activation rule, 250, 251, 253, 254, 256, 258, 259, 265
active memory, 150
additivity pretraining and posttraining, 186, 212
AESOP model, 3, 150, 152, 153, 164, 168, 170, 171, 175, 177
amygdala, 186, 190
anterior cingulate cortex (ACC), 186, 190, 211
artificial neural networks, 4
associability, 53, 72–5, 78–83, 85, 87, 89, 92, 94, 95, 97, 99–101, 116, 121, 144, 178, 186
associations, 2, 3, 17, 18, 20, 40–2, 48, 53, 55, 57, 73, 75, 78, 89, 90, 108, 110, 111, 114, 115–20, 125–32, 134, 135, 138–40, 142, 145, 151, 162, 166–8, 177, 186–93, 195, 196, 199, 201, 203–7, 210–12, 221, 259, 266
attention, 3, 4, 10–12, 17–20, 22, 24, 26, 27, 35–8, 41–3, 47, 49, 53, 58–61, 63–7, 101, 110, 124, 130, 179, 186–93, 195, 196, 198–204, 208, 211, 213, 224, 230, 245
awareness, 188

backpropagation networks, 12, 20
biconditional, 2, 53–8, 60, 61, 65, 67
blocking, 2, 6, 18, 54, 66, 72–5, 79, 92, 93, 95, 108–10, 113–16, 124–6, 142, 144, 145, 153, 178, 186–9, 190, 192, 196, 207–12, 237–9
brain activity, 186, 211, 214
brain lesions, 214
brain structures, 2, 4, 214
brain-imaging, 190

causal learning, 4, 186, 208
CER potentiation of defensive responses, 155
cerebellum, 4, 219, 220–7, 229–36, 238–40
climbing fiber, 222, 227–29, 232–40
cognitive mapping, 190, 259
combination of CS–CS and CS–US associations, 187
comparator hypothesis, 3, 5, 114–16, 118, 135, 145, 212
competition, 3, 5, 28, 53, 59, 60, 66, 71, 108–11, 113–16, 118, 120, 125, 132, 133, 135–7, 140, 142, 187, 207, 253
complex models, 5, 212
compound conditioning, 4, 108, 186
computational mechanisms, 3, 4, 186
computer simulations, 4, 5, 168, 173, 174, 176, 192, 195, 212, 214, 219, 220, 221, 224, 230, 231, 239, 240, 245, 256
conditional emotional response, 7
conditional-emotional tendency, 157, 171
conditioned diminution of the unconditioned response (CDUR), 150–3, 155–64, 167, 168, 171, 173, 175–8, 180, 181

More Information

conditioned emotional response (CER), 152, 156–63, 168, 170, 171, 173, 176, 180, 181, 196
conditioned inhibition, 3, 4, 54, 74–7, 89, 91, 108–11, 113–16, 118–20, 122, 125, 137–9, 142, 187, 192, 195, 238, 239
conditioned response (CR), 3, 5, 59, 60, 66, 122, 151–8, 161, 163, 164, 167, 168, 171, 173–7, 190–2, 199, 201, 205, 206, 207, 220, 222, 227, 229, 230, 237, 238, 239, 246, 248
configural mechanisms, 2, 4, 186
context, 3, 4, 7, 12–16, 23, 24, 26, 28, 29, 32, 33, 35, 37–43, 46–9, 85, 86, 96, 113, 114, 123, 127–35, 138–40, 142, 145, 150–2, 154–6, 161, 162, 175, 177–81, 186–9, 195, 196, 201, 202, 204, 211, 213, 249, 260–3
context-dependent and context-independent latent inhibition, 187
context-dependent relevance, 12–14, 22–4, 27, 31, 38, 42, 49
context-independent excitatory conditioning, 188, 201
contextual control of habituation, 179
contingency, 14, 42, 109, 113, 264
counteraction, 2, 3, 108, 118, 124–6, 132, 135, 137, 142, 144, 196
CS-processing, 72–6, 78, 79, 82, 83, 88–95, 97, 98, 166, 170
cue interactions, 2, 3, 59, 108–10, 113, 114, 116–18, 120, 124, 125, 140–2, 144

decremental effects, 3, 150, 152, 155, 180
diminished processing of expected USs, 153
discrete cues, 3, 150
discrimination, 2, 31, 49, 53–8, 60, 61, 63, 65, 67, 80–2, 85–7, 95, 97, 98, 100, 119, 122, 154, 205–7
dopaminergic, 5, 253, 256
dorsolateral prefrontal cortex (dlPFC), 186, 190–2, 211
drug administration, 214

elemental, 57, 61, 67, 109, 140, 144, 145, 209
emergent properties, 187, 214
emotive modulation, 176, 177
equilibrium, 235–7, 239, 240
error, 10, 11, 16, 21–4, 27, 36, 37, 41, 43, 46, 54, 60, 75–9, 82–4, 89–91, 93, 95, 110, 111, 116, 118, 120, 121, 123, 132, 134, 192, 226–9, 235
error-driven learning, 227, 229
evaluation, 6, 152, 212, 233
evolution, 1, 2, 10, 11, 26, 27, 33, 36, 37, 39, 41, 42
excitatory learning, 76, 90, 153, 166, 167
explanation, 6, 7, 12, 18, 101, 102, 129, 138, 139, 192, 208, 213, 225, 238
external inhibition, 59
extinction, 4, 73, 78, 109, 112–19, 121, 124, 130–4, 142, 145, 151, 152, 155, 179, 180, 186, 187, 189, 192, 195, 196, 199–202, 204, 205, 211, 213, 221, 222, 230, 237–9, 266
extradimensional shift, 18, 19, 80, 81
eyeblink conditioning, 7, 150, 153, 155, 164, 168, 171
eyelid conditioning, 4, 59, 219–25, 227, 229, 230, 238

feedback system, 187, 226

gain control, 61, 62
generalization, 54–6, 67
genetic algorithm, 12, 26, 27, 33
Golgi cell, 231–3
granule cell, 231, 232, 233, 234, 237, 239

habituation, 3, 49, 150–3, 178–82
highlighting effect, 11, 12, 17, 18, 24, 26, 35, 46, 47
hill climbing, 123, 124, 134
hippocampus, 73, 74, 92
human contingency learning, 72, 97, 98, 100–2
human fear conditioning, 190
hybrid modeling, 2, 71, 75, 77, 89, 101–3

imagination, 187
imitation, 6, 213
inhibitory, 3, 55, 56, 58, 60, 62, 74, 76–8, 89–92, 94,

110, 113, 116, 140, 142, 166, 167, 189, 192, 193, 196, 199–202, 204, 205, 207, 211, 213, 234, 235, 237, 251, 252, 253
inhibitory contextual conditioning, 189
inhibitory learning, 74, 76, 90, 166
insula, 186, 190, 191, 211
integrate and fire, 232
interactions between latent inhibition and overshadowing, 196
intradimensional shift, 18, 19, 80, 81

latent inhibition, 4, 6, 18, 100, 101, 114, 127–9, 135–8, 142, 145, 178, 179, 186–8, 190, 195, 196, 198, 199, 254
learned attention, 1, 12, 26, 35, 36, 40, 44
learning, 1, 2, 4, 5, 7, 10–13, 16–24, 27, 29–33, 36–8, 41–4, 46–9, 53, 55, 56, 60, 61, 66, 67, 71–80, 82, 83, 85–103, 108, 109, 111–13, 118, 119, 130, 132, 145, 150, 153, 154, 166, 167, 178, 180, 191, 195, 219–22, 224–30, 233–40, 245, 256, 259
learning (storage), 190
learning rate, optimal, 12, 23, 24, 26, 44
lesions, 6, 73, 74, 92, 179, 222, 229, 230, 239
limiting term for CS–US associations, 189
long-term habituation, 3, 150–3, 155, 177–9, 181

Mackintosh model, 57, 71, 80, 82, 83, 85, 88, 98, 191, 244
mediated acquisition, 190
mediated changes in attention, 190
mediated extinction, 190
moment-to-moment basis, 187
multiple mechanisms, 73, 75, 88, 212, 214

negative transfer, 71, 82–5, 87, 89, 100, 102
neural activity, 214
neural network, 4, 186, 204, 212, 250, 254, 256, 259
neurotransmitters, 214
normalisation, 61–3, 67
novelty system, 187
number of parameters, 212

occasion setting, 2, 4, 186, 205, 206, 212
operant, 4, 5, 244–9, 251, 256, 258, 260, 262, 264–6
overshadowing, 4, 6, 54, 59, 108–10, 112–14, 116, 131, 135–8, 140–2, 145, 186, 187, 190, 196, 198, 199, 211

parametric experimental studies, 214
parsimony, 5, 6, 101, 102, 212
patterning, 2, 53–8, 60, 61, 65, 67
Pearce and Hall model, 2, 5, 71, 79, 81–5, 91, 98, 99, 101, 102, 187, 191, 195, 244
perception, 13, 187
performance (retrieval), 190
plasticity, 219, 220, 230, 233–6, 240
positive transfer, 71, 80, 83–5, 89, 99, 100, 102
priming, 151, 152
Priming theory, 177
Purkinje cell, 230, 233–7, 239, 240

receptive field, 62
recovery from blocking, 4, 115, 186, 190, 196
recurrent inhibition, 166, 167
renewal, 130, 199
Rescorla–Wagner model, 17, 53–7, 66, 71, 88, 110, 111, 116, 117, 120, 122, 124, 127, 144, 191, 208, 209, 237–9, 244
respondent, 4, 244, 245, 246, 248, 249, 251, 256, 258, 260, 262, 263, 265, 266
response, 4, 5, 11, 17, 29, 30, 32, 33, 36, 38, 54, 59, 61, 66, 67, 101, 109, 111, 112, 114, 118, 119, 122, 123, 132, 134, 151–4, 156–8, 161–3, 166, 168, 170, 171, 173–81, 191, 195, 200, 204, 205, 221, 222, 224, 226, 229, 230, 231, 233, 234, 235, 237, 239, 246, 247, 248, 260, 262, 264, 266, 267
response divergence, 168
response form, 4, 186, 205, 207
response-potentiating tendency, 3, 150
retrieval, 13, 120, 187, 190, 212, 245, 259
