Zenezini, Maurizio, 170

## Subject index

- activities analysis, 92–3, 102, 150  
 adaptability, 28, 98, 105, 112, 123, 148, 171–3, 178  
 administrative activities, *see* service processes  
 aircraft industry, 20, 81  
 alterability, 171  
 applied analysis, 4, 81, 85–6, 99–102, 137–8, 190  
   based on interviews, 100, 104–5,  
 appropriability of technology, 20, 22  
 artisan production, *see* production  
 automation, 103, 181, 185–6, 190, 194–5  
   flexible, 95, 174, 185–6  
   rigid, 174–6, 178, 185  
 automobile industry, 70, 81, 183  
  
 Babbage's factory principle, 63–4  
 batches (lots, runs), 1, 27, 74, 95, 106, 110, 140, 174, 180, 183–4, 191  
 bounded rationality, 165  
 business unit, *see* production unit  
  
 capital  
   depreciation of machines and premises, 82–3, 90–1, 105–8, 114, 126, 150, 172  
   locked-up, 82–3, 91, 105–6  
 of different vintages, 33, 87–8, 90–1, 107, 151  
   working capital, 181  
   *see also* degree of use of funds and technical change, capital-embodied  
 classic economists, 5, 14  
 clock industry, 183–4  
 coefficients of production, 13, 28–30, 88, 92  
 complementarity of goods and processes, 28–31, 93  
   and fixed coefficients, 28–30  
   and productive capacity, 30  
   and returns or economies of scale, 137, 142–4, 146–7, 151, 156  
  
   and team production, 29  
   and technical change, 30–1, 137–9, 143  
 computer-based technology, 4–5, 42, 98, 102–3, 113, 121, 123, 127, 130, 138–40, 154–5, 166, 171, 176f., 192ff.  
 CAD (computer-aided design), 75, 187  
 CAM (computer-aided manufacturing), 75, 185, 187, 194  
 CIM (computer-integrated manufacturing), 185–6, 193  
 FMS (flexible manufacturing system), 194  
 contingency theory, 43  
 convertibility, 171  
 costs of production, 4–5, 13, 27, 31–2, 39, 70, 72, 79, 81–3, 90–2, 98, 105–15 and *passim*, 123, 126, 141ff., 158ff., 170ff. *passim*  
   methods of collecting data on, 139, 150–2  
   *see also* economies of scale, returns to scale, sunk costs, transaction costs  
  
 decomposability of an elementary process, 68–72, 75–80, 85–9, 91–3, 104, 109, 139, 152, 154  
 defective products, 93–4, 98, 109  
 degree (intensity) of use of funds or microeconomic units, 13, 55–64 and *passim*, 82, 88–91, 112, 141, 147, 156  
 demand  
   for labour, *see* employment.  
   of inputs and/or outputs, 15, 21–2, 27, 90, 93–6, 98, 101–2, 123, 144, 172, 174, 179, 180, 187, 193  
 development path of a production unit, 31, 34–6, 143, 146, 149, 181, 186  
   *see also* learning processes, practical knowledge, specificity  
 differentiation of product, 101, 106–7, 143, 170, 172, 176–7, 182  
 diffusion of new techniques, 9

## 220 Subject index

- dimension of scale, *see* scale of production  
 discontinuity of cost curves, 65  
 diseconomies of scale, 162ff.  
 division of labour, 13, 15, 35, 37–42, 44–7  
   *passim*, 88, 93, 161, 175, 177  
   and idle times, 46–7  
   and specialization, 38–9, 45  
   and specificity of resources, 39  
   and skill, 39  
   social and technical, 38  
 duration of an elementary production  
   process, 55–65 *passim*, 72–6, 79–80,  
   88, 93–6, 106, 110, 140, 146–7, 166,  
   181, 186–7, 190–1  
   gross duration, 73–5, 79, 93–5
- economically indivisible unit, 26–8, 54,  
 86–8, 110  
*see also* indivisibility  
 economies of scale, 1, 4, 6, 10, 18, 66, 93,  
 137–9, 146ff., 158–62, 181, 183,  
 189–90  
   and flexibility, 172–5, 181–5  
   and market conditions, 150, 161–2  
   and perfect competition, 146–7  
   and technical change, 141, 149, 161,  
   174–5  
   cross-section analysis of, 148  
   engineering estimates of, 150–2  
   statistical analysis of, 150  
   time-series analysis of, 148–9  
*see also* returns to scale  
 economies of scope, 4, 6, 76, 172–4, 181,  
 183–5, 190  
 educational level, 87, 94, 96, 111, 113, 118,  
 124, 131  
*see also* training  
 efficacy, 34, 37, 95–8, 140–1, 157, 177,  
 187–91 *passim*  
 efficiency, 5–6, 14, 34, 37, 43–5, 95–8, 101,  
 139–42, 148–9, 156–7, 162, 171–7  
*passim*, 187–91 *passim*  
 elementary production process, 54–65,  
 77–8, 87–90, 94, 104, 107–8, 110  
 elementary technical unit, 23, 54–65,  
 74–80, 82f., 85ff., 107, 110, 112, 149,  
 152  
 elements of production, *see* flows and  
 funds  
 employment, changes in 96, 102, 109, 115,  
 117, 120, 126, 123, 130, 134, 140, 163,  
 167–70, 181, 188–9  
 enterprise, *see* firm  
 entrepreneur,  
   characteristics and the specificity of firm,  
   2, 35, 111–12, 150, 157, 161, 171, 185  
   economic choice of, 1, 30, 144, 148, 172  
   innovative, 22  
 entry barriers, 185  
 environmental conditions, 1–2, 35, 42–4,

## Subject index

221

- static (short-run), 168
- strategic, 168, 171, 187
- technical, 168ff.
- technological, 168
- wage, 167, 170
- flexible specialization, 138, 152, 168, 183
- flows, 23–7, 54–8, 75–8, 83, 87–9, 109ff.
  - limitational, 29–30, 187
- freedom of choice and agent's power, 10
- functions of time, 55–8, 75–8, 82, 85, 90
- fund–flow model, *see* flows, funds, matrix of production elements, organizational scheme, quantitative and temporal matrix
- funds, 23–7, 54–65 *passim*, 75–8, 82–91 *passim*, 109ff., 169, 172
- game theories and innovative activities, 9
- goods in progress (products in process), 24, 69–74 *passim*, 82–3, 87–9, 91–2, 94–5, 109–10, 187, 190
- high-technology activities, 179
- indivisibility of goods and processes 10, 15, 18, 25–9, 93, 144–5, 161
  - and fixed coefficients, 28–30
  - and idle time, 27, 60–5
  - and productive capacities, 27–8, 37, 60–7, 93, 144, 152–5
  - and returns or economies of scale, 28, 137–9, 144–6, 151, 158–61
  - and team production, 29, 88
  - and technical change, 137–9
  - economic, 26–8, 54, 86–8, 110
  - in relation to time, 27
  - technical, 26–8, 54, 148
- industrial districts, 66
- industrial economics, 3, 101
- industrial organization models, 18, 140, 184, 189–90
- industrial production, *see* production
- information technology, *see* computer-based technology
- innovations, 9, 15–19, 100, 105, 112–13, 116, 120–2, 126–8
  - centripetal or centrifugal, 155
  - difficulties in, 116, 122, 127, 130, 185–6
  - see also* technical change
- inputs, *see* flows and funds
- input–output analysis, 13, 88, 102
- institutional environment, *see* environmental conditions
- interest rate, 82–3, 90, 105, 114, 126
- intermediate goods, *see* semi-finished goods
- intermediate stages (sub-processes), 5, 15, 23, 44–6, 68–72, 75–88 *passim*, 91–5 *passim*, 97, 102–3, 108–9, 111, 113–14, 123, 139, 144–6, 152ff., 158–61, 173, 180, 182
- inventories, 15, 24, 27, 55, 72, 74, 82–3, 87–9, 91–2, 94–5, 105–6, 109–10, 144, 160, 166, 172–81 *passim*, 183, 186–91 *passim*
  - organizational, 72–4, 78, 83, 87–8
  - technical, 72–3, 78, 83, 87–8, 94
- investments, 1, 4, 123, 144–9 *passim*, 158, 166, 185, 187
  - see also* entrepreneur
- irreversibility
  - of economic decisions and flexibility, 137, 165
  - of production conditions, 30, 32–4
  - of sunk costs, 27, 172
  - of technical change, 3, 32–4, 143
  - of time, 2, 32–3, 93, 137, 149
  - see also* time, historical
- isoquants of production, 2, 33, 149–50
  - see also* coefficients of production, production function
- jobs, 29, 38–40, 46, 96–7, 111, 113, 140, 166–9, 175–6, 188–9
- joint production, *see* production
- just-in-time, *see* production
- Kaban system, 180, 192–3
- Keynesian policies 175
- Kondratief's long waves, 175
- labour force, *see* workers
- labour market, 86, 96, 140, 167, 169–70, 188, 190–1
  - see also* employment, flexibility, unemployment
- labour organization, 2, 5, 13–15, 18, 29, 35, 38ff. *passim*, 41, 96–7, 99, 103, 111, 118–19, 123–5, 130–3, 169, 174–6, 181–2, 190
  - see also* division of labour, jobs, production organization, skills, tasks
- large-scale flexible production, 184, 189
- learning processes, 3, 18–19, 31, 34, 37, 39–41, 100, 134, 143, 145, 149, 155, 183, 186
  - and practical knowledge, 34–5
  - and specificity of resources, 40
  - see also* training
- limitational flows, 29–30, 187
- loading and unloading operations, 72–3, 93, 97–8, 110–12, 114, 123, 192

## 222 Subject index

- machines, 87, 94, 97–8, 110, 112, 160, 169, 172, 174, 181, 194  
 specialized, 169, 174–5, 178  
 speed of, 74, 80–1, 87, 90, 94, 97, 123, 139, 155, 186  
 wear and tear, 24, 88, 90  
 maintenance operations, 24, 72–3, 87–8, 91, 93, 97–8, 108, 110–12, 192  
 management studies, 3, 5  
 manufacturing accounting, 86, 91, 100–1, 113–14, 151, 161  
 mark-ups, 91–2, 108, 111, 113–14, 126  
*see also* profits  
 market structure, 2–3, 9, 15, 18, 45–6, 102, 144–7, 150, 161–2, 170, 176, 184  
 marketing, *see* service processes  
 mass production, *see* production  
 matrix of production elements, 3–4, 75–8, 82, 85, 90, 100, 151  
 method of production, *see* techniques  
 microeconomic unit, 23, 139, 147ff. *passim*, 169ff. *passim*  
 microelectronics, *see* computer-based technology  
 mode of production, 14, 18  
 multi-production, *see* production
- neo-institutional approach, 9
- occupational positions, 96, 106, 140, 188  
 oligopoly, theories of, 145–6  
 operational level, 24, 139, 144, 151ff., 172–3  
 organization of labour, *see* labour organization  
 organization of production, *see* production organization  
 organizational scheme, 53, 85–6, 90–9, 102, 104ff. *passim*, 118–19, 124–5, 131–3, 140, 178, 190–1  
 organizational systems (models), 18, 41–3, 146, 166, 170–1, 174–5, 178, 180–1, 189–90  
 outputs, *see* flows
- patents, 20, 99–100  
 performances of outputs, 80–1, 90  
 plants, 4, 23, 150, 152–3, 158ff., 173  
 specialized, 178  
*see also* machines, microeconomic unit, costs  
 practical (concrete) knowledge, 34–5, 97, 122, 143, 186  
 premises (real estate), 91, 105–7, 112  
 prices, 12, 74, 82–3, 90–2, 113, 115, 120, 126, 143, 145–7, 155, 162–3, 167, 170, 176
- process operator, 41, 188  
 product mix, 86, 98, 101, 105, 107, 121, 150, 168, 171–83 *passim*, 193  
 production  
 artisan (craft), 13, 35, 44–6, 51, 140, 143, 177, 183–4, 189  
 asymmetries in, 10  
 fundamental characteristics of, 10–14  
 industrial, 13, 35, 44–6, 51, 140, 143, 177–8, 183–4, 189  
 joint, 56, 76–7  
 just-in-time, 74, 178–80, 192–3  
 line, 13, 61–5, 88  
 mass, 174–5, 184–5, 189  
 multi-, 76–7, 107, 173, 178  
 organization, 1ff., *passim*, 5, 12–18 *passim*, 27, 29, 35, 38ff., 55, 60–5, 69–75, 83, 88, 90, 92–5, 97, 99, 105–6, 108, 123, 127, 130, 134, 139, 141–2, 147, 150ff., 161, 166ff. *passim*, 192ff.  
 parallel, 60–5, 87–8, 106, 108, 110, 139, 147, 155  
 qualitative, quantitative and organizational aspects of, 1ff. *passim*, 12–17 *passim*, 35–6, 41–4, 75, 85, 100, 105–6, 110, 127, 139, 142–3, 147, 149, 157, 161, 166ff. *passim*, 188  
*see also* large-scale flexible production, organizational systems, small-scale flexible production  
 production elements, *see* flows and funds  
 production function, 17, 19, 21, 33–4, 43, 80, 99, 139, 142, 150, 166, 187, 190  
*see also* isoquants of production  
 production matrix, *see* quantitative and temporal matrix  
 production process, and technical change, 1–3, 9–10, 13, 16–18, 51  
 cross section analysis of, 52  
 decomposable, 68–72, 75–80  
 ex-ante analysis of, 36–7, 54, 75, 78  
 ex-post analysis of, 37, 54, 78  
 historical series analysis of, 52  
 organized elementary, 54, 60–5, 74–80, 82ff., 87ff., 104ff.  
 simple elementary, 54–60, 63  
 vertically integrated, 68  
*see also* production organization  
 production unit, 13, 15, 23–4, 31–5 *passim*, 43, 91–3, 106–7, 109ff. *passim*, 115ff., 139, 141, 150, 168ff. *passim*  
 size of, 5, 12, 14–15, 27–8, 37, 55, 92–3, 99, 139, 141ff. *passim*, 162ff., 184  
 specialized, 178  
*see also* microeconomic unit

- productive capacity, 1, 27–8, 36, 55–67  
*passim*, 91, 93, 106–7, 110, 139, 144, 147ff., 158ff., 173, 180, 183  
 balancing different, 14, 27–8, 30, 37, 74, 156

 and limitational flows, 29–30
- products in process, *see* goods in progress
- profits, 31, 92, 175  
*see also* mark-ups
- property rights, 10, 42
- pull production system, 193
- qualitative characteristics of goods and processes, 14–15, 19, 45, 79–82, 86–7, 90, 92–6, 98, 103–5, 108–9, 112, 116, 120–3, 127, 130, 138, 142–4, 166, 181, 187, 190–1  
*see also* production, qualitative, quantitative and organizational aspects of
- quantitative and temporal matrix (production matrix), 52, 85–92, 99ff, 104ff. *passim*, 117, 122, 128–9, 140, 190–1
- R&D (research and development), 16, 20, 99–100, 127, 151, 161, 179
- reliability of products, 41, 81, 93
- returns to scale 6, 32, 137ff., 142ff., 163, 170  
 and complementarity, 137, 142–4, 146–7, 151, 156  
 and decomposability, 146  
 and economic growth, 146  
 and indivisibility, 28, 137–9, 144–6, 151  
 and perfect competition, 45–6, 145–6  
 and the duration of the production process, 146
- revenue functions, 79, 82–3, 90
- scale of production, 5–6, 28, 65–7, 93, 137–9, 141ff., 158ff., 175, 181, 184  
*see also* economies of scale, firm size, production unit size, returns to scale
- sector studies, 53
- semi-finished (intermediate) goods, 15, 69–74, 88, 95, 110, 167, 192–3  
 in inventories, *see* inventories, in progress, *see* goods in progress
- service processes, 41, 83, 91, 96, 105, 108, 110, 151, 153, 161, 164, 173, 176, 181–2, 188, 190, 193
- services of funds, *see* funds
- shifts, 15, 96, 113, 121–3, 130, 147, 181, 187, 190
- skills and professional abilities, 10, 29, 34–5, 38–40, 96–7, 109, 111, 113, 117, 163, 169, 174–6, 181, 185, 188, 190–1  
 and flexibility, 97, 167–9  
 and industrial district, 66
- small-scale flexible industrial production, 184, 189
- specialization, 10, 38–9, 45, 97, 111, 142, 161, 163, 174–5, 178, 183, 189
- specific-product economies, 71
- specificity  
 of firm, 171, 181, 186  
 of knowledge, 34–5, 38–9  
 of resources, 10, 15, 29, 35, 39–40, 175  
 of technical changes, 3, 34–5
- stocks  
 differences between stocks and funds, 24–5, 57–8  
*see* inventories
- sub-contracting relationships, 27, 66, 71, 92, 102, 106, 109–12, 114–15, 120, 123, 126, 172–4, 178
- sub-processes, *see* intermediate stages
- sunk costs, 27, 162, 172
- tasks, 39, 41–3, 96–7, 111, 123, 166–9, 175, 182
- Tayloristic models, 18, 42–3, 174–5
- team-production, 88, 161  
 and marginal productivity, 29
- technical change  
 and demand, 14, 21  
 and demand-pull theories, 21  
 and economic growth, 9, 146  
 and flexibility, 15, 166, 168, 177–8, 190  
 and international trade, 9  
 and moral hazard, 20  
 and qualitative changes, *see* qualitative characteristics of goods and processes  
 and returns or economies of scale, 18, 138, 141, 145, 149, 161, 174–5  
 and technical progress, 12  
 and technological opportunities, 2, 14, 21–2, 37, 186  
 and technology-push theories, 21  
 and the representation of production process, 1–3, 9–10, 13, 16–17, 82, 99–102, 138, 189
- capital-embodied, 103, 113, 116, 121, 127
- effects of, 1ff. *passim*, 15, 37, 83, 86, 88–9, 96, 99, 101–3, 109, 116, 122–3, 137, 139, 143, 188
- goods-in-progress-cost-saving, 83, 92

## 224 Subject index

- inputs-cost-saving, 83, 90, 92
- inputs-saving, 4, 78, 89–90, 92, 130, 187
- locally progressive or regressive, 78
- organizational-inventory-cost-saving, 83, 92
- organizational-inventory-saving, 4, 78, 89–90, 92, 187
- radical or incremental, 18–21 *passim*, 34, 103, 109, 113
- technical-inventory-cost-saving, 83, 92
- the nature of, 2–3, 16ff., 31–6 *passim*, 100, 138, 186
- time saving, 4, 78, 83, 89–90, 92, 187  
*see also* computer-based technology, development path of a production unit, innovation, labour organization
- techniques, definition, 18  
 changes in *see* technical change  
 coexistence of different, 36, 143, 189–90  
*see also* practical knowledge
- technological paradigm (regime), 20–2, 81
- technological system, 21
- technological (natural) trajectory, 21, 81
- technology, 19–20, 34, 90, 171, 177, 179, 186, 188–9 *see also* computer-based technology, technical change
- textile industry, 69, 74, 102–3, case studies on, 104ff.
- textile machinery industry, 116, 121
- time
  - and technical change, 4, 31–3, 78, 83, 89–90, 92, 187
  - delivery, 70–3, 75, 95–6
  - financial, 74
  - historical, 2, 31–3, 93, 137, 149
  - idle, 13, 15, 27, 37, 46–7, 55–65 *passim*, 97–8, 107, 112, 114, 123, 140, 166, 177, 183, 188–9, 191
  - loading, 72–3, 93, 97, 110–12, 114, 192
  - logical, 2, 31–2
  - maintenance, 24, 72–3, 93, 97–8, 110–12, 192
  - net machine time, 130, 192
  - net process (gross machine), 72–4, 78, 93–5, 106–7, 110, 112
  - presence, 60
  - process, 31, 73–4, 78–83 *passim*, 87, 89, 93–6, 121, 123
  - profile of production, 1, 5, 12–17 *passim*, 47, 72ff. *passim*, 89, 92–3, 99–100, 139–41, 147, 157, 187, 189–91
  - response, 73–5, 79, 93–6, 110, 140, 143, 181, 187, 190–1
  - set-up (switching machines), 72–3, 93, 97, 110–12, 114, 140, 166, 174, 180–3, 186, 190–2
  - total process, 79
  - utilization, 60, 97, 111–13, 147
  - working, 73–4, 93–5  
*see also* development path of a production unit, duration
- training, 39–9, 45, 96–7, 111, 113, 130, 134, 157, 167, 183
