergren–Sankoff program, 26–7, 173–4, 183–208; and change, 209, 216–17, 261, 267; contributions of, 29–30; and competence, 250–1; and copula, 30, 184–5, 218–21; and generative grammar, 35–6, 116, 251; and post-vocalic /r/, 230–3; and probabilities, 246–7; and relative marker, 188–209, 220; and /s/ deletion, 224; social and linguistic constraints on, 218–34; status of, 5, 223n, 270, 276–81, 284. *See also* Cedergren–Sankoff variable rule program, constraint hierarchy
- vernacular: in Belfast, 235, 261n, 268, 270–1; and change, 264, 267–8; grammar, 133; in Middle Scots, 22–4, 72, 125, 170; in modern Scots, 119–23. *See also* colloquialisms, non-standard speech
- verse: comic vs. courtly, 22–3, 176;

[More information](#)*Index* 315

- octosyllabic vs. decasyllabic, 175–6;
 rhymed vs. alliterative, 22, 175; as a
 stylistic category, 2, 16, 72, 114, 163–6,
 175–6, 180, 194. *See also* prose
- wave model (Bailey), 31, 170–4, 254n,
 261, 269; vs. variable rule, 209–11,
 252–73. *See also* implicational scales,
 variable rule
- WH: attachment, 44–6, 49, 116; forms, 2,
 22, 27n, 38–51, 59–72 *passim*, 81–99
passim, 140–74 *passim*, 184–209 *passim*;
 fronting, 45–6, 50, 189n; movement, 208,
 215. *See also* relativization
- word order, 67, 75–6, 77–9, 137, 173
- written language: and complexity, 53–5,
 64–5, 212–13, 256, 285; and deletion,
 78–9; and socio-historical reconstruction,
 122; vs. spoken, 3, 14–22, 202–3; vari-
 ation in, 13, 70–1; and *which* vs. *that*,
 137. *See also* medium
- zero clauses/relatives, *see* *ἀπό κοινῶς*,
 contact clause, deletion, ellipsis
