

CONTENTS

<i>Preface</i>	<i>page xi</i>
<i>Notation</i>	<i>xiii</i>
1. THE TOMOGRAPHY PROBLEM	1
1.1. Ocean Acoustics	2
1.2. The Forward and Inverse Problems	9
1.3. Vertical Slice: A Numerical Example	17
1.4. Horizontal Slice	22
1.5. Estimation through Time	27
1.6. Testing	27
1.7. Comparisons and Comments	28
2. THE FORWARD PROBLEM: RANGE-INDEPENDENT	30
2.1. The Ocean Sound Channel	31
2.2. Sound-Speed	33
RAY REPRESENTATION	38
2.3. Ray Theory	38
2.4. Ray Diagram	40
2.5. Action Variable	44
2.6. Structure of Ray Arrivals	47
2.7. Ray Weighting	51
2.8. Ray Perturbations	52
2.9. Parametric and Functional Perturbation	56
MODE REPRESENTATION	59
2.10. Modes	59
2.11. WKBJ Approximation: Ray/Mode Equivalence	63
2.12. Modal τ , z -display	67

viii	CONTENTS	
2.13. Ambiguity Relations		70
2.14. Modal Perturbations		74
2.15. Perturbation Models		83
	OBSERVATIONS	93
2.16. Observations		93
	APPENDIX	103
2.17. Polar (Adiabatic) Profile		103
2.18. Temperate (Canonical) Profile		106
	3. CURRENTS	115
3.1. Ray Theory in an Inhomogeneous Moving Medium		116
3.2. Travel-Time Perturbations		120
3.3. Geostrophic Flow		122
3.4. Circulation, Vorticity, and Divergence		122
3.5. Nonreciprocity		126
3.6. Reciprocal-Transmission Experiments		129
	4. THE FORWARD PROBLEM: RANGE-DEPENDENT	136
4.1. Adiabatic Range Dependence		137
4.2. Loop Resonance		139
4.3. Mesoscale Variability		147
4.4. Internal Waves		147
4.5. Ray Chaos		154
4.6. Modes in a Range-Dependent Profile		158
4.7. Horizontal Refraction		164
	5. OBSERVATIONAL METHODS	173
5.1. The Sonar Equation		176
5.2. Pulse Compression		183
5.3. Travel Time		197
5.4. Vertical Arrival Angle		202
5.5. Doppler		204
5.6. Timekeeping		206
5.7. Positioning		209
5.8. Data Treatment		215
	APPENDIX	218
5.9. Binary m -sequences		218

CONTENTS		ix
6. THE INVERSE PROBLEM: DATA-ORIENTED		222
6.1. Introduction		222
6.2. Representation		223
6.3. Least-Squares		228
6.4. Singular-Value Solution and Decomposition		238
6.5. Gauss-Markov Estimation		257
6.6. Variant Linear Methods		275
6.7. Recursive Solutions		278
6.8. Nonlinear Problems and Methods		279
6.9. Inversions in Practice		287
6.10. Summary Comments		297
7. THE INVERSE PROBLEM: MODEL-ORIENTED		303
7.1. Introduction: The Use of Models		303
7.2. State Estimation and Model Identification		306
7.3. State Estimation: Practice		310
7.4. Extensions: Control, Identification, and Adaptive Methods		319
8. THE BASIN SCALE		323
8.1. Climate Variability		324
8.2. Some Experimental Considerations		327
8.3. A Brief Historical Review		328
8.4. Low-Frequency Propagation at Very Long Ranges		334
8.5. Refracted Geodesics		336
8.6. Spheroidal Caustics		340
8.7. Mode Stripping and Repopulation		341
8.8. Basin Reverberation		343
8.9. The Future of Basin-Scale Tomography		345
EPILOGUE. THE SCIENCE OF OCEAN ACOUSTIC TOMOGRAPHY		346
APPENDIX		355
A: A Personal Chronicle		355
B: Ocean Acoustic Propagation Atlas		382
<i>References</i>		402
<i>Index of Authors & Subjects</i>		424
