## ACKNOWLEDGMENTS

---

In writing this book I was helped by a number of institutions and individuals. My research was supported by a National Science Foundation fellowship; a Josiah Macy, Jr. Foundation fellowship; and grants from the Milton Fund of the Harvard Medical School and the Social Science Research Council. I was assisted by members of the staffs of various libraries, including the John M. Olin Library, Cornell University; the Missionary Research Library; the United Presbyterian Church in the U.S.A., Board of Foreign Missions Archives; the University Research Library, University of California, Los Angeles; and the Widener, Houghton, and Countway Libraries, Harvard University.

My greatest intellectual debts are to Everett Mendelsohn and Barbara Gutmann Rosenkrantz. Without their aid and comfort I would not have been able to write the book I have written. I have also benefited from the advice of the following persons, who were kind enough to read my manuscript in its entirety: Donald L. M. Blackmer, Loren Graham, Gerald Holton, Kenneth Keniston, Kenneth Manning, and Leo Marx. Over the years many other friends and colleagues have contributed to my work: Mary Anderson, Richard Burkhardt, Yehuda Elkana, John K. Fairbank, David Farquhar, Robert Frank, Philip Huang, Robert K. Merton, Robert S. Morison, Paul Rosenkrantz, Tilman Spengler, Arnold Thackray, Leon Trilling, Ezra Vogel, and John Weiss. Peter Lynch was an excellent research assistant. Richard Ziemacki provided invaluable editorial assistance. The Program in Science, Technology and Society at MIT arranged for the typing of the manuscript.

This book is dedicated to my parents, but it owes a great deal to my wife, Barbara. She put up with what must have seemed an endless project, caught many of my more egregious lapses of logic, and helped me repress at least some of my enthusiasm for excessively convoluted argument.

Cambridge, Massachusetts  
January 1980

Peter Buck
