INDEX OF AUTHORS & SUBJECTS

Abel transform, 45–6, 108, 110, 283
absorption, sound, *see* attenuation
action, 44–7, 137–8, 283, 383
  fractional, 46–7, 104, 110–11
  perturbed, 55, 76–8
  polar, 44,
  temperate, 45
adaptive methods, 181, 322
adiabatic profile, *see* profile, polar
adiabatic range dependence, 136–8, 158–60, 334–6
adjoint methods and solutions, *see* Pontryagin principle
Agnon, Y., 386, 402
Airy solution, 105
Aki, K., 40, 45, 260, 283, 402
Akulichev, V. A., 341, 402
Alexander, S. S., 417
altimetry, 28, 314, 324, 352, 366
ambiguity, 51, 70–4, 206, 358–9
  up/down, 86–8, 257, 299, 366
AMODE-MST (Acoustic Mid-Ocean Dynamic Experiment-Moving Ship Tomography), 26, 347, 369, 374, 402
Anderson, B. D. O., 322, 402
Andregev, N. N., 404
Angell, J. B., 195, 403
antipodal, 157, 328, 332, 339–41
Armstrong, M., 263, 402
array, vertical, 11, 80, 100, 131, 179–81, 202, 215, 342
  beam-forming, 180–1, 202, 353
  directivity index of, 180
  gain, 176, 179–81
arrival angle, vertical, 202–4, 363
Arthnari, T. S., 276, 402
assimilation, *see* state estimation
Athanassoulis, G., 421
attenuation, 176–7, 327, 357
ATOC (acoustic thermometry of ocean climate), 352, 361
AVATAR (advanced vertical array tomographic acoustic receiver), 373–4

Backus, G. E., 224, 402
Baggeroer, A. B., 302, 332, 342, 369, 402, 415
bandwidth
  critical, 72
  equivalent noise, 178
  half-power, 174, 187
  rms, 186, 197–9, 363
Barker, P. H., 411
baroclinic, 7, 129, 155, 268, 291, 353
  Rossby wave, *see* Rossby waves
  tide, *see* tide, internal
barotropic, 7, 129, 132–3, 166, 378–9
  Rossby wave, *see* Rossby waves
  tide, *see* tide, surface
barrier depth, 168–72
barrier method, 267
Barth, N. H., 287, 402
baseband signal, 190
Bayesian estimation, 224
beam forming, *see* array, beam-forming
Beckerle, J. C., 355, 412
Behringer, D., 406
Bell, T. G., 357, 403
Bengtsson, L., 306, 403
Bennett, A. F., 224, 275, 403
Benveniste, J., 408
Bermuda, 10, 200, 210, 323, 328, 330–1, 336, 339, 341, 358–9, 362–3
Betts, D. B., xii
Bezdeck, H., 361
