Preface ix

Section 1 – Clinical surgery in general

- 1 **Clinical surgery
in general** 1
 - Suture materials 1
 - Diathermy 3
 - Skin preparation and
asepsis 5
 - Laparoscopy: the basics 6
- Section 2 – Thorax
- 2 **Applied surgical
anatomy** 9
- 3 **Applied surgical physiology:
cardiovascular** 14
 - Important equations in cardiac
physiology 14
 - Starling's law of the heart 15
 - The cardiac cycle and coronary
circulation 17
 - The mechanics of breathing,
ventilation and airway
management 21
- 4 **Surgical approaches
to the chest** 28
- 5 **The mediastinum and
diaphragm** 30
 - Disorders of the thoracic aorta:
aneurysms and dissection 30

Thoracic aortic dissection 31
 The diaphragm 34
 Diaphragmatic herniae:
 pathophysiology and
 treatment 34
 Hiatus herniae:
 pathophysiology and
 treatment 35

- 6 **The breast: benign and
malignant disease** 38
 - Benign disease 38
 - Breast cancer: diagnosis,
investigation and
management 39

Section 3 – Trunk

- 7 **Applied surgical
anatomy** 47
 - The peritoneal cavity 49
 - The foregut 49
 - The midgut 51
 - The hindgut 52
 - The abdominal aorta 53
 - The anus 54
 - The liver 56
- 8 **Applied surgical
physiology** 59
 - Swallowing 59
 - Defecation 60
 - Micturition 61
