## Contents

<i>List of contributors</i>	<i>page</i> xiv
<i>Acknowledgements</i>	xvii
<b>1</b> Introduction <i>Harold A. Mooney, Stephen H. Bullock and Ernesto Medina</i>	<b>1</b>
<b>2</b> Dry forests of Central America and the Caribbean <i>Peter G. Murphy and Ariel E. Lugo</i>	
Introduction	9
Origin of Central America and the Caribbean islands	11
Physical environment	12
Dry forest distribution and overall structure	16
Forest function and response to seasonal rainfall	24
Use, disturbance and recovery	26
Summary	29
<b>3</b> Overview of the Brazilian caatinga <i>Everardo V. S. B. Sampaio</i>	<b>35</b>
Introduction	35
Physical environment	36
Agriculture and plant products	38
Vegetation structure and function	46
Animals	57
Summary	58
<b>4</b> Savannas, woodlands and dry forests in Africa <i>J. C. Menaut, M. Lepage and L. Abbadie</i>	<b>64</b>
Introduction	64
Distribution and main types	65

Structure and function	75
Dynamics	82
Summary	88
5 Dry forest ecosystems of Thailand	
<i>Philip W. Rundel and Kansri Boonpragob</i>	93
Introduction	93
Physical environment	94
Forest types	99
Human impacts on forest cover	116
Summary	119
6 The Cenozoic record of tropical dry forest in northern Latin America and the southern United States	
<i>Alan Graham and David Dilcher</i>	124
Introduction	124
Northern Latin America	124
Early and Mid Tertiary	126
Late Tertiary	132
Quaternary	137
Southern United States	139
Summary	141
7 Diversity and floristic composition of neotropical dry forests	
<i>Alwyn H. Gentry</i>	146
Introduction	146
Methods and study sites	147
Diversity patterns	151
Structure	159
Dispersal and pollination	164
Floristic composition	165
Endemism	184
Conclusions	189
Summary	190
8 Vertebrate diversity, ecology and conservation in neotropical dry forests	
<i>Gerardo Ceballos</i>	195
Introduction	195
Biodiversity	197
Animal responses to climatic seasonality	206
Historical biogeography	209

[More information](#)

	<i>Contents</i>	xi
Endangered species and conservation	212	
Summary	214	
<b>9 Diversity of life forms of higher plants in neotropical dry forests</b>		
<i>Ernesto Medina</i>	221	
Introduction	221	
Climatic conditions	222	
Life forms and growth forms	222	
Ecophysiological performance under natural conditions	230	
Conclusions	237	
Summary	238	
<b>10 Drought responses of neotropical dry forest trees</b>		
<i>N. Michele Holbrook, Julie L. Whitbeck and H. A. Mooney</i>	243	
Introduction	243	
Structure	244	
Physiology	254	
Phenology	261	
Summary	270	
<b>11 Plant reproduction in neotropical dry forests</b>		
<i>Stephen H. Bullock</i>	277	
Introduction	277	
Mating patterns	278	
Phenology	282	
Pollination and dispersal spectra	286	
Animal vectors	288	
Reproductive effort	291	
Summary	296	
<b>12 Plant–herbivore interactions in Mesoamerican tropical dry forests</b>		
<i>Rodolfo Dirzo and César A. Domínguez</i>	304	
Introduction	304	
Community-level analysis of folivory	305	
Community-level analysis of seed predation	314	
Effects of herbivory on plant populations and fitness	317	
Summary	322	
<b>13 Biomass distribution and primary productivity of tropical dry forests</b>		
<i>Angelina Martínez-Yrízar</i>	326	
Introduction	326

Biomass distribution	327
Litter production	332
Litter decomposition	337
Net primary productivity	340
Summary	341
<b>14 Nutrient cycling in tropical deciduous forests</b>	
<i>Victor J. Jaramillo and Robert L. Sanford, Jr</i>	346
Introduction	346
Nutrient concentration and content in biomass	348
Nutrient transfer	350
The microbial hypothesis	356
Summary	358
<b>15 Biology of the belowground system of tropical dry forests</b>	
<i>Elvira Cuevas</i>	362
Introduction	362
Soil respiration and its determinants	363
Fine root dynamics	367
Microbial populations	373
Symbiotic relationships	374
Soil fauna	377
Conclusions	377
Summary	378
<b>16 Nitrogen trace gas emissions in a tropical dry forest ecosystem</b>	
<i>Pamela A. Matson and Peter M. Vitousek</i>	384
Introduction	384
Nitrogen trace gases in the tropics	385
N <sub>2</sub> O and NO emissions from tropical dry forest	387
Annual budgets and global significance	392
Other processes and other gases	394
Ecosystem conservation and global change	395
Summary	396
<b>17 Conversion of tropical dry forest to pasture and agriculture</b>	
<i>J. Manuel Maass</i>	399
Introduction	399
Causes and patterns of forest conversion	399
Loss of biotic resources	402
Changes in the physical environment and soil	403
Changes in productivity	415
