INDEX

- Arrhenius
 biographical, 107
 on electrolytic dissociation, 112
 Atomic number, 129
 Atomic weights, 27
 Atomicity, *see* p. 43 and *under* Frankland
 and Kekulé
 'Aufbau-prinzip' (Bohr), 152
- Baeyer, A. von, hydro-aromatic compounds, 66–71
 Basicity, *see under* Kekulé
 Benzene, constitution
 Kekulé, 57–62
 Claus, Ladenburg, 66, 68
 Baeyer, 71
 Thiele, 73
 present day, 173
- Berzelius
 biographical, 16
 dualistic theory, 23–5
 on the laws of chemical proportions, 21, 26
 on the heats of chemical change, 19–21
- Bohr, 'aufbau-prinzip', 152
 electronic constitution of inert elements, 142
 theory of the hydrogen atom, 141
- Born, interpretation of wave function, 149
- Broglie, Louis de, concept of 'matter waves', 147
- Caloric, 5
- Cannizzaro, influence at Karlsruhe Congress, 14, 28
- Capillarity of salt solutions, 110
- Carbon monoxide, 36, 47, 165, 169–71
- Chemical symbols
 crossed, 52
 origin, 16
- Conjugated systems (Thiele), 72
- Co-ordination compounds
 Werner, 116–21
 Sidgwick, 138–40
- Co-ordinate link, 139
- Couper
 biographical, 44–6
 valency principles in organic chemistry, 47–50
- Covalency
 associated with diamagnetism, 140
 definition, 135
 due to shared pairs of electrons, 133
 shared electrons in binuclear orbits, 141
- Crum Brown, 39
- Cyclo-octatetrene, 74
- Dalton
 biographical, 3–5
 and Gay-Lussac's law, 13
 graphical formulae, 11
 law of partial pressures, 6
 rules of chemical combination, 7, 8
 use of chemical models, 12
- Davy, Sir Humphrey
 chemical action electrical in nature, 17, 18
 construction of voltaic battery, 17
 influence of Volta's discovery, 16
- Depression of freezing point (salt solutions), 111
- Dirac, 158
- Dualistic theory, 23, 107
- Elastic fluid (gas), static concept, 5–6
- Electrolysis
 early examples, 18
 interpretation of laws, 126–7
 Maxwell's views, 127
- Electrolyte solutions
 capillarity, 110
 chemical equilibrium in, 113
 depression of freezing point, 111
 dissociation in, 112, 119
 electrical conductance, 110, 112
 exchange of radicals, 108, 110, 112
- Electron
 concept, 127
 negative, 128; delocalization, 173; diffraction, 148; shells, 130; spin, 145, 160; states in diatomic molecules, 164; sub-groups in shells, 142–3; wave function, 149–51
- Electrovalency (Kossel), 129–32

INDEX

- Equipollency (salt solutions), 108, 112
- Ethylenic linkage, 37, 41, 59, 72, 97, 98, 100
- Exchange energy (quantum-mechanical), 158, 160, 165
- Exclusion principle (Pauli), 145, 157, 159
- Faraday, on atomic theory, 125
- Frankland, biographical, 29
comment on Cannizzaro's principle, 14
concept of latent 'atomicity', 37
enunciation of principle of valency ('atomicity'), 31, 32, 34
on graphical formulae, 38
valency of carbon, 34-8, 41, 42
- Gerhardt, 46, 47, 50
atomic weights, 52
- Gmelin's equivalents, 28
- Graphical formulae
of Dalton, 11
of Crum Brown, 38-42
of Couper, 49
of Kekulé, 59
Williamson's opinions, 39
- Heats of formation, of molecules from atoms, 154, 171
- Heisenberg, 125, 158, 172
- Heitler and London
hydrogen molecule, 155-7
inertness of helium, 157
- Helmholtz, on laws of electrolysis, 126
- Hoff, van't
biographical, 94
electrolytic dissociation, 107
stability of racemates, 93
stereochemistry of nitrogen, 100
three-dimensional formulae and the existence of optical activity, 97
- Hund, molecular orbitals, 166
- Hydrogen molecule (valency bond method), 155-7
- Ionic theory, Arrhenius, 107
- Isosterism, 136
- Johnstone Stoney, concept of electron, 127
- Karlsruhe Congress, 14, 27, 28, 51
influence of Cannizzaro, 28
- Kekulé
atomic models, 61
biographical, 50
concept of constant valencies ('atomicities'), 56
constitution of aromatic compounds, 57-62
graphic formulae, 60
Kekulé-Feier (1890), 63
molecular compounds, 57, 82
quadrivalency ('tetrabasicity') of carbon, 54
valency incorporated in the type theory, 52-4
- Körner, 65
- Kossel
diatomic molecules of gaseous elements, 131
electrovalency, 129-31
- Langmuir
isosterism, 136-7
'octet' theory, 136
- Larmor, 128
- Le Bel
biographical, 94
formulae of organic compounds related to optical activity, 95
- Lewis, G. N.
'Cubical' atom, 132-5
diamagnetism of compounds, 140, 157
electron-sharing in pairs, 133
postulates on chemical union, 132
- London, electronic theory of covalency, 160-3
- Mendeleef
biographical, 79
periodic law, 80
review of valency theory, 82
The Principles of Chemistry, 86
- Meyer, Lothar
biographical, 28, 87
periodic variation of atomic volume, 87
- Molecular asymmetry (dissymmetry), 93, 95, 98
- Newlands
biographical, 77, 79
law of octaves, 78
- Nitric oxide, 165, 169
- Nucleus atom, 128-30

INDEX

- Octet theory, 136
 'Odd electron' molecules, 133, 140, 165, 171
 Odling, 51, 53
 on confusion in atomic weights, 27
 Optical activity, 91
 applications, 100, 104, 121
 Ostwald, 108
 dilution law, 113
 Oxygen, paramagnetism, 165, 170
- Pasteur
 biographical, 90
 On molecular asymmetry (lectures, 1860), 90-3
 resolution of dl-mixtures, 92, 99
 Periodic law, 78, 80-8
 Polar and non-polar compounds, 132
 Proton, 129
- Quantum numbers
 atomic electrons, 150
 molecular electrons, 164
 Quantum theory, 107, 142, 146
- Rydberg's constant, 142
- Schrödinger, wave equation, 148
 Sidgwick
 binuclear molecular orbits, 141, 154
 theory of co-ordination compounds, 138-40
 Stereochemistry, compounds of
 carbon, 90-100
 nitrogen, 100-5
 quinquevalent elements, 105
 selenium, silicon, sulphur and tin, 100
 Stoner, concept of closed electron groups, 143
- Theory of types, 2, 46, 51-3
 Thiele's theory, 72
 Tilden, 1
- Valency
 absolute, latent and active (Frankland), 37
 and affinity, 44
 as directional property, 89 ff.
 definition, 1, 27, 31, 34
 incorporated in type theory, 52-4
 physical interpretation (Kekulé), 62
 terminology, 43
 variable, 1, 31, 32, 35, 37
 Valency bond method, 155-63
 Volta, discovery of (voltaic) pile, 17
- Wave equation, 148
 Wave function (orbital)
 interpretation, 148
 degeneracy, 153
 Weber, W., 126
 Werner, Alfred
 biographical, 114
 constitution of metal-ammonia complexes, 116-21
 dissymmetrical complexes, 121
 principle of co-ordination, 120
 Williamson, A. W., 39, 51, 53
 crossed symbols, 52
 radical exchanges (in solution), 109
 views on chemical formulae, 39
 Wislicenus, 89, 95
 Wollaston
 acid and normal salts, 9
 stereochemical views, 10, 89
 Wurtz, 44, 45, 50, 53
