	<i>Preface</i>	page xiii
1	On a conjecture by A. Durfee <i>E. Artal Bartolo, J. Carmona Ruber & A. Melle-Hernández</i>	1
	1 Introduction	1
	2 Invariants of singularities	2
	3 Superisolated surface singularities	5
	4 Zariski pairs	11
	References	15
2	On normal embedding of complex algebraic surfaces	
	<i>L. Birbrair, A. Fernandes & W. D. Neumann</i>	17
	1 Introduction	17
	2 Proof	18
	References	21
3	Local Euler obstruction, old and new, II <i>Jean-Paul Brasselet & Nivaldo G. Grulha Jr.</i>	23
	1 Introduction	23
	2 Definition of the Euler obstruction	26
	3 Local Euler obstruction for a frame	29
	4 Euler obstruction and hyperplane sections	30
	5 The local Euler obstruction of a function	32
	6 The Euler obstruction and the Euler defect	33
	7 The Euler defect at general points	34
	8 The Euler obstruction via Morse theory	34
	9 Generalizations of Milnor number	35
	10 Bruce and Roberts' Milnor Number	36
	11 Local Euler obstruction of an analytic map	38

12	Local Euler obstruction of 1-forms	39
13	Local Chern obstruction of collections of 1-forms and special points	41
	References	43
4	Branching of periodic orbits in reversible Hamiltonian systems <i>C. A. Buzzi, L. A. Roberto & M. A. Teixeira</i>	46
1	Introduction	46
2	Preliminaries	49
3	Belitskii normal form	55
4	Liapunov–Schmidt reduction	56
5	Birkhoff normal form	59
6	Two degrees of freedom	60
7	Three degrees of freedom	65
8	Examples	68
	References	69
5	Topological invariance of the index of a binary differential equation <i>L. S. Challapa</i>	71
1	Introduction	71
2	Index of a binary differential equation	72
3	Topological invariance of $I(E, 0)$	75
4	Examples	79
	References	80
6	About the existence of Milnor fibrations <i>J. L. Cisneros-Molina & R. N. Araújo Dos Santos</i>	82
1	Introduction	82
2	Milnor fibrations for complex maps	86
3	Milnor fibrations for real maps	91
	References	101
7	Counting hypersurfaces invariant by one-dimensional complex foliations <i>Maurício Corrêa Jr. & Márcio G. Soares</i>	104
1	Introduction	104
2	Statement of results	106
3	Examples	109
4	Proofs	110
	References	113
8	A note on topological contact equivalence <i>J. C. F. Costa</i>	114
1	Introduction	114
2	Topological contact equivalence	115

3	Properties and invariants	115
	References	123
9	Bi-Lipschitz equivalence, integral closure and invariants <i>Terence Gaffney</i>	125
1	Introduction	125
2	The Lipschitz saturation of an ideal or module	126
3	Bi-Lipschitz equisingularity of families of curves	132
	References	136
10	Solutions to PDEs and stratification conditions <i>Terence Gaffney</i>	138
1	Introduction	138
2	The method of characteristics and W stratifications	138
	References	145
11	Real integral closure and Milnor fibrations <i>Terence T. Gaffney & Raimundo Araújo Dos Santos</i>	146
1	Introduction	146
2	Notations and setup	149
3	Some results	150
	References	156
12	Surfaces around closed principal curvature lines, an inverse problem <i>R. Garcia, L. F. Mello & J. Sotomayor</i>	158
1	Introduction	158
2	Preliminary results	160
3	Hyperbolic principal cycles	162
4	Concluding remarks	165
	References	166
13	Euler characteristics and atypical values <i>Helmut A. Hamm</i>	167
1	Cohomological results	168
2	Absence of vanishing cycles	174
3	Topological triviality	178
	References	183
14	Answer to a question of Zariski <i>A. Hefez & M. E. Hernandes</i>	185
1	Introduction	185
2	Classification of the equisingularity class (7, 8)	185
3	The question of Zariski	186
	References	189

15	Projections of timelike surfaces in the de Sitter space <i>Shyuichi Izumiya & Farid Tari</i>	190
1	Introduction	190
2	Preliminaries	191
3	The family of projections along geodesics in S_1^n	195
4	Projections of timelike surfaces in S_1^3	198
5	Duality	205
6	Appendix	208
	References	209
16	Spacelike submanifolds of codimension at most two in de Sitter space <i>M. Kasedou</i>	211
1	Introduction	211
2	Lightcone Gauss images of spacelike hypersurfaces	212
3	Lightcone height functions	215
4	Generic properties and de Sitter hyperhorospheres	217
5	Spacelike surfaces in de Sitter 3-space	220
6	Spacelike submanifolds of codimension 2	221
7	Lightlike hypersurfaces and contact with lightcones	223
8	Lightcone Gauss maps and lightcone height functions	224
9	Classification in de Sitter 4-space	226
	References	227
17	The geometry of Hopf and saddle-node bifurcations for waves of Hodgkin-Huxley type <i>Isabel S. Labouriau & Paulo R. F. Pinto</i>	229
1	Introduction – equations of Hodgkin-Huxley type	230
2	Linearisation	233
3	The exchange of stability set	235
4	The exchange of stability set in (HHW)	238
5	Example: single channel Hodgkin-Huxley equations	241
	References	244
18	Global classifications and graphs <i>J. Martínez-Alfaro, C. Mendes de Jesus & M. C. Romero-Fuster</i>	246
1	Introduction	246
2	Surfaces and graphs	247
3	3-Manifolds and graphs	262
	References	264
19	Real analytic Milnor fibrations and a strong Łojasiewicz inequality <i>David B. Massey</i>	268
1	Introduction	268
2	Singular values of matrices	271

3	\mathbb{L} -maps and \mathbb{L} -weights	274
4	Milnor's conditions (a) and (b)	282
5	The main theorem	286
6	Comments and questions	290
	References	291
20	An estimate of the degree of \mathcal{L}-determinacy by the degree of \mathcal{A}-determinacy for curve germs <i>T. Nishimura</i>	293
1	Introduction	293
2	Proof of Theorem 1.1	294
	References	297
21	Regularity of the transverse intersection of two regular stratifications <i>Patrice Orro & David Trotman</i>	298
1	Introduction	298
2	Regular stratifications	299
	References	303
22	Pairs of foliations on surfaces <i>Farid Tari</i>	305
1	Introduction	305
2	Examples from differential geometry	307
3	Classification	311
4	Invariants	325
5	Bifurcations	330
6	Appendix	331
	References	334
23	Bi-Lipschitz equisingularity <i>David Trotman</i>	338
1	An oft-heard slogan	338
2	Existence of Whitney and Verdier stratifications	339
3	O-minimal structures	340
4	Local triviality along strata	341
5	Mostowski's Lipschitz stratifications	342
6	Consequences of Valette's triangulation theorem	344
7	Appendix. Definition of Lipschitz stratifications	345
	References	347
24	Gaffney's work on equisingularity <i>C. T. C. Wall</i>	350
	Introduction	350
1	Early results on equisingularity	351
2	Notations	356
3	Integral closures	357
4	Invariants	362
5	Criteria for equisingularity	366

6	Recent work	369
7	Bibliography of Terry Gaffney's papers	372
	References	374
25	Singularities in algebraic data acquisition <i>Y. Yomdin</i>	378
1	Introduction	378
2	Examples of moment inversion	381
3	Singularities in reconstruction of linear combinations of δ -functions	389
4	Noisy measurements	393
	References	394
