<i>Preface to the second edition</i>	<i>page</i> ix
<i>Preface to the first edition</i>	xi
<i>Introduction</i>	xiii
Part I General Theory	1
1 Preliminaries	3
1.1 Some Homological Algebra	3
1.2 Semistable Sheaves	10
1.3 The Harder-Narasimhan Filtration	15
1.4 An Example	20
1.5 Jordan-Hölder Filtration and S-Equivalence	23
1.6 μ -Semistability	25
1.7 Boundedness I	29
2 Families of Sheaves	34
2.1 Flat Families and Determinants	34
2.2 Grothendieck's Quot-Scheme	40
2.3 The Relative Harder-Narasimhan Filtration	48
Appendix	
2.A Flag-Schemes and Deformation Theory	51
2.B A Result of Langton	58
2.C Further comments (second edition)	61
3 The Grauert-Mülich Theorem	63
3.1 Statement and Proof	64
3.2 Finite Coverings and Tensor Products	69

vi	<i>Contents</i>	
3.3	Boundedness II	75
3.4	The Bogomolov Inequality	79
	Appendix	
3.A	ϵ -Stability and Some Estimates	82
3.B	Further comments (second edition)	87
4	Moduli Spaces	89
4.1	The Moduli Functor	90
4.2	Group Actions	91
4.3	The Construction — Results	98
4.4	The Construction — Proofs	104
4.5	Local Properties and Dimension Estimates	112
4.6	Universal Families	117
	Appendix	
4.A	Gieseker's Construction	121
4.B	Decorated Sheaves	122
4.C	Change of Polarization	126
4.D	Further comments (second edition)	132
	Part II Sheaves on Surfaces	141
5	Construction Methods	143
5.1	The Serre Correspondence	145
5.2	Elementary Transformations	151
5.3	Examples of Moduli Spaces	154
	Appendix	
5.A	Further comments (second edition)	164
6	Moduli Spaces on K3 Surfaces	166
6.1	Low-Dimensional ...	167
6.2	... and Higher-Dimensional Moduli Spaces	175
	Appendix	
6.A	The Irreducibility of the Quot-scheme	184
6.B	Further comments (second edition)	187
7	Restriction of Sheaves to Curves	193
7.1	Flenner's Theorem	193
7.2	The Theorems of Mehta and Ramanathan	197
7.3	Bogomolov's Theorems	204

<i>Contents</i>	vii
Appendix	
7.A Further comments (second edition)	212
8 Line Bundles on the Moduli Space	213
8.1 Construction of Determinant Line Bundles	213
8.2 A Moduli Space for μ -Semistable Sheaves	220
8.3 The Canonical Class of the Moduli Space	232
8.4 Further comments (second edition)	236
9 Irreducibility and Smoothness	239
9.1 Preparations	239
9.2 The Boundary	241
9.3 Generic Smoothness	242
9.4 Irreducibility	243
9.5 Proof of Theorem 9.2.2	245
9.6 Proof of Theorem 9.3.2	251
10 Symplectic Structures	255
10.1 Trace Map, Atiyah Class and Kodaira-Spencer Map	256
10.2 The Tangent Bundle	262
10.3 Forms on the Moduli Space	264
10.4 Non-Degeneracy of Two-Forms	267
Appendix	
10.A Further comments (second edition)	271
11 Birational properties	272
11.1 Kodaira Dimension of Moduli Spaces	272
11.2 More Results	277
11.3 Examples	281
Appendix	
11.A Further comments (second edition)	287
<i>References</i>	290
<i>Glossary of Notations</i>	316
<i>Index</i>	321
