Preface to the second edition	<i>page</i> ix
Introduction	xi
PART A	
Prelude and themes: Synthetic methods and results	
1 Spherical geometry	3
2 Euclid	12
Euclid's theory of parallels	19
Appendix: <i>The Elements</i> : Book I	24
3 The theory of parallels	27
Uniqueness of parallels	28
Equidistance and boundedness of parallels	29
On the angle sum of a triangle	31
Similarity of triangles	34
The work of Saccheri	37
4 Non-Euclidean geometry	43
The work of Gauss	43
The hyperbolic plane	47
Digression: Neutral space	55
Hyperbolic space	62
Appendix: <i>The Elements</i> : Selections from Book XI	72
PART B	
Development: Differential geometry	
5 Curves in the plane	77
Early work on plane curves (Huygens, Leibniz, Newton, and Euler)	81
The tractrix	84
Oriented curvature	86
Involutives and evolutes	89
6 Curves in space	99
Appendix: On Euclidean rigid motions	110
7 Surfaces	116
The tangent plane	124
The first fundamental form	128
Lengths, angles, and areas	130
7 ^{bis} Map projections	138
Stereographic projection	143

viii	<i>Contents</i>	
	Central (gnomonic) projection	147
	Cylindrical projections	148
	Sinusoidal projection	152
	Azimuthal projection	153
8	Curvature for surfaces	156
	Euler's work on surfaces	156
	The Gauss map	159
9	Metric equivalence of surfaces	171
	Special coordinates	179
10	Geodesics	185
	Euclid revisited I: The Hopf–Rinow Theorem	195
11	The Gauss–Bonnet Theorem	201
	Euclid revisited II: Uniqueness of lines	205
	Compact surfaces	207
	A digression on curves	211
12	Constant-curvature surfaces	218
	Euclid revisited III: Congruences	223
	The work of Minding	224
	Hilbert's Theorem	231
PART C		
Recapitulation and coda		
13	Abstract surfaces	237
14	Modeling the non-Euclidean plane	251
	The Beltrami disk	255
	The Poincaré disk	262
	The Poincaré half-plane	265
15	Epilogue: Where from here?	282
	Manifolds (differential topology)	283
	Vector and tensor fields	287
	Metrical relations (Riemannian manifolds)	289
	Curvature	294
	Covariant differentiation	303
	Riemann's <i>Habilitationsvortrag</i> : On the hypotheses which lie at the foundations of geometry	313
	Solutions to selected exercises	325
	Bibliography	341
	Symbol index	351
	Name index	352
	Subject index	354
