

## Index

- aerofoil, 77
- Archimedes principle, 1
- ballerina effect, 67
- Bernoulli function, 55, 61
- Bernoulli's equation, 83
- Bernoulli's theorem, 54, 55, 56
- boundary conditions, 10
  - dynamic, 84, 94
  - kinematic, 84, 94
- boundary layer, 23, 50, 52, 75, 76, 77
- buoyancy, 1
- capillary waves, 95
- circulation, 67, 77, 78, 79
- conservation of mass, 28, 40
- continuity equation, 28, 41
- contour, 43
- Couette flow, 16, 17, 76
- cyclonic flow, 67
- d'Alembert's paradox, 73, 74
- dispersion relation, 86
- divergence theorem, 58
  - generalised, 58
- drag, 4, 8, 47, 74
  - on a sphere, 8, 47
- drag coefficient, 75
- dynamic pressure, 40, 46
- dynamic viscosity, 4, 5, 8, 22
- error function, 21
  - complementary, 21
- Euler equations, 48
- Euler method, 31
- Eulerian picture, 38
- flow separation, 74, 75
- form drag, 75
- gravity current, 4, 5, 25
  - axisymmetric, 35
  - experiment, 8
  - numerical solution, 33
  - scaling, 25, 27
  - similarity solution, 27, 29
  - two-dimensional, 25
  - volume flux, 26, 28
- group velocity, 86, 87, 90, 91, 92
- horses heads, 97
- hydrostatic pressure, 39
- incompressibility, 40, 50
- instability, 92
- irrotational flow, 67, 71
- Kelvin's Circulation Theorem, 67
- Kelvin-Helmholtz instability, 92
- kinematic viscosity, 19, 22
- Kutta condition, 78
- Lagrangian derivative, 38
- Lagrangian picture, 38
- Lagrangian tracer, 38
- Laplace's equation, 71, 72, 84
- Legendre polynomials, 72
- lift, 77, 79, 80

- Magnus force, 80  
 mass conservation, 28, 40  
 mass conservation equation, 41  
 material derivative, 37, 38  
 modulation, 91  
 momentum equation, 9, 10  
 momentum integral, 57, 59
- Navier–Stokes equation, 37, 38, 42  
   scaling, 45, 46, 47, 48  
 no-slip condition, 3, 11  
 normal mode, 93  
 normal stress, 3
- parallel flow, 9  
   steady, 11  
   unsteady, 10, 18, 24  
 path line, 39  
 phase speed, 86, 87  
 point vortex, 78  
 Poiseuille flow, 13, 14, 16, 17, 42, 46, 76  
   two-dimensional, 12, 17  
 potential flow, 71  
   circulation, 79  
   d’Alembert’s paradox, 73, 74  
   energy conservation, 83  
   force, 73  
   past a sphere, 71, 73  
 pressure, 3  
   dynamic, 40, 46  
   hydrostatic, 39  
 pure straining flow, 49, 64
- Reynolds number, 46, 47, 48  
   high, 50, 53, 54, 74, 75  
   low, 50  
 Rossby radius, 67  
 Runge Kutta method, 31
- scaling, 25  
 scaling analysis, 27  
 separation, 74, 75  
 shear, 4  
 shear layer, 92, 93  
   instability, 92  
 shear stress, 3, 4, 6  
 ship wakes, 88  
 shooting method, 32  
 similarity solution, 20, 27, 29  
 similarity variable, 21  
 skin friction, 75  
 solenoidal velocity field, 41  
 stagnation point, 49  
 stagnation-point flow, 49, 55  
 stationary phase, 92  
 Stokes equations, 47  
 Stokes stream function, 43, 73  
 strain-rate tensor, 64  
 straining flow, 63, 64  
 streak line, 39  
 stream function, 42, 43, 44  
 stream line, 39, 43  
 stress  
   normal, 3  
   shear, 3, 4, 6  
   tensor, 37  
 suffix notation, 57  
 surface tension, 95  
 swirl, 43
- tsunami, 88  
 turbulence, 97, 98
- vector potential, 42  
 velocity potential, 71  
 viscosity, 1, 6  
   dynamic, 4, 5, 8, 22  
   kinematic, 19, 22  
   measurement, 6  
 viscous boundary layer, 23, 50, 52, 75, 76,  
   77  
 viscous gravity current, 4, 5, 25  
 viscous shear stress, 3, 6  
 volume flux, 13, 14, 18, 26, 45  
 vortex, 78  
 vortex stretching, 66  
 vorticity, 65, 97  
   dissipation, 68  
   generation, 68  
 vorticity equation, 65
- wake, 88  
 wave number, 85  
 wavelength, 85  
 waves, 84  
   dispersion relation, 86  
   group velocity, 87  
   phase speed, 87
