CONTENTS

<i>Preface</i>	xi
1 Auxin receptors	1
<i>K. R. Libbenga, A. C. Maan, P. C. G.v.d. Linde and A. M. Mennes</i>	
1.1 Introduction	1
1.2 Membrane-bound binding sites	3
1.3 Receptors that are not membrane-bound	33
1.4 Theory and criteria	48
1.5 References	59
Appendix: abbreviations	67
 2 Ethylene receptors	 69
<i>M. A. Hall</i>	
2.1 Introduction	69
2.2 Early studies on ethylene binding	69
2.3 Characterization of the ethylene-binding site in <i>Phaseolus vulgaris</i> L.	72
2.4 Subcellular location of ethylene-binding sites in <i>Phaseolus vulgaris</i> L.	78
2.5 Studies on solubilized ethylene-binding proteins	80
2.6 Is the ethylene-binding site in <i>Phaseolus vulgaris</i> a receptor?	82
2.7 The relationship between ethylene-binding and ethylene-metabolizing systems	84
2.8 References	87
 3 Gibberellin receptors	 91
<i>John L. Stoddart</i>	
3.1 Introduction	91
3.2 Characteristics of the gibberellin response	91
3.3 The soluble-receptor hypothesis	100
3.4 Interactions of gibberellins with insoluble components	105

vi

3.5	Conclusions	110
3.6	References	111
4	The biochemistry and physiology of cyclic AMP in higher plants	115
	<i>Russell P. Newton and Eric G. Brown</i>	
4.1	Introduction	115
4.2	Occurrence of cAMP in higher plants	119
4.3	Phosphodiesterase	127
4.4	Adenylate cyclase	131
4.5	cAMP-binding proteins	133
4.6	cAMP and the physiological processes of higher plants	135
4.7	Discussion	139
4.8	References	145
5	Receptors for cell communication in <i>Dictyostelium</i>	155
	<i>Peter C. Newell</i>	
5.1	Introduction	155
5.2	Cell-surface cAMP receptors	156
5.3	Comparison of folate and cAMP receptors	178
5.4	Further outlook	179
5.5	References	180
6	Receptors in slime mould cell adhesion	185
	<i>C. M. Chadwick, J. E. Ellison and D. R. Garrod</i>	
6.1	Introduction: the cellular slime moulds	185
6.2	The functions of cell adhesion in animals	187
6.3	The functions of cell adhesion in slime moulds	188
6.4	Molecular basis of slime mould cell cohesion	191
6.5	Slime mould lectins	203
6.6	The interplay of contact sites	206
6.7	The nature of adhesive mechanisms	207
6.8	References	209
7	The plasma membrane of higher plant protoplasts	217
	<i>L. C. Fowke</i>	
7.1	Introduction	217
7.2	General structure and chemistry	217
7.3	Protoplast fusion	221
7.4	Physiology of the plasma membrane	224
7.5	Plasma membrane outer surface	227
7.6	Plasma membrane inner surface	230
7.7	Summary	233
7.8	References	235

vii

8	Cell recognition and adhesion in yeast mating	241
	<i>Clinton E. Ballou and Michael Pierce</i>	
8.1	Overview of the yeast mating reaction	241
8.2	Organization of the yeast cell wall	241
8.3	Structures of yeast cell wall components	242
8.4	Yeast sex pheromones	244
8.5	Yeast cell recognition and adhesion	246
8.6	References	251
9	Cell-surface receptors in the pollen-stigma interaction of <i>Brassica oleracea</i>	255
	<i>H. G. Dickinson and I. N. Roberts</i>	
9.1	Introduction	255
9.2	Sequence of events following pollination	256
9.3	Receptors on the stigma surface	260
9.4	Receptors in the pollen	265
9.5	Towards a molecular model	269
9.6	Conclusions	275
9.7	References	275
10	Receptors in host-pathogen interactions	281
	<i>Julie E. Ralton, Barbara J. Howlett and Adrienne E. Clarke</i>	
10.1	Introduction	281
10.2	Fungal pathogens	283
10.3	Principles of cell–cell recognition	291
10.4	Recognition in host–pathogen interactions	294
10.5	Requirements for defining host–pathogen relationships in molecular terms	305
10.6	Approaches to defining resistance and avirulence gene products	307
10.7	Conclusions	310
10.8	References	311
11	Receptors for attachment of <i>Rhizobium</i> to legume root hairs	319
	<i>Frank B. Dazzo</i>	
11.1	Introduction	319
11.2	Bacterial attachment	320
11.3	Regulation of the attachment process	326
11.4	Concluding remarks	331
11.5	References	331
12	Possible functions of plant lectins	335
	<i>Mark A. Holden and Michael M. Yeoman</i>	
12.1	Introduction	335
12.2	Definition of the term ‘lectin’	335

viii

12.3	Detection and assay of lectins	336
12.4	Structure of lectins	338
12.5	Location of lectins	339
12.6	Lectin receptors in plants	342
12.7	Possible functions of plant lectins	346
12.8	Concluding remarks	357
12.9	References	359
	<i>Index</i>	369
