- A^1 -homotopy, ix
- $A^r(X)$, 4
- Abel–Jacobi map, 5, 27
- Abel–Jacobi theorem, 3
- additive group
 - formal, 74
- admissible monomorphism or epimorphism, 46
- $\text{Alb}(X)$, Albanese variety of X , 9
- Albanese kernel, 11, 59
- Albanese variety, 5, 9
- algebraic cycle, 3
 - algebraically equivalent to zero, 5
 - effective, 3
 - rationally equivalent to zero, 5
- algebraic surface, 9
- applications, xx
- Artin–Hasse exponential, 73
- Artin–Hasse zeta function, 97
- artinian k -algebra, 71
- bad reduction, 80
- Beilinson–Soulé conjecture, xi
- big Witt ring, 73
- Bloch’s conjecture on zero-cycles, xii, 17
- Bloch’s conjectured filtration on Chow groups, xii, 16
- Bloch–Kato conjecture on special values of L -functions, xix
- Bloch–Kato–Milnor conjecture, viii
- Bloch–Ogus spectral sequence, 52
- Bockstein map, 66
- Borel–Moore cohomology theory, 51
- Brauer group, 81, 94
- $\text{CH}^r(X)$, Chow group, 4
- Châtelet surface, 83, 89
- characteristic sequence theorem, 48
- Chern character, 66
- $\chi^{\text{Gröss}}$, Grössencharakter, 119
- Chow group, 4
 - finite dimensional, 21
 - higher, xi
 - of zero-cycles, 79
- Chow motive, xi
- conductor, 118
- conic bundle, 29, 80, 89
- coniveau filtration, xvii, 66
- corestriction, 63
- crystalline cohomology, 76
- cubic surface, 89
- cycle class map, xv
- cycle map, 41, 97
- cyclic homology, xvii
- degree map, 69, 79
- Deuring’s theory, 119
- devissage theorem, 48
- de Rham cohomology, 50
- Dieudonné ring, 73
- diophantine questions, xviii
- $\text{Div}(X_0, \mathbb{F}^r)$, 88
- divisor, 3
- effective motive, x
- Eichler norm theorem, 80, 90
- elliptic curve, 100
- étale cohomology, 50
- exact category, 45
- Fano surface, 14
- filtration on Chow groups, 16
- finite-dimensional Chow group, 21
- finitely generated projective modules, category of, 46

- formal curve, 74
- $\widehat{\mathbf{G}}_a$, formal additive group, 74
- \mathbf{G}_m , multiplicative group, 37
- $\widehat{\mathbf{G}}_m$, formal multiplicative group, 74
- Galois symbol, 63, 91
- geometric motive, x
- Gersten resolution, xv, 50, 69
- Godeaux surface, 13
- good reduction, 86
- Größencharakter, 119
- Griffiths group, xvi
- Grothendieck's standard conjectures, xii
- \mathcal{H} , Zariski sheaf, 52
- Hasse–Weil L -function, xv, xix
- Hodge filtration, xiv, 25, 40
- Hodge structure
 - polarized of weight two, 5
- hyperelliptic surface, 13
- incidence correspondence, 27
- intermediate jacobian, xiv, 5, 25, 37
- isogeny, 28
- jacobian, 4
 - intermediate, xiv, 5, 25, 37
- K-cohomology, xv, xvii
 - infinitesimal structure, 70
- K-theory, 45
 - Milnor, ix
- K-theory sheaf
 - analytic, 69
- $\mathcal{K}_2^{\text{an}}$, analytic K-theory sheaf, 69
- Kähler differential, 71
- Künneth projectors, xii
- localization theorem, 48
- ℓ -power torsion subgroup, 61
- Milnor ring, xvi, 89
- Milnor–Bloch–Kato conjecture, xvi
- mixed Hodge structure, xiv, 40
- mixed motive, xii
- motive
 - Chow, xi
 - effective, x
 - geometric, x
 - mixed, xii
- motivic cohomology, ix, xvii
- multi-zeta numbers, xx
- multiplicative group, 37
 - formal, 74
- Mumford's theorem, 13
- Murre's conjecture, xii
- Néron–Severi group, 14
- Néron–Severi torus, 80
- nerve (of a small category), 45
- nilpotence conjecture, xii
- Nisnevich topology, ix
- noetherian scheme, 48
- $\text{NS}(S)$, Néron–Severi group of S , 14
- period, 4, 105
- $\text{Pic}(S)$, Picard variety of S , 14
- Picard variety, 5, 14
- plus construction, Quillen's, 46
- presheaf, viii
 - with transfers, viii
- pro-representable functor, 72
- Prym variety, 27
- quantum field theory, xx
- quartic threefold, 25
- Quillen K-theory, 45
- rational surface, 79
 - split, 85
- regulator, xv, xviii, xix
- regulator formula, 120
- resolution theorem, 48
- Riemann–Roch theorem, 3
- Roitman's theorem, 59
- scissors congruence, xviii
- singular cohomology, 50
- site, 52
- Soule's conjecture on zeta functions, xx
- split rational surface, 85
- Steinberg group, 47
- Steinberg symbol, xvi, 47
- symbol map, 70
- $T(Y)$, Albanese kernel of Y , 11
- tame symbol, 88, 91, 98
- theorem of the hypersquare, xiii, 18
- torsion in the Chow group, xvii, 59
- trace morphism (on étale cohomology), 64
- transfer map, 65
- “trivial” curve, 98
- valuation map, 88
- vanishing cycle, 34
- weight filtration, xiv, 40
- Witt vector cohomology, Serre's, 76
- Zariski sheaf, 52, 62
- zeta function, xviii
