

## Contents

Chapter I. INTRODUCTION	<i>page</i> 1
Description of certain statistical terms	1
Notation	2
References	4
Use and abuse of statistical methods	5
Chapter II. AVERAGES	6
The arithmetic mean	6
The median	11
The mode	12
Chapter III. SCATTER OR DISPERSION	16
The range	16
The inter-quartile range	16
The mean deviation	17
The standard deviation	17
The coefficient of variation	21
Chapter IV. THE NORMAL AND BINOMIAL DISTRIBUTIONS	24
Testing the normality of a distribution	27
The binomial distribution and the calculation of probabilities	30
Chapter V. SIGNIFICANCE OF MEAN AND DIFFERENCE BETWEEN MEANS	36
Significance of a single mean	37
Significance of the difference between means: large samples and small samples	39
Variance differences: the variance ratio	45
Significance of the difference between proportions	46

viii	CONTENTS	
Chapter VI. CORRELATION		<i>page</i> 50
Product-moment correlation when $N$ is small		52
Product-moment correlation when $N$ is large		55
The diagonal summation method		58
Significance of product-moment correlation : standard error of $r$		61
Significance of the difference between two correlations		63
Mean of several values of $r$		65
Partial correlation		66
Significance of a partial correlation coefficient		67
Chapter VII. OTHER METHODS OF CORRELATION		69
The ranking method: (a) Spearman's coefficient		69
(b) Kendall's coefficient		71
Significance of $\tau$		74
Partial rank correlation		75
Biserial correlation		75
Fourfold correlation		80
Chapter VIII. REGRESSION AND THE CORRELATION RATIO		81
Graphic construction of regression lines		81
Testing the linearity of regressions		85
The correlation ratio		91
Chapter IX. $\chi^2$ : CONTINGENCY : GOODNESS OF FIT		93
Contingency		94
$2 \times 2$ tables		99
Yates's correction		101
Alternative method of calculation		101
$2 \times n$ tables		102
Goodness of fit		105
Curve fitting		108
Logarithmic curves		111
Polynomials		113

CONTENTS	ix
Chapter X. RANKING AND THE AGREEMENT OF JUDGES	<i>page</i> 116
Paired comparisons: the coefficient of consistence	116
Significance of $\zeta$	119
Tied preferences	119
The case of $m$ judges: coefficient of agreement	119
Significance of $u$	123
Combination of several rankings	123
Coefficient of concordance	124
Significance of $W$	126
 Chapter XI. INTRODUCTION TO ANALYSIS OF VARIANCE	 129
Fundamental nature	129
One-way classification	131
Two-way classification	137
Three-way classification	140
$n$ -way classification	146
 ANSWERS TO EXERCISES	 148
APPENDIX A. Table of $\sqrt{\{n_1 \cdot n_2(n_1 + n_2 - 2)/(n_1 + n_2)\}}$	153
APPENDIX B. Curve showing values of $N$ necessary for different values of $r$ to be significant	157
APPENDIX C. Table of values of $6/N(N^2 - 1)$ for different values of $N$	158
APPENDIX D. Squares of numbers from 1 to 99	159
APPENDIX E. Numerical material for exercises	160
APPENDIX F. Values of $n(n - 1)(2n + 5)$ for different values of $n$	163
APPENDIX G. Values of $t(t - 1)(t - 2)$ for different values of $t$	164
APPENDIX H. Values of $mn(m - 1)(n - 1)/4$ for different values of $n$ and $m$	165

Cambridge University Press
