Acknowledgements

This book is based on a thesis which earned the degree of Ph.D. from the University of London. It was made possible through a most generous scholarship from the University of Alexandria to whom I wish to record here my very warm gratitude. I also wish to express my thanks to the University of Oxford and St Antony's College for granting me leave of absence for the academic year 1970/1, thus enabling me, among other things, to get this work ready for publication. To the governing body of St Antony's College I owe the further debt of a grant to help cover the typing expenses.
