Acknowledgments

Many persons have contributed to the successful completion of this study. My greatest debts are to John Whitney Hall, A. Whitney Griswold Professor of Far Eastern History at Yale University. He supervised the dissertation phase of this study, offered valuable criticism of the form and content of that early version, and has been a regular source of advice and encouragement since its completion. In Japan, I was privileged to study with Professor Miyamoto Mataji, formerly of the Faculty of Economics, Ōsaka University, and now of Kansai Gakuin University. Professor Miyamoto offered an inexhaustible source of bibliographic assistance and an introduction to the community of Japanese economic historians. Professor Sakudō Yōtarō, of the Faculty of Economics, Ōsaka University, provided assistance with documentary problems during my dissertation research. Professor Uda Tadashi, now of Otemon University, and Mr Takahashi Kyūichi, now at Kōbe University, kindly helped with my study of Tokugawa Japanese. Professor Yasuoka Shigeaki of Dōshisha University was of invaluable assistance with problems of interpretation associated with both the thesis and this monograph. He, and other members of the Miyamoto group, offered encouragement and assistance during my studies at Ōsaka University in 1965–6 and in subsequent visits to Japan in 1969 and 1972.

At the University of Michigan I have benefited from the ideas of Professors Richard K. Beardsley, Robert E. Cole, Gary Saxonhouse, Yoshihara Kunio, Albert Feuerwerker, Ernest P. Young, Roger F. Hackett, and countless others. Professor Cole kindly read drafts of Chapters 6, 7, and 8 and offered helpful suggestions for revision. Professor Bernard Susser, of Northern Illinois University, read the dissertation version of this study and offered useful suggestions for revision. Professor E. S. Crawcour, of Australian National University, provided interpretive and bibliographic insights. His own work on Tokugawa economic history first attracted me to this area of involvement. Many others offered their time and suggestions for this monograph. The officers of Cambridge University Press provided useful critiques of the original manuscript and had the patience and confidence to wait for the present version, and the staff edited and improved the overall presentation.

This, like all long-term undertakings, would never have been completed without financial assistance. My parents provided encouragement and generous support during my years of graduate study. Yale University

supported me for several years and the United States Educational Commission in Japan provided a Fulbright Fellowship for two years of study in Japan. The Center for Japanese Studies of the University of Michigan provided several summer fellowships and support for a three-month stay in Japan in 1969. The Horace H. Rackham School of Graduate Studies, University of Michigan, assisted with research grants to cover the cost of typing and other expenses and supported a six-week stay in Japan in 1972. During the academic year 1971-2, the National Endowment for the Humanities awarded a Younger Humanist Fellowship, Grant Number F-71-233, which enabled me to pursue the writing and research of this study full-time. Without this year of uninterrupted work this monograph might never have been completed.

Fundamental to this study was the availability of an excellent Japanese library at the University of Michigan. I owe a great debt to the past and present staff of the Asia Library, University of Michigan, for their development of this remarkable collection. Other collections used in the United States included the Orientalia Division of the Library of Congress, the Asia Library of Yale University, and the Harvard Yenching Library. In Japan, my major research was done at the National Diet Library in Tōkyō. In addition I used the Ōsaka University Library, the Ōsaka Prefectural Library, the Ōsaka Municipal Library, and the library at the Ōsaka Chamber of Commerce and Industry. I also had access to the personal collections of Professor Miyamoto Mataji, Sakudō Yōtarō, Horie Yasuzō, and Yasuoka Shigeaki. I am extremely grateful for the assistance I received from each of the above collections.

The maps included in this study were prepared by Professor Robert D. Robertson of Wittenberg University. The manuscript was typed by Mrs Marguerite Schaible. Proofreading was assisted by Robert Borgen, James McClain, and Susan Lester Hauser.

All those who offered support and encouragement for this study could not possibly be enumerated. I am grateful for their interest, but assume full responsibility for all errors of content and interpretation contained in the final result.

W.B.H.
