## Contents

---

Preface	page vii
Paul Erdős: The Man and the Mathematician (1913–1996) <i>Miklós Simonovits and Vera T. Sós</i>	ix
A Selection of Problems and Results in Combinatorics <i>Paul Erdős</i>	1
Combinatorial Nullstellensatz <i>Noga Alon</i>	7
Connectedness, Classes and Cycle Index <i>E. A. Bender, P. J. Cameron, A. M. Odlyzko and L. B. Richmond</i>	31
A Tutte Polynomial for Coloured Graphs <i>Béla Bollobás and Oliver Riordan</i>	45
Notes on Sum-Free and Related Sets <i>Peter J. Cameron and Paul Erdős</i>	95
Geometrical Bijections in Discrete Lattices <i>Hans-Georg Carstens, Walter A. Deuber, Wolfgang Thumser and Elke Koppenrade</i>	109
On Random Intersection Graphs: The Subgraph Problem <i>Michał Karoński, Edward R. Scheinerman and Karen B. Singer-Cohen</i>	131
The Blow-up Lemma <i>János Komlós</i>	161
The Homomorphism Structure of Classes of Graphs <i>Jaroslav Nesěřil</i>	177
Problem Collection of the DIMANET Mátraháza Workshop, 22–28 October 1995	185
