---

- amplification factor, 36, 50, 84
- Ansatz, 112
- area element, 107
- asymptotic analysis, 112
  
- Bel-Robinson tensor, 103
- Bianchi equations, 103
- bicharacteristic, 23
- black hole, 39, 113
- blowup, 112
- blowup criterion, 79
- boundary terms, 35
  
- Christoffel symbols, 18
- Codazzi equation, 71
- commutation formula, 59
- commutation lemma, 85
- conformal energy, 4, 53
- conformal energy inequality, 4, 53, 58
- conformal Killing, 32
- connexion, 17
- curvature tensor, 66
  
- $d'$ Alembertian, 21
- decay estimate, 100
- deformation tensor, 31
- div-curl system, 73
- divergence, 19
- dual, 10
- dual basis, 11
- dual form, 41
- dual tensor, 103
  
- eikonal equation, 12
- Einstein equations, 102, 112
  
- electric field, 41
- elliptic systems, 71
- ellipticity, 73
- energy, 34, 49
- energy inequality, 2, 29, 33, 92, 104
- energy-momentum tensor, 29, 43, 103
- exterior derivative, 41
  
- frame coefficients, 24, 68
- future oriented, 30
  
- geodesic, 22
- geodesic cone, 23
- ghost weight, 47, 92
- global existence, 94, 96
- good commutation condition, 61
- good components, 110
- good derivatives, 2, 45
- gradient, 5, 10
- Gronwall lemma, 35
  
- harmonic coordinates, 109
- Hessian, 21
- hyperbolic, 1
- hyperbolic rotations, 61
- hyperbolic symmetric systems, 81
  
- improved energy inequality, 47, 110
- incoming light cones, 5
- indices, 8
- induced connexion, 20
- induced metric, 20
- induction, 104
  - on time, 79, 84, 95, 97
- induction hypothesis, 78, 86, 95
- interior terms, 35

*Index*

- Kerr metric, 10, 13
- Killing field, 32
- Klainerman inequality, 3, 57
- Klainerman method, 57, 101
- Lie derivative, 31, 63
- lifespan, 87
- Littlewood–Paley theory, 99, 108
- local existence theory, 79
- Lorentz fields, 2
- Lorentzian metrics, 9
- low regularity well-posedness, 99
- magnetic field, 41
- Maxwell equations, 41, 51, 63
- metric, 5, 8
- metric connexion, 17
- Minkowski metric, 9
- mixed transport–elliptic system, 75
- modified Lie derivative, 106
- modified Lorentz fields, 61
- modified optical function, 98
- Morawetz inequality, 38
- multiplier, 29
- nonstandard 2-spheres, 15
- null, 30
- null condition, 90
- null frame, 4, 12
- optical function, 5, 12, 24, 68, 104
- outgoing light cones, 5
- past oriented, 30
- Penrose diagram, 9
- photon sphere, 39
- Poincaré inequality, 40
- pointwise decay, 58
- Poisson bracket, 40
- positive field, 38
- positivity property, 30, 43, 104
- principal symbol, 23
- quasilinear wave equation, 80, 89, 96
- quasiradial frame, 14
- Ricci tensor, 66
- scalar curvature, 66
- Schwarzschild metric, 9, 13, 39
- second form, 20
- slow time, 111
- spacelike, 30
- sphere foliation, 15, 69
- spherical harmonics, 40
- stability of Minkowski space, 102, 108
- Stokes formula, 21
- Strichartz inequality, 100
- submanifold, 20
- symmetric systems, 80
- tensor, 10, 18, 31, 71
- timelike, 30
- trace, 11, 19
- transport equation, 68
- trapped surface, 113
- volume form, 11
- wave equation, 6
- weak null condition, 112
- weighted inequality, 36, 48
- Weyl field, 103
